*I have a great person that
I want as my friend.
Call me at [unclear]
and I will give you all the information.*

You're funny!

Joking around was one of the many things that people found to do at a football game. Senior Heidi Deuel laughs at a comment made by Tony Martin at the SOC game. Although

Skyline didn't win many games, the stands filled with Raider fans cheering the football team to a victory in their own sense. Photo by T. Vallier

What?!

Performing a routine to the latest fad of Pee Wee Herman, varsity cheerleaders David Lopez, John Jones, Richard Gardner, Stephen Johnson and Danny Uselton ham it up. The tune *Go Big Red* went over

well with the student body at the South Oak Cliff pep rally and fit the routine that Gardner and Johnson made up. *Go Big Red* has not been played in past assemblies due to lack of brass players. Photo by T. Vallier

Together again

New joins old, changes begin

Put 4,071 students with different goals and interests in one school. Add to that a new principal and the strict implementation of H.B. 72, mix well and one gets an idea of the challenges faced.

Having to face the year with a new principal took understanding and patience from both the faculty and student body. Gene Golden had to meet and adjust to these changes as well. Becoming a principal at a high

school of such variety as Skyline was not an easy job, but he showed he was more than capable of handling the position. He began by choosing to leave the doors of his office open to better deal with all types of problems encountered by faculty and students.

"The most challenging thing now is getting used to the size and numbers. Really, Skyline is kind of a city unto itself," commented Golden.

cont. pg. 5

Jimmy,
It was a real
privilege getting
to know you this
year. You are a
very sweet guy.
Best wishes for
next year and
always. Take care.

Opening

Charge!

As the band plays the fight song, the cheerleaders cheer the football players on. Senior Kevin Paul leads the rest of the team through the spirit line made up of Skylites and cheerleaders and to a victory against W.T. White, 24 to 21. Photo by J. Babb

Let it rain

Friendships are important, especially to drill members Yancy Beardon, Marcy Varden, Kim Norrell and Kimi Lowrey. Exchanging gifts such as crazy hats, balloons and flowers was a common sight at football games. Photo by T. Vallier

Hop-a-bus

Having to ride the school bus to school every day is a common drudgery many students face. Due to overcrowding of buses, some students chose to carpool or walk, but junior Jonathan Garland continues to ride the Skyline two-mile run bus. Photo by J. Reynolds

A race for success

No pass - no play, numbers in

cont. from pg. 3

Along with a new principal came the "no pass, no play" rule which added to the disgust teachers and students felt towards H.B. 72. The new rule was directed mainly at those involved in extra-curricular activities. In order for students to

participate in these activities, they had to maintain a 70 or better in all classes. This also helped introduce a new type of grading system. The numerical system increased the paper work for teachers but students believed it was worth the effort.

*Jimmy,
I'm

Students who unload from buses in front of Skyline center get to view an arrangement of flowers designed by the horticulture cluster.

Just for

LIFE

Getting to play

With tougher standards aimed towards education, students were forced to focus more attention on studies and less on social life. But students still found time to do those things that made high school life fun.

Working at part-time jobs, attending amusement and water parks and going to parties were just some of the things people did to entertain themselves during the summer.

Upon returning to Skyline, students were faced with harsh reality. Homework, tests and a new grading system were some of the facts they had to confront.

Readjusting to these new changes did not stop students from continuing to express the pride and spirit that is a tradition at Skyline.

Pep assemblies were still held before school, but attending students became so boisterous that principals threatened to end pep assemblies if the chaos continued.

Among these different changes was also a change in the style students had. Individuality was the basis of the trends as students wore anything from paisley to combat boots. Uniqueness was now the norm as each individual tried to reflect the type of person he imagined himself to be.

No matter what changes and fads came about students still found that they were all just the right type of people for Skyline.

"Come on in, the water's fine!" That's what band members Cedric Barnes, Brendon Clark, Derrick Langley, and Bobby Johnson seem to be saying while splashing in the Everlade Park Pool during the band picnic in mid-August. Over the summer, the band held many such events designed to make the hours of practice more bearable. Photo by C. Strokes

Student life

Lying around

Band members Todd Lewis, Cris Asensio, Shane Shinsato and Attapol Sookma relax in the sun. After practicing half a day in their swimsuits, the band had an afternoon party at Everglade Park to help relieve boredom with practice and help new and old members get acquainted. Photo by D. Geiger

South of the border

Pat Garcia, along with his cousins, take time out to gaze upon the beauty of downtown Mexico City. He spent two weeks vacationing and visiting family throughout Mexico. Along with touring the sights in Mexico City, he was also able to enjoy the sun and shores of Acapulco. Photo by J. Lopez

School in Paris

Jennifer Gianguilio practices her oboe attentively at the Paris Conservatory of the Twentieth District. She was able to spend seven months as an exchange student in France. In addition to attending school in Paris, she broadened her music abilities and was able to learn some of the French language as well as the French culture. Photo by R. Gianguilio

Fun under the sun

B-R-R-R-I-N-G

The final bell clanged, signaling the end of school and the beginning of two and a half months of what everyone hoped would be a fun-filled summer.

Lockers slammed for the last time, echoing emptily as the newly-freed inmates escaped into the already hot out-of-doors, thoughts of Six Flags and White Water in their heads. They looked forward to finding ways to

beat the heat and have some fun.

Vacations away from home were a welcomed change and helped in making summer even more exciting. "I vacationed in Los Angeles. I visited Disneyland Universal Studios and the Wax Museum. You name it and I did it," said junior Ricky Martinez.

Water parks and local pools provided another form of escaping the heat. White

Water and Six Flags were among the places to escape when the heat was unbearable. "I spent my whole summer at White Water," said freshman Kecia Adams. Unlike Adams, many preferred the thrills and hills of the Shockwave to the roaring tides of the wave pool. As sophomore Margaret Ridge attested, "Six Flags was my home away from home."

But not all were as fortunate. The unlucky ones were

forced to remain in the dreadfully boring place known as home. "I got addicted to soaps and watched reruns of Gidget," said junior Karen Bedalow. Watching anything from reruns to soaps helped to beat boredom.

B-R-R-R-I-N-G

The same clamor that announced the beginning, signaled the end of summer and the resumption of the old routine. School was back.

-Debra Villarreal

In the U.S.S.R.

Julia and Greg Barton converse in Russian with military cadets at the Kiev World War II museum. Besides the city of Kiev, the Barton family also toured the cities of Moscow and Leningrad on a three week tour of Russia. Photo by S. Barton.

The streets of D.C.

Just returning from the Capitol after listening to a Senate hearing, Man and His Environment students Duane Walls, Philip Polk, Roslyn Chaney, Elena Hernandez, Carole Herndon and Debra Villarreal take a stroll through Washington. The students of this cluster spent two weeks on a Congressional tour of the nation's capitol. They stayed in the dorms at the Catholic University and spent two weeks, sight seeing at places such as the Pentagon, the Smithsonian, the White House, the Capitol and other various Federal Buildings. Photo by A. Frazier.

Two time winners

Not willing to rest on its laurels, the varsity squad travelled south to compete again for more honors. Two weeks after competition at NTSU, the squad competed at another camp at Southwest University in San Marcos. Daily, the squad had to perform in front of judges and on the final day the squad was voted camp champions. Along with winning camp champions, they brought home spirit ribbons and a spirit stick. Taking a break

Taking a break from her American Government class; Junior Cynthia Kahanek gulps down ice cold water from a fountain in the halls of Sunset High School. Since Cynthia failed her sophomore class of American Government, she had to spend two months of the summer making up the credit. Photo by T. Vallier

Brain drain

For two months, freshman Alex Villarreal and sophomore Matt Martindale took a summer class of U.S. History daily, they entered the school rooms of Sunset High School and set to work on learning facts about the Alamo, The Constitution and numerous other events in American history. Villarreal took the class in order to make room in his schedule for a period of journalism. He was the only freshman on the Origin staff. Photo by T. Vallier

Summer work

Student life

Packing it all in

Combining work and play, students managed by

Dipping down into the smoky cold counter, she scraped repeatedly over the pistachio almond fudge until it formed into a hard round ball. She delicately placed it onto the sugar cone, pressing it until she was sure it wouldn't fall off but not so hard as to break the cone. It wasn't back-breaking work and it kept her out of the summer's heat. Deanna couldn't complain too much.

Working for an independently owned Baskin Robbins, Deanna Sockwell was paid less than minimum wage.

Jobs were only one part of summer. Summer camps were another.

Cheerleaders, flag corps members and journalism students attended camps at NTSU, San Marcus, Eastfield and UTA.

Among the first to go were the flag corps. At the NTSU camp, June 17-20, Lisa Kahanek, Rebecca Schuhmacher and Andrea Adams learned new moves and flag techniques that they used the next school year.

The cheerleaders attended camp at NTSU where the squad sought and

received recognition. The camp staff chose 15 of the best squads. Skyline was one of them.

Yearbook and newspaper staff attended workshops at Eastfield and UTA, learning the intricacies of writing headlines, stories, designing pages and taking photographs.

Still others invested in summer school. In fact, over 250 Skyline students took one or more classes in DISD summer school. Senior Nini Zarzuela explained that she

took health during the summer in order to free up an hour of her schedule for an extra elective. "I just couldn't see spending a whole semester on something I could get done in six weeks," stated Zarzuela.

With the end of summer, so came the end of summer jobs, summer camps and summer school. It was now time to settle back into the old regimen of homework, late night study and school activities—things that left little time, if any, for remembering the activities of summer.

-Tina Vielma

Who's got spirit?

Minutes before the competition for the Award of Excellence, varsity cheerleaders gathered on a grassy field at NTSU for a pep talk from sponsor Evelyn Kattes. The squad went on to win a spirit stick along with 15 other squads at the summer camp. They later rose above all the squads at camp by getting the spirit megaphone. Only one squad out of the almost 50 squads won the megaphone. The squad attended this camp, June 17-20. Photo by E. Kattes

Money honey

Working at Jack in the Box, senior Joe Lopez was able to make and save money for use in the following school year. Working the register was one of the many duties Joe performed. Other duties included stocking the condiment counter, closing, dishwashing and grill working. Unlike many students who quit their jobs because of the added pressure of school, Joe continued to work throughout the school year. He had worked at Jack in the Box almost a full year before his senior year but continued in order to have a steady income. Photo

Flag fancy

Gathered at Fouts Field at NTSU, flag corps members Rebecca Schuhmacher, Lisa Kahanek and Andrea Adams celebrate winning the Most Improved Award. At the camp, the girls learned three different routines, performed them in front of judges and won superior ratings. On the final day, all groups gathered in the campus stadium and performed routines picked by each group. The trio performed to a routine called "The trooper salute". With the performance, the trio again won a superior rating. On the final day, they were handed the trophy naming them Most Improved. Photo by C. Asensio

Sacrificing their summers to practice, students found they'd

Rather be swimming

The few, the proud, the students of spirit organizations. These members dedicated almost one-third of their summer to practice with the hope of making their organizations the best they could be.

As the hot days of August rolled by, the members of the band, drill, football and cheerleading teams practiced all over the campus. With the rising of the sun, the band and drill were already hard at work on learning fundamentals and mastering intricate routines. The cheerleaders prepared for the upcoming year by making spirit posters and practicing new cheers for the upcoming freshman orientation. The football players were also busy, learning new plays and preparing their bodies for future games.

The start of practice brought new friends together and provided a reunion for old ones. "I was expecting it to be quiet the first day, but everyone was running

around crazy, yelling and screaming," said freshman band member Tom Copeland, who arrived Aug. 5, unaware of what work lie ahead. But for senior cheerleader Kristin Spearman, it was like coming home. "The corps are my best friends. It was no problem to come to school and work with them," said Kristin.

"I love it, or I wouldn't be on it. It's hard work, but it is worth it in the end"

—Kristin Spearman

As practice continued, the temperature soared into the hundreds. Band members laid all over the parking lot in sweaty clothes, during a short five minute break while the football team pounded the turf and each other, burdened with heavy equipment and humid heat. Hard work,

sweat and tedious rehearsals filled practice time but

Getting up and getting to practice by 7 o'clock was the real suffering, after that the practicing was easy," said senior Silhouette Kim White. everyone had a different views on what was the worst.

To get out of the monotonous everyday routine, the band council set up special activities to make the practices more enjoyable. They had special days such as Nerd Day, Hawaiian Day and Swimsuit Day. Along with this they also had picnics and parties. "Practice was fun because our band director had different things planned for us. It made our hard work worthwhile and made us try even harder," said junior Rhonda Martin.

Summer practice was a necessity. It prepared the organizations for the upcoming year while building pride, unity and spirit. Members realized this and dedicated themselves to the cause. As

Spearman summed up, "I love it, or I wouldn't be on it. It's hard work, but it is worth it in the end."

-Dee Geiger

Spin me right 'round

Warming up with front spins as the band plays scales, junior Jennifer Nelms prepares for the intense practice before her. With the flag corps' new innovative routines this year, more practice was needed to develop and execute them to perfection. Photo by T. Vallier

Time out for

Taking a break from exhausting practice, senior cheerleaders David Lopez and Loanae Jefferson relax with some playful wrestling. The cheerleaders practiced from 8 a.m. to 3 p.m. making spirit banners, developing new cheers, and rehearsing for the upcoming assemblies. Photo by T. Vallier

Parking lot blues

During a rare five minute break, assistant drum major Misty Hinojosa and band members Belinda Nichols and Shannon Galbraith, take a much needed rest on the hot pavement. Photo by T. Vallier.

Beating the heat

Adorned in their swimsuits, band members Pam Woodberry and Linda Villarreal stay cool on swimsuit day while Charles Hudgins sweats it out as they practice the drum feature *St. Thomas*. Swimsuit day was a Friday afternoon activity planned to relieve the humdrum routine of everyday practice and provide a reward for a week of hard work. Photo by T. Vallier

Thinking perfection

As sophomore Silhouette Amy Hall waits for the next command, she focuses her attention on practicing the routing to the song *Flash Dance*. What a Feeling for the Plano game. Photo by T. Vallier.

Skyline girls

Putting the final touches on the traditional kick routine to the song *Hey, Look Me Over* drill members Donna McBride, Jana Dixon and Kacy Caviness practice outside on the practice field for the upcoming halftime performances. Photo by T. Vallier

Just for kicks

Football team member Steve Autry watches as Herman Johnson spots the ball for Tyrance Barnett. The football team practice twice a day for two weeks before school started. Practice consisted of an early morning workout from 6:30 a.m. to 8 a.m. and in the evening workout from 3:30 p.m. until 6 p.m. Photo by T. Vallier

The price is right

Erin Ramey prices the latest styles as she works at Foxmore on one of many Sundays. Photo by D. Villarreal

Rings of joy

Laura Malloy takes advantage of the abolishment of the Blue Law as she shops on Sunday at Red Bird Mall. Photo by D. Villarreal

Buckle up

To protect himself from injury in case of an accident, freshman David Spearman fastens his seatbelt before leaving school. Labor Day brought into effect a state law requiring that all occupants in the front seat of a car or pickup wear a seatbelt. Photo by J. Bonds

A priceless day

The last day proved to be

One last day to sweat.
One last day to party.
One last day to shop.
School starts tomorrow.
Sept. 2 marked the last day for freedom and the first day for new laws.

To end the summer, students tried their hardest to get the most of the day. Parties were one example. "I had a blast at a last day of summer

sort of party at White Rock Lake," said sophomore Vanessa Perez.

Others celebrated the last day of summer and Labor Day by getting together with family.

Preparing for school added to the reality that was almost here. Student shoppers crowded stores for bargains on school supplies. "I shop for sales at Target so we can get bargains," said freshman Dawn Merkel.

Two changes took place that long weekend. The mandatory seat belt law and the other the abolishment of

the Blue Law.

While the new requirement to wear seatbelts had mixed reviews. The Blue Law repeal was well accepted.

Senior Doug Groom saw the seat belt law positively. "It's not a restriction. The seatbelt stretches with you. What if you're in a wreck? It could save your life," he said.

Other accepted it grumpily.

"At a certain age, kids should wear a seatbelt, but (we're old enough) it's our choice," complained Amy Holy.

The end of the Blue Law

was welcomed by junior Steven Polk and others like him who had Saturday jobs. "It now gives us a two day shopping weekend which is really good for people who work Saturdays," said Polk.

Regardless of how students saw Sept. 2—as a end of old laws, a beginning of new or as a last day to celebrate not having homework and a regular routine—it came and went. Sept. 3 would mean early alarms, new schedules, the banging of lockers and school food. Summer was over.

-Debra Villarreal

Off the wall

Sunday used to be the only day I had off from work and school, but now working on Sunday ruins my whole weekend. The mall sent the card shop where I work a letter informing them we had to be open from noon to 6pm Sundays.

I do not think it is fair for anyone to have to work on Sundays, it should be their own choice. The store really does not make a profit, and no one feels like working, therefore they are not the best salespeople.

The only good thing about working on Sunday is getting paid time and a half. My question is people have lived with the Blue Law all their lives, so why change it now?

-Sherri Curtis

Stacking it up

With the abolishment of the blue law students who worked in retail stores had to work on Sunday. Trilica Gilmore straightens up the displays at the Gap Store in Red Bird Mall. Photo by D. Villarreal

My number's up

Almost half of the student body visited the counselor's office during the first week of school. Senior Juan Fuentes was among those students who visited to get his homeroom number. Counselor Maude Small was not his assigned counselor but she was able to look up his schedule and answer his question. Over the summer, Fuentes, like many students, had misplaced his envelope with his homeroom location and teacher. Photo by T. Vallier

Is there no end?

After receiving forms for student information, sophomores Julie Beacon and Rhonda Neally await the bell to go to first period. They decided to fill out their forms at home. Photo by T. Vallier

You go that way

Having a problem with his part-time schedule, sophomore Steve Williams, visits the counselor's office with junior Evan Johnson. Cecilia Bailey points to the sitting area where they'll wait to see their counselor's. Photo by T. Vallier

First day has students Breaking ground

As the 8:15 bell rings, Freddy Freshman enters, scared and unsure about THE FIRST DAY OF SCHOOL.

Looking for a sign to help him discover his location, poor Freddy was introduced to the massive size of his new high school. Freddy was only one of 1,269 incoming freshmen, lost in the mass confusion of the first day.

In order to help freshmen, maps of the campus were supplied and a friendly upperclassman was always around the corner willing to assist them. "Common sense should tell you to look at a map or sign. Instead of running around embarrassed, the freshmen should stop and ask someone

Getting planted

As a part of a city-wide beautification program, assistant principals Charles Tuckey and John Washington join others in planting a crepe myrtle on Skyline's grounds. At 9 a.m. on Sept. 3, all Dallas schools simultaneously commenced either planting a tree or bulb, whose symbolic purpose was a new beginning. Joining Tuckey and Washington on the first day of school were all assistant principals, Gene Golden and 24 student council members including student body president Paul Peterson and vice-president Denice Golden. Photo by T. Vallier

to find out where they are and where they need to be going," commented senior Angela King.

"It's not as if I particularly like having to stay until the end, but I can live with it. It's really not that big of a deal. One good point is that you will get to see everybody a little bit longer," observed senior Scott Jones.

After obtaining directions from an assistant principal, Freddy was finally settled in his homeroom. While there, Freddy received his schedule and filled out the usual green and white cards. A sense of familiarity overcame him as his homeroom teacher commented, "These need to be signed and returned by tomorrow."

After homeroom, Freddy was on his way. He was faced with the experience of seven new classes filled with new people, picky teachers and a new grading system.

All students had new

experiences to face. They had new people and teachers and quickly had to fall into school routine. A new item was the introduction of a new grading policy of numerical grades instead of letters. All school work and report cards were to bear a numerical grade instead of the usual A,B,C, or F. "Now that the grades have been converted to numbers, I can't feed my mom a sob story about how I missed a higher grade by one point," commented junior Leigh Anne Payne.

The day continued well for Freddy Freshman. As the final bell rang, Freddy quickly headed to his bus. Waiting to go home, he pondered over the events of the day. He thought about his new friends along with the reunion with his old friends. As the bus pulled away Freddy asked himself, "Will I ever fit in?" But being optimistic, Freddy tried to look forward to returning to another full day of high school... the next day.

-Dee Geiger

1, 2, 3, Go

New students had three pitstops to make before entering their homerooms. First stop was the attendance office when students were enrolled. Second, students visited the clinic and gave Mrs. Sherman, R.N., their vaccination records and had brief physical examinations done. Finally, students entered the counselor's office where they received their schedules and met with their assigned counselors. For five days straight, all three offices were swamped with students standing in line for their turn. Photo by T. Vallier

H Afterschool life had students having oops of fun

Food, friends and conversation were the ingredients students combed the streets for after a hard day of tests, homework and lectures.

Finding a place to go was never a problem. A drive to the local McDonald's practically guaranteed a meeting with friends clustered in the parking lot discussing the

day's events.

"I just went (to McDonald's)...someone was always there. It gave me a chance to talk to friends outside of school," said junior Pat Garcia.

Although restaurants were the most popular getaway, students did do more than eat. Amusement parks, theatres and playhouses attracted students.

During October, students went to the fair where they filled their stomachs with candy apples and corny dogs.

Movie interests ranged from popular current movies shown at Town East to classics shown at the Granada.

Since some English teachers gave extra credit for reviewing plays shown at the

center, students combined schoolwork with social outings.

From Big Macs to *Casablanca*, students showed their diverse tastes in entertainment and social activities. No matter the date or time, it was a certainty that students could never be bored from lack of places to gather.

-Tina Vielma

Step right up

Although given a Fair Day, junior Tracy Day and junior Angie Bohne take another day to visit the fairgrounds. The day given for students to attend the fair was faulted by rainy weather so many attended on days less rainy and less crowded.

Don't tell me that

Gathered in the parking lot of McDonald's seniors Brandon Davis, Cameron Cox and Darren Diffie shoot the breeze about school and people. Although many restaurants were frequented by students, McDonald's was to be the most popular in that both underclassmen and upperclassmen could be found there. Photo by R. Kemp

Hanging out

It was Friday night and they needed a place to assemble. McDonald's was the destination for Leanne Ivy, Mary Ann Ehrenberger, Troy Prokik and Rhonda Southard. Instead of going to a movie or out to eat, the group gathered in the parking lot and joked around. McDonald's was the most popular fast-food place near the school. Photo by J. Lopez

Aren't we cute?

Couples and groups alike attended the fair during its three week stay. Senior Tommy Cherry and junior Cassie Stone attended together. They, like many others didn't attend on the day set aside by DISD; instead, they went on a weekend. The fair, among other amusement parks, was a popular location for students. Photo by D. Locke

The last supper

In celebration of the football team winning a game, Mark Decker, Bruce Hilburn, Attapool Sookma, Shane Shinsato, Gwen Ford, Dwight Gentry and Todd Altenhofel gather at Mr. Gatti's to celebrate Italian style. Mr. Gatti's was a restaurant frequented by many students throughout the year. Photo by T. Vallier

Up we go

Trying to be daring, Tommy Courson, Lucia Munoz and Hector Mendez tackle the Texas Cliff Hanger at Six Flags. Many students visited the amusement park instead of the fair. The Cliff Hanger was considered to be one of the most frightening rides at Six Flags. Photo by D. Villarreal

Visions of beauty

A time to study

Vianey Alonso, Missy Belt and Terri Bethke study biology during lunch while showing their radicality and their creativity in dress. Photo by R. Jernigan

Go for Baroque

Anthing goes.... baroque, baggy shirts, plaids or mix and match. A lot of these were fashions that gave way to creativity.

Fashion allowed practically anything. Everyone was his own fashion designer. "Paisley, mix and match, big shirts... anything goes," were the words sophomore Monica Crenshaw used.

Students wanted indi-

viduality, something that revealed their personalities—not someone else's or something out of a magazine.

"If it's Monday, I want to change the blues of the day by wearing something that shows the happier side of me," said sophomore Adrianna Cervantes. Uniqueness and originality were a major part of fashion.

"Fashion should not be what's in a magazine or what

someone else has on, but

"Fashion should not be what's in a magazine or what someone else has on but what you feel like wearing."

-Vickie Wilson

what you feel like wearing," said junior Vickie Wilson.

"As long as it looks good and is comfortable, the traditional look is the look I like," said Kevin Canida.

The uniqueness and creativity of students' fashion is immense. Ranging from the sophisticated looks to the cool and conservative looks, students tried to wear what best suited his personality. It all proved that any style you chose is just your type.

Rain, rain go away

Fans weather out the only football game that was plagued by rain. Despite the rain at the Spruce game, the band and drill continued with their halftime performances. Photo by T. Vallier

On the lookout

Socializing at the football game was not an uncommon sight. Russell McCall watches the drill perform as Chris Cook's attention is elsewhere. Photo by J. Reynolds

A Showing spirit, students were All smiles

From the first week of school through November, one thing inevitably returned to the average student's mind — FOOTBALL.

Being a person of an organization that was involved in this sport took time and energy. "If you don't like to sleep, don't want a social life and have nothing to do on the weekends, join band," observed senior flag corps member Andrea Adams.

The football team, band, drill, pep squad, and cheerleaders were not the only ones at the pep assemblies and football games. The largest percentage of the people consisted of just people involved in cheering their school to victory while having a little fun.

"Pep assemblies are great for student morale. After an assembly on Friday there's electricity in the air for the rest of day," said senior Gloria Rodriguez.

Football games provided Friday or Saturday night, fun with time at the game usually consisting of socializing,

seeing friends while being seen by others, and maybe catching a few plays of football in between.

But these activities were not always perfect. With the instigation of House Bill 72

It's neat looking out and seeing yourself doing something for school spirit. We're really not performing, we lead cheers to get crowd involvement.

-Teri Mitchell

and no-pass, no-play, the pep assemblies - and football games changed after the first six weeks. The pep assemblies were, for the second year, held before school. The assemblies started at 7:45 a.m. and continued usually through 8:15 a.m. With the instigation of no-pass, no-play ineligible band students were placed in a mandatory pre-school hours study hall

which prevented their attending pep assemblies.

Attendance at the game was also restricted to ineligible students. Band, drill, and pep squad members who were ineligible were not allowed to associate with their groups at the game. "When I first became ineligible I felt like my world had fallen apart because I was not able to participate in school activities. I didn't have any school spirit. No-pass, no-play is good, but there are too many loopholes. It will probably help me in the long run but it doesn't help me now," said flag corps member Angie DuBois.

Whether students were in a spirit organization, eligible or not, or just a fan at the game football games continued to be an important part of high school life. Despite before school assemblies House Bill 72, and Saturday night games, the football game remained a great way to just have some fun.

All that glitter

As the seconds ticked closer and closer to that magic moment when Prince Charming would whisk Cinderella off to "Some Enchanted Evening," Cinderella nervously looked back on the months of preparations that had passed in order to get ready for this special occasion.

Thought and preparation began girls began to look for dresses as early as the beginning of October sometimes before they had dates. Besides dresses, shoes, stockings and makeup also had to be decided on and bought.

"I bought my whole outfit for Homecoming, dress, shoes, stockings, but was not really satisfied with it. My mother returned everything and bought a completely new outfit. When I put the outfit on that night, it was my first time to see it," said junior Antonia Green.

Cinderella looked in the mirror and adjusted her hair

"Do I look alright? Maybe I should have worn a different color of lipstick? I hope he likes my dress..."

Girls began to get ready for the dance early on the day of the dance. "I started getting ready at 3 p.m. by soaking in a hot bath. I then had to decide what makeup to wear, how to fix my hair and still allow enough time for that unexpected run in my stocking" observed junior Traci James.

"I started getting ready at 3 p.m. by soaking in a hot bath. I then had to decide what makeup to wear, how to fix my hair and still allow time for that unexpected run in my stockings"

-Traci James

Preparations for the guys were not any less than those

of the girls. First, a large sum of money had to be acquired, then mums and corsages had to be ordered, tickets bought, a table rented and dinner reservations made.

"Getting ready for Homecoming took a lot of time and money. It was my first and last one, so I wanted to make it special," said senior Chris Spikes.

As Prince Charming arrived at Cinderella's house, he hoped all was taken care of. He whisked her off to an evening full of fine food, dancing and romance a perfect story book ending.

Homecoming looked upon as one of the important events of the year-required ample preparation to insure it would be a "night to remember." The work and effort put into it hopefully, in the end, provided an evening that lived up to everyone's expectations.

-Dee Geiger

Peek a boo

Camera-shy Angela Barnes peeks out of her bathroom, surprised to find photographers in her bedroom on the day before Homecoming. Barnes prepares for a day full of events, beginning with drill practice and a pep assembly and ending with the Homecoming game to be played at Sprague. Photo by R. Jernigan

Bright lights

Sleeping with her sweats on was a common routine for Lisa Chakmakjian. She did this so that time would not be wasted on putting them on for early morning drill practice. Wearing the same color sweats was just one of the ways the drill motivated spirit and unity among themselves. Chakmakjian was one of the queen nominees. Photo by S. Callahan

Ready and waiting

1, 2 Buckle my shoe

Pulling on her tennis shoes, Angela Barnes finishes getting ready for a busy day at school. Barnes had to be up before the sun in order to practice with the drill. The practices for halftime performances continued through Nov. 8 — the date of the last football game. Being nominated queen made the days more exciting but having the other nominees as drill mates made it even more competitive. Photo by R. Jernigan

Aaaaahhhh!

Angie Bohne screams with joy after being proclaimed junior duchess at the Fairmont Hotel. Tracey Day was there as Bohne's date and was ready to give her a congratulatory hug. Photo by J. Babb

Homecoming left nominees sitting

O n the edge

“And the 1985 Homecoming Queen is . . .”

Being crowned Homecoming Queen or even being nominated for court was a part of every high school girl's dream. For those nominated, life remained much the same but the excitement that came with the

event was there. Nevertheless, hard work was involved in preparing for the event.

The real event came on the day after the game, however. At 11:15 pm., the nominees were announced. With all watching and waiting for the announcements, senate sponsor Zelda Russell began to read the nominees and a short biography about them.

As the nominees held their collective breath and clutched at escorts' arms, the

winner's names were announced and winners were given a bouquet of roses by the senate officers. The 1985 court consisted of Cynthia Leaks, Teresa Morris, Angie Bohne, Lornae Jefferson and queen Angela Barnes.

The glitter and glory of the pageant soon faded as did the smell and color of fresh mums. All that would remain would be the memories of that very special “enchanted evening.”

-Linda Villarreal

Here she comes

Moments before being announced queen, Angela Barnes and her escort march down the aisle toward the stage where she would soon receive her crown and title. Barnes later lead the traditional coronation dance. Photo by K. Tucker

Finishing touch

He straightens up his tie and she fixes his coat, as they want everything to be just perfect as they prepare to go out and dance the first dance of the evening. Photo by J. Babb

Moving to the beat

The music varied to everyone's taste. Elliot Kennedy dances the night away as the music beats to a contemporary tune. Everyone was able to find the type of music they enjoyed best whether it was fast or slow. Photo by J. Babb

At a standstill

Waiting for just the right song, Staci Baker and Eric Rosar take timeout to talk. Photo by J. Babb

As each couple arrives at the dance

The magic starts

Bodies crowded the dance floor, leaving little room for even one more couple. Lights popped periodically around the room as Flash and yearbook photographers froze brief moments for individuals, couples and groups.

Couples queued up with \$10 or \$15 clutched to pay for portraits. Restrooms clogged with girls waiting for their chance to view the damage a

few hours of dancing had done.

Weeks of preparation came to an end as "Some Enchanted Evening: A Homecoming to Remember" premiered at the Fairmont Hotel Regency Room Nov. 2. The \$22 a couple dance was packed as over 1,100 people descended on the hotel, filling hotel lots and testing the valet parking

"This homecoming met

up to all my expectations," said sophomore Trese Coe. But there were students with different opinions. "The overall atmosphere left something to be desired," said senior Todd Vallier.

Still, the last song was played and the evening began to come to a end, Homecoming was no longer a reality but a fond memory of what was.

Working it out

As the bell rang, the once silent halls quickly filled with masses of hungry people on the way to their favorite period of the day - LUNCH.

Lunchtime activities included many things other than eating lunch. This short 30 minute class provided a time to do homework, to take care of extra work for classes and to catch up on the latest gossip. "During lunch I like to relax, talk to friends and eat. It's the only time during

To cut down on student activity in the halls during the lunch periods, new rules were instigated. These dictated which restrooms could

be used, put a restriction on which halls could be traveled and forbade students to visit any of the high school offices without a pass. This could have been a good rule to cut down on the traffic, but many students and monitoring teachers were unclear on the exact whens, wheres and hows of the rules. "If they don't know what they're doing, how is anybody supposed to know what to do. They need to get their acts together. It is ridiculous that I cannot even leave the student center to talk to my counselor about extremely important business about my life," commented senior Doug

Thompson on the situation.

Lunchtime also provided a time for mischief. One habit that had become popular among students was leaving the school campus for a nice lunch "on the town." Although this was against school rules, many students got away with it.

Lunch provided a needed rest in the middle of the day and a short period of salvation. No matter what activities one decided to do or take care of, lunch was the time to pull oneself together and prepare for the rest of the day.

Halloween festivities kept Students caged

"Trick or treat — smell my feet — Give me something good to eat!" Those were the days.

Unfortunately, those were the sounds of yesterday for many students. Once in high school, club parties and haunted houses replaced that good old traditional hoarding of sweets.

Eyes of beholder

People from everywhere participated in the band haunted house. On Halloween night, the wicked witch of the west visited the haunted house to add a little authenticity to the affair. Since masks were worn by a majority of the participants, many identities remained anonymous. Photo by T. Vallier

The Spanish and Science clubs each celebrated by having parties to fill the void left by empty trick-or-treat bags. Halloween night, sophomore Dan Durrett held the Spanish Club party at his house. Cuban tamales, taco salad and a pinata gave the celebration a Spanish flair.

Only blocks away, the Science Club was holding a party at senior Deidre Franklin's house. Since the party fell on a school night, it appropriately broke up at 10 p.m., allowing students to take a peek at the March of

Dime's and band's haunted houses.

On Hallow's Eve and Halloween night, the band sponsored a haunted house in the band hall and practice rooms.

"Both haunted houses were alright but I guess I was just expecting too much," said senior Chris Sanders.

These special school events helped to make up for the unwillingness of students to participate in traditional Halloween activities.

-Tina Vielma

Don't I get any?

Sing, sing a song

Limited Edition members Ashli Pate, Suradet Sookma and Jennifer Bozick sing their way through fourth period class as they act out the song *You Made Me Love You*. Photo by B. Collins

Expressing music had students

Singing a song

Sitting in first period class, Sammy Student heard the teacher ask the class to take out its notes. Unfortunately, all he could think about was the last song he had heard on the radio as he left his house that morning.

Music filled people's lives from the moment they woke up to their clock radios until they went to sleep at night listening to their favorite albums.

At school, music filled in the halls and classrooms, from the girl in English class who was always singing before class started to the student outside with his illegal Walkman tape player, to the guy who continually hummed the song he was working on in his band class.

Music also filled the classroom in some cases. Cluster teachers played albums and allowed students

Just beat it

During his second period jazz band class, junior Homer Smith plays the drums with the rest of the jazz band to the song *Bandstand Boogie* in preparation for their performance at the Seagoville basketball game. Photo by R. Jernigan

to listen to the radio while they worked. This provided a relaxed atmosphere, and people sometimes worked better as they sang along with their favorite song.

"My cluster teacher always plays some type of music for us. It gives you creative intuition, helps you solve problems, and clears your mind," said architecture student Authur Ogle.

For students who were involved in the music department, music was part of their lives in a different way. They made music. Band, choir and orchestra students participated musically in some way everyday. At most times during the day, one could walk to the front of the building where the music department was located and hear these students at work.

"Music plays an important part in my life. Because I'm shy in ways, my music gives me a chance to express myself. I don't mind the extra time and effort I put into practicing, because I enjoy

it," said band student Danny Allen.

Outside school, music was just as important. At home students listened to the radio or their favorite albums, but they enjoyed music other places. Dancing was one way to express love of music. Teen clubs came to the forefront as a place for minors to dance.

"My Walkman is my best friend. I love to listen to the radio and my favorite tapes. Concerts are vital. They are the only way you can see the true colors of a performer. The performers aren't real until you see them live," said junior Lynn Ballow.

Music, whether on Walkman headphones, in the car, at a party or in one's head, allowed one a chance to express individuality and freedom of choice. Whatever kind of music it was it usually left people smiling, crying, dancing, singing or just yelling, "I want my MTV!"

Symphony

Junior Shannon Anderson attends one of the practice sessions for All-City Orchestra. Anderson was one of 24 Skyline students who made up the majority of the All-City orchestra. Photo by J. Lopez

Solo studying

Before school and during lunch, many students were found catching up on homework or studying for a major test. One of the most popular places was in the courtyard between the cafeteria and B building. Photo by A. Williams

Numbers, numbers

Working hard to get an assignment done, senior Gary Paris uses his scientific calculator as an aid. Paris was in the electronics cluster and frequently he and his classmates were given time in class to finish homework. Photo by J. Lopez

Deep in thought

Some parents, after seeing the first six weeks report cards, decided to dish out money for private tutoring to keep their kids get things going. For some students these private sessions helped. "Calculus was really getting ridiculous and with all my complaining, my parents finally got me a tutor. I'll probably still drop at the semester though," said senior Donna Johnson.

Instead of depending wholly on the help of others, students poured into the school library when the doors opened at 8 a.m. Within a few minutes, the familiar "Library is full" sign had to be posted. Most were there because they thought the quiet atmosphere was ideal for studying, others were there because they had put off doing homework the night before and the library seemed the perfect place to get it done. "Every morning I would try and get to school early and do my homework in the lib-

rary. It just seemed a little easier than actually doing it at night," said junior Jonathan Mays.

Talking to oneself and writing while walking were common sights in the crowded halls before classes began. Some students worked really hard for their grades.

Knowing which grades to work for was a problem students faced over the last couple of years. Since DISD has continually changed the grading system, students didn't know what grade average was passing and what was failing, which courses carried extra credit and which had to be mastered to keep up with the seemingly perpetual battery of tests.

With the passing upped to 70, administrators realized students would need a little help. They did their part by instigating a mandatory tutoring class for students failing a required class of English, math, sci-

ence or social science. An elective class would have to be dropped and replaced with one of these tutoring classes.

Study groups were popular because they allowed students to both study and socialize. These groups usually consisted of students who were taking a similar class or studying for a major test. By studying with friends, students were able to enjoy it more. "A couple of friends and I would always get together to study World History. When we weren't goofing around, we did study," said junior Keith Minor, a student who often joined in the studying groups.

With tutoring becoming mandatory, the forever presence of the school library and friends who could always sympathize with school matters, students were given many routes to take in making their grades.

-Tina Vielma

Ah. . . solitude

The quiet atmosphere in the library gave junior Clay Chap a chance to finish reading a chapter in his literature book. He often went to the library because it offered quietness, solitude and comfort. Photo by B. Davis

Hitting the books

Trying to get homework done before she left class, sophomore Guadalupe Mora diligently works on American Government. Mora often tried to finish homework in preceding classes after her government assignment. Photo by E. Aviles

Help from a friend

Reading by sunlight, junior Latonya Cook and junior George Sanders prepare for a grammar test in English. During their lunch period, they congregated against the window to prepare for their next class. Photo by J. Reynolds

Soaking it in

For early morning studying, senior Channie Hopkins often headed for the library. She often worked on homework she wasn't able to work on the evening before, and the library's studying atmosphere gave her the chance to get it done. Photo by J. Reynolds

The Wall

Junior Frank Hernandez points out an interesting feature on THE WALL, a project by the second year Architecture cluster. This was used to cover up vandalism that had collected on the wall at the back of the room. The wall took two months to complete and was unveiled by Principal Gene Golden at the CDC Open House in February. Photo by F. Harris

Oh the wall

Perhaps one of the most tragic things that can happen to a school—is vandalism. Lately, it has become a part of our school. The vandals are the student body and not outsiders or students from other schools.

When observing other high schools, I can see the lack of student interest by observing the physical appearance of the school. Our school by far, looks better preserved than other schools. But we have the advantage. Our school is fairly new and the vandalism is still only on a small scale.

It grieves me to see our school, one of the best in the nation, gradually declining to the state of other schools. We can keep it from happening to our school. Concerned students should help in keeping this school in the best of shape.

There are those of you who will probably ridicule and oppose my position. For the sake of this school and for the sake of other students who want to learn, I sincerely hope you prove me wrong.

-Gerardo Gamboa

Oh no, not my car!

Jason Perkins' 1984 Camaro was vandalized in the Forney Road parking lot at the beginning of the school year. During the day, the parking lot was broken into and many cars were damaged by the spray from fire extinguisher. Photo by J. Lopez

P Tired of vandalism, students were ointing it out

"I love So and So," "Jackie Whoever loves everybody," "For a good time call..." "Your mother wears combat boots."

These are examples of one liners that filled restrooms throughout school. These could provide a laugh or gasp as one visited the restroom, but where did these appear from? Did anyone really care who "was so fine" or who "was an ugly dog." These were just examples of student vandalism that would one day have to be cleaned up.

"I think vandalism is wrong because they are destroying property that doesn't belong to them. They are ruining it for everybody," said freshman Beth Marcus.

Vandalism, defined as destruction of public property, could also be looked upon as a form of expression. The writing provided a way of leaving their names behind for history. It provided a way for people to make a

statement about society and issues. In many cases though, it was only a vulgar statement made about a stranger. "People who write all over everything have no respect. It reflects on their parents and home training," said junior Alex Escamilla. "I think vandalism is stupid, these people are destroying property that has been paid for by tax payers, their parents. They only do it because they want to be noticed," said freshman Alyssa Julien.

Vandalism did not include only major works of destruction, it also included small acts, too. Writing on desks and in books was not considered vandalism by most people, but it was destroying property. "When people write on desks and walls with a pencil, it leaves a statement and it's gone the next day. It doesn't hurt anything and it's fun for a joke," said sophomore Clive Aldredge.

Around the school, van-

dalism was in restrooms, on lockers and on the picnic benches outside. A popular symbol seen around the building was a capital letter A inside a circle. This was supposed to represent support for anarchy, a society without a government or rules to dictate behavior.

"There's a lot of thought behind the symbol. It's trying to make a statement about free thinking. The problem is that the wrong people got a hold of it. They write the symbol so they can be seen and noticed," said junior Leo Landin.

Whether it was writing on the walls, lockers, or on the side of the building, vandalism was a problem that students had to face. From trashed clothes expressing opinions, symbols of anarchy, to leaving one's name in the restrooms, people made and left a statement to be read by everyone, no matter what the consequences.

-Dee Geiger

While outside

In the smoking center located to the north of the lunchroom, picnic tables provide a place to sit while outside. These have been subject to markers, pens and carving as people leave their messages on the table. Photo by D. Villarreal

Doodlin' away time

In every classroom, there are desks on which people doodle during class. Some of the doodles are gone by the next day; some are permanent. Freshman Robert Ramirez colors on some graffiti that was already on his desk in his study hall class. Photo by L. Villarreal

Expression

This is an example of the writings that have been found around the school. The symbol of an "A" inscribed within a circle is supposed to be a statement about support of anarchy, a society without government rule. Photo by F. Harris

Mirror Mirror

Primping was a common sight during the six minute passing period. Tammy Cannon fixes her face in order to look simply radiant. Photo by L. Oliver

In brief

In the time given during passing period, students were able to go to their lockers and through the mass of disorder to find their next period books. Kevin Paul shows that he's getting it all organized by using a briefcase. Briefcases became very popular and were most helpful. Photo by D. Geiger

Lounging around

The students in clusters have more freedom to go outside and just relax in the sun. Kim Wright and Cathy MacCaskill exercise this right. Photo by T. Vallier

Seeing double

It's minutes until the bell, and everyone sits around looking at their watches counting down each second until the arrival of the bell.

Then finally the bell. Ring! Dashing out the door and into the halls students crowded and jammed their way through the mob-filled halls to go to their lockers, to catch a bit of gossip with friends or to see that special someone, in the short six minutes given.

Students tried to schedule their time in order not to receive a dreaded pink slip. "I go to my locker which

usually takes two to three minutes time, trying my best not to be tardy," said junior Tracy Walker.

"After I go to my locker, I meet my boyfriend and I walk him to class. Then I give him a quick kiss at the door," said junior Sophia Soliz.

Students took that six

minutes and tried to make it last. "I run down to the student center and gossip with friends," said sophomore Stephanie Peace. Others try to use their time getting ready for their next class. I go to the rest room and comb my hair and fix my face," said junior Monica Cato.

Although holding hands was against the rules a few moments of passion weren't uncommon sights. "After I go to my locker, I meet my boyfriend and I walk him to class and then I give him a quick kiss at the door," said junior Sophia Soliz.

Others just fool around until the bell sounds. "I just try to waste time," said junior Bracy Lott.

The bell rings and hundreds of students are still in the halls. "Most of the time, I run to class," said senior Irazema Corpus. These are the unfortunates that have to manage to go to class with a good excuse or face the dreaded pink slip.

-Debra Villarreal

Extra! Extra!

With papers hot off the presses, Demetrious Harris goes out during his passing period to sell newspapers to all who pass his way, including Todd Sherrod and Sheldon Frost. Photo by R. Kemp

Up in smoke

Between classes Kandy Turns, Shelly Simms, Michael Bandy and Tina Causey take time out for a quiet smoke. Students are able to scurry from all parts of the building during their passing period to go to the F-building where they can smoke before returning to the anxieties of their next period class. Photo by D. Villarreal

Rings for sale

Junior Ricky Musgrove has to make the decision about which class ring he wants. Balfour gave juniors a variety of different types of class rings from dinner ring to traditional. Prices ranged from \$67.50 on. Photo by W. Woodruff

All wrapped up

A major expense of students was clothes trying to make sure you were in "in style" cost. Eric Rutherford proves that he is by wearing a fur coat with cowboy boots. Photo by R. Jernigan

Making big decisions

The high cost of living left students

\$ \$ \$

As the cashier rings up the amount of a burger and fries or a new outfit, students could feel the squeeze of trying to get the most out of a dollar. Even going on weekend excursions such as to the movies left some students bankrupt—which leaves students either searching for a part-time job or running home to mommy.

In order to have the just right designer jeans or that car students always dreamed about took work. And work students did. "In order to have everything that I

wanted I worked a 40 hour week," said junior Sheri Curtis.

Friday nights was the time to party, go out to the movies or just to do anything to relieve the week's monotony. But this was hard to do when the money wasn't rolling in. "So that I can get out on Friday I babysit, but then when all else fails, there is always mom," said freshman Sharon Burkhalter.

On top of everything, school added to the expenses while students did not have to pay for books, no one was going to miss the band's trip

to Tennessee that "everybody" was going on, the Spanish Club's trip to San Antonio or journalism's trip to Austin.

Traditional expenses came with being a high school student. Class shirts, class rings, jackets, the yearbook and the senior graduation packet all added up to big bucks.

A little money here and there really added up—as did the price of being a teenager. Too bad minimum wage didn't—which teenagers usually got paid.

-Debra Villarreal

Browsing around

In order to be "in style," Annette Villarreal had to babysit on the side to afford the high cost of being a student. As she looks at prices she realizes that babysitting is not enough. Photo by D. Geiger

Shelling it out

At the D.E. Store, students were able to purchase a variety of necessities in order to survive a day at school. Shawn Hill pays for a folder after D.E. worker Krista White tells him the price. Photo by R. Kemp

Picking it out

Clothes to suit students' budget were hard to find. Gilbert Johnson searches for the right shirt to fit both his style and his budget. Photo by S. Cochran

At the fair

The rain didn't hold back Krista White from having fun at the fair. Although the fair was lots of fun, there were those things that weren't always welcomed. One of these was the excess of spending. Between tickets for the rides and food, the money spent added up. Photo by D. Locke

Dream car

Jack of all trades

As an exercise to get students into the Christmas spirit, art teacher Vic Ashley had his classes make 3-dimensional gift boxes. Freshman Miguel Alanis was given the option of placing his box on display or taking it home for wrapping use. Alanis chose to take his home but others left their boxes for display in the commercial art showcase. Photo by B. Davis

Dear Santa,

Playing the part of Santa Claus to some thirty fourth grade students at Lakewood elementary kept senior Miguel Celestinos busy. Before entering the room to pass out Christmas gifts, he discussed strategies with ESL club president Roy Amri.

Hut, two, three, four

Ushering people to their seats for half an hour was a small price for ROTC to pay for complimentary tickets to the Texas A&M-Auburn game at the Cotton Bowl. The game took place during the two week vacation. Photo by F. Harris.

W Two week holiday had students rapping things up

Christmas—a time for giving, a time for sharing and a time for being with one's family. For organizations, it was also a time for parties, group outings and Christmas crafts. Activities like these were rampant before and during the two-week Christmas vacation.

At Micha Whitley's house, new Silhouettes were the guests of honor at an induction party. They were introduced to the veteran drill team members and enjoyed party games, including charades.

Simultaneously, in

another part of town, the Science Club turned president Marilyn Huff's house into a Las Vegas casino. Poker, craps and blackjack kept members busy throughout the night. Instead of using money, however, club members answered science trivia questions for a reward of five chips for each correct answer.

The Commercial Art cluster spread the yuletide spirit through creativity. Teacher Vic Ashley had his students design and print Christmas cards and create three-dimensional gift boxes.

The cards sold in the student center at \$1.50 for a bundle of ten, while the boxes were either placed on display or used for gift wrapping.

On the humanitarian side, Michelle Bobadilla's fourth period English as a Second Language class prepared gifts for Lakewood Elementary's fourth grade students. Loaded down with the presents, the entire ESL class drove over to the school and spread Christmas cheer during fourth and fifth periods.

Whether they were partying, printing, or passing

out gifts, students found ways to express yuletide spirit and joy sharing the two-week holiday vacation.

-Kevin Tucker
-Tina Vielma

Making ends meet

Working hard to finish her three dimensional gift box, freshman Emma Velasquez cut, pasted and stapled diligently in order to finish before the two week holiday. Her two periods of AM Commercial Arts pre-cluster allowed her time. Photo by B. Davis.

All together now

At a Christmas party for new silhouettes, juniors Kathleen Bert, Shelly Brody, Mindy Hilsber and Angie Bohne imitate graduating senior silhouettes. This charade-type game was a traditional happening at silhouette induction parties. Photo by L. Oliver

When you care enough

Trying to get the most out of the Christmas spirit spreading around, the Commercial Arts cluster designed and printed hundreds of Christmas cards. The cards were sold the week before Christmas vacation at \$1.50 a bundle. Photo by M. Tomlinson

F Christmas celebrations left students eeling tops

"Only five more shopping days until Christmas . . ."

Since students were let out only five days before Christmas, last minute shopping was the top priority on students' lists. Crowded malls, ridiculously long cashier lines and totally inexperienced salespersons were the horrors students had to face but sometimes opted to escape.

"A lot of my shopping didn't get done because I didn't feel like waiting in long lines for hours," junior Sabrina Fletcher commented.

For many students a

quiet evening at home decorating a tree and sipping hot apple cider became the preferred opposition to a long day of shopping.

"As dumb as it may sound, I really enjoyed making Christmas cookies and decorating the tree," said senior Leanne Ivey.

As for the day of celebration, there were many variances as to when presents were opened. Some students and their families stayed up til midnight and then attacked the tree, while others waited until Christmas morning to do the same.

"We usually open gifts at night because my dad takes a

lot of pictures and we don't look so hot at 8 in the morning," said freshman Greg Myers.

After opening presents, many students and their families attended a morning mass or service at their churches. One student who encountered a bit of a problem was senior Sharon Rybarski. While at church, her Christmas tree lights started a small fire.

No matter what students did in celebration and preparation of Christmas, idleness was not prevalent as it usually was in other school vacations.

The joy of giving

Principals, teachers, clerks, custodians and students donated money, food, toys and a Christmas tree to custodian Paul Peel in hopes of easing the affects of a family tragedy. In the auditorium, Peel, father of five, was presented with the gifts on the Wednesday preceding the Christmas vacation. Photo by J. Babb

Final seconds

Rushing to get a last minute gift for his girlfriend, junior Armando Villarreal debates with junior Sherry Curtis on whether to buy a Gizmo or teddy bear. Villarreal and freshman Raul Ruiz stopped into the Bolen's Hallmark shop at Redbird Mall as a last resort.

Something missing

As part of the committee mandated to decorate the school Christmas tree, seniors Doug Groom and Angela Barnes try to figure out what is missing from the tree. Clusters and organizations took part in placing their representative ornaments on the tree.

Finishing touches

Trying to straighten things up, freshman Sandy Irwin fixes some of her homemade Christmas tree decorations. She spent the first few days of the vacation sewing and gluing ornaments for the family tree. Photo by D. Burris

WHAT CHRISTMAS MEANS TO ME...

LOVE - that's what lies beyond the name Christmas for me. It means the love of God in sacrificing His son to give me a reason to live → JESUS. It means that there is no longer fear of death or evil, because His perfect love has come to rule and reign in me. It means that I can love others because of the joy He has brought to my life—no more loneliness, no more fakeness, no more pain. It means that because He revealed His love to me on that first Christmas (not on the first X-mas), He is real.

-Liney Abraham

Off the wall

Topping things off

Putting the finishing touches on the family Christmas tree, senior Laura Gomez places an angel atop the tree. She and her family bought the tree one week before Christmas to insure enough time for decorating. Photo by D. Burris

Yawning away time

Sandra Henderson sits in boredom as she serves her time in in-house suspension. In-house was one of the things students did not like about the disciplinary system at Skyline. Photo by L. Strother

Off the wall

You don't have to prove yourself to anyone. You know who you are and what you are capable of. Live your life, be yourself and most of all be human.

How to do this:

Reduce stupid and unnecessary tension between racial groups. People can live without wearing a tag and work more efficiently as a unit when they drop their all-too-often self-inflicted prejudices.

Reduce ignorance and stupid attitudes. Lack of knowledge about certain practices or concepts makes people uneasy. Instead of becoming educated, they cast it out or condemn it as "taboo," "unorthodox" or "immoral."

Increase communication. Communicating with other human beings frees people of social stereotypes and ignorance. People should be able to come up to someone and say "Hey, I've got problems" or "We need to discuss this."

Act maturely. One of the roots to most teenager problems is immaturity. You want to be treated like an adult but you don't want the responsibility that goes with it.

Do away with "macho man" stereotypes. Guys, you're basically scared little boys, masking your vulnerability to prove your worth. To who? Other scared little boys who have nothing better to do but play silly little games? The macho man belongs in comic books, leave him there.

-Leo Martin Landin

Peeves and complaints

Student life

Stirring up trouble

Barbara Owen is wearing the latest fad, stirrup pants, as she stands and talks with her friends in the student center. Stirrup pants caused controversy as they were allowed by the dress code and sweat pants were not allowed. Photo by L. Villarreal

Lining it up

The lunchroom was the topic of many students complaints. These ranged from students objections about the taste and quality of the food to the disappearance of salt shakers to the long lines that had to be endured. Photo by L. Villarreal

H Students had complaints and wanted to and them over

Nothing in this world is perfect. Everything has its little faults. Skyline is no exception. Students had complaints about their school, ranging from minor peeves to severe problems that had to be dealt with and corrected.

Problems started as soon as people began to arrive at school. The Forney Road parking lot provided a reason for complaint. The closer it was to 8:30 seemed directly proportional to the length of the line waiting to get in. On some mornings, one could expect a 15 to 20 minute wait. In the afternoons, it was the same wait but in reverse.

"The parking lot is a disaster. They should use both gates for exiting and entering or get a better system," muttered Chris Bone. "It is ridiculous and it makes everyone late for class."

Once inside the building, the complaints started

all over again. Students had problems dealing with teachers, principals and other students.

As with any large group of people forced together, conflicts between groups, cliques or just types were inevitable. "I can't stand the way some people here just constantly intrude in your life. It's none of their business and they have no right to gossip about it," said sophomore Monica Crenshaw.

Criticism also mounted about different areas and policies of the school. Students moaned and groaned about the lunchroom and smoking center, wanting them cleaned up and better conditions generally.

The rules, as always, were also attacked. Hall monitors stopped everyone, demanding passes, wanting to know where and why each

student wanted by.

"I hate the smoking center. It's a dirty place and it's usually the first place visitors see while visiting Skyline. Something needs to be done about it," said senior Don Burris.

"The hall monitor situation has gotten out of hand. I should be able to use the phone in other buildings when the ones around the student center are out of order during my lunch period," griped senior Doug Ware.

Although students had misgivings about the school, the policies and the people, most had to admit that Skyline did have its good qualities, too, and in most cases the good outweighed the bad. The 2,000 that chose Skyline as their school proved that.

-Dee Geiger

H Spring weather was perfect for aving a picnic

The warm moist breeze ruffled the hair of everyone in the smoking center. The chirping of birds, yells of encouragement and the discouraging clang of the tardy bell punctuated the air, telling everyone who lingered to the last second that spring was here and that they were late to class.

After a not-so-long or severe winter sojourn, signs of spring gladdened the hearts of all students. Spring weather made everyone think of the weeks to come as being much shorter and of a long summer of swimming, sunning and playing.

"When the weather is just right, it's a shame to be inside. I wish I could go out and play tennis, football or just anything on a day like this," freshman Trisha Clemons said.

Spring weather brought out the toys of teens—frizbees, footballs, baseballs, and, of course, cars with tops or windows down and radios issuing forth a blast of one's musical preference.

"On weekends, I go driving with the windows down to catch some sun and later play some tennis with some friends," junior Cathy Wright said.

Favorite activities varied. Laying out and getting back into swimsuit shape became top priorities. No one wanted to bare fish-belly white skin for the world to see so getting a tan became an essential.

"The thing that comes first is getting my tan. I go out to the lake and lie out for hours," junior Beverly Holubec said.

Thoughts of summer jobs, vacations and getting ready for college became primary worries.

And thoughts of mom's turned to spring cleaning. Yard work, cleaning win-

dows and other assorted chores became duties to be performed before quick exits could be made.

"I know it's spring when my mother says, 'It's spring cleaning time'," said freshman Debbie Durden.

Even with the onerous chores facing them, spring was a happy season—one most longed for.

-Debra Villarreal

Playing it cool

Colorful cottons and linens started appearing as early as February as students awaited spring. Freshman Melissa Jackson shows her taste in plaid spring dresses while chatting with her friends in the lunch line during "B" lunch. Photo by L. Villarreal

An apple a day

Sunny spring days were a perfect opportunity to enjoy the pleasant weather, lunch, and work on a tan during school. Seniors Amy Williams and Patricia Rosales enjoy each other's company during "C" lunch while eating apples from their sack lunches. Photo by L. Villarreal

Out to lunch

One way to avoid eating in the cafeteria was to eat outside as freshman Chris Miller did. The consequences for such mischievous deeds were licks or in-house but that threat didn't stop Miller from enjoying the outdoors with his friends. Photo by L. Villarreal

Take it all off!

The dark bronzed tan was what many placed on their list of top priorities for summer. Senior Robin Wright gets a head start on his tan by showing off some muscle and catching some rays while chatting with some friends. Junior Tim Shaw found it easier just to reveal his muscle shirt which was a violation of the dress code. Photo by R. Kemp

Scrub-a-dub-dub

Washing the car was just one of the many things that people did for spring cleaning. Freshman Justin Hamilton does just one of his many chores assigned to him by his parents. He elevates this task by chewing gum and listening to the radio. Photo by R. Kemp

Sunny highlights

Putting on the Foster Grant shades and adding some summer highlights to hair were just a few things students did in preparation for summer. Junior Robin blackwell and sophomore Missy Belt enjoy the warmth of the steps as they catch up on homework and enjoy the weather. Photo by L. Villarreal

The atmosphere of the Valentine's dance had students

Arm in arm

Gathered in the center of the cafeteria on Valentine's Day was a hoard of smoldering dancers showing the latest in moves and out-fits. The purpose of the event was to present the favorites winners for each class but many students just went to hit the dance floor and see who was with who.

The journalism department used the dance to reveal the favorites while the Senate come up with the Heart-to-

Heart theme for the evening.

Having the best of two worlds, students were able to joke around with friends and be seriously romantic with their "special someone."

"The few slow dances that were played gave my boyfriend and I a chance to snuggle up and be romantic," said sophomore Virginia Benavidez.

Due to the fact that a date was not a prerequisite for the dance, couples were not in

the majority. Rather, odd groups of girls and guys headed for the dance floor with little care as to who was whose dance partner.

"The dance was pretty laid-back in that it was perfectly alright for me and some of my friends to get out and dance together," said senior Deidre Franklin.

When the cafeteria commotion became too much to handle, students were able to buy a drink and head out

for the courtyards or student center to relax.

When the clock struck 11, teachers and principals began clearing the dance floor. The only comfort students received as they left was the reminder that one more dance, the Bash, would be coming soon.

-Tina Vielma

The Wave

Not wanting to get out onto the smoldering dance floor, senior Michael Gipson starts doing the wave along side the cafeteria. Photo by J. Babb

Takin' a breather

Because the dance was so lively, many students often took breaks. Cokes were sold for 25 cents and benches were set aside for students to rest on. Although the dance was scheduled to end at 11:00, it wasn't until 11:30 that all students had left. Photo by L. Villarreal

Into the groove

Really getting into the music, freshmen Daphne Fullmigher and Anthony Wilson dance on the periphery of the proposed dancing area. Because the center of the lunchroom was filled with dancers, other rhythmic students on the sidelines began dancing in their places. Photo by D. Villarreal

Rhythm of the beat

Trying not to let the evening get away, freshman Guadalupe Cervantes dances song after song. She arrived at the dance near 8 p.m. and waited until the final moment to leave. Photo by L. Villarreal

Prepping

Keeping busy on the dance floor, seniors Ervin Powell, Maury Agent and Deon Jones dance the Oaktree. At the dance, groups of individuals often gathered together to choreograph new dances. A crowded dance floor didn't keep students from getting into the groove of things. Photo by J. Babb

Face to face

Showing the true meaning of Valentine's Day, freshman Angela Kemp and her Samuel boy-friend Kelly Harley dance to one of the many slow songs played on the night of the Valentines dance. Before the dance, the couple celebrated Valentine's Day in their own way by eating out alone. Photo by J. Babb

Freshmen: *nominees* Alex Villarreal, Yen Tran *winners* Blake Autry, Heather Neal *nominees* Cynthia Leak, Raul Ruiz

Sophomores: *nominees* Terri Morrison *winners* Chris bone, Cinnamon Sheffield *nominee* Philip Polk

Juniors: *nominees* Jimmy Tucker, Melanie Edwards *winners* Tracy Day, (not shown) Angela Bohn *nominees* Elvis Moore not shown: Antonia Green

The announcements were a Thriller

Anxiously awaiting the announcement of the winner, the group of nominees stood before the gathered crowd. "...And the winner of senior favorite is..." With this, the hopes of two people came true while four other people were honored but disappointed.

This was the second annual Favorites' dance, held on Valentines day at 7:30 in the lunchroom. All class favorites and senior superlatives were introduced and then announced.

These winners included underclassmen favorites

juniors Tracey Day and Angela Bohne, sophomores Chris Bone and Cinnamon Sheffield and freshman Blake Autry and Heather Neal.

Senior Favorites were Sam Franklin and Jennifer Oten. Elliot Kennedy and Amy Kraft won friendliest awards. Angela Barnes and Matt Sanford were voted best looking. Most likely to Succeed honors went to Denise Golden and Paul Petersen.

Not all nominees were able to attend the dance. Junior favorite honoree Day was unable to receive his second favorite honors be-

cause he was involved in the state wrestling meet. Day had missed the dance the previous January for the same reason.

Most likely to Succeed nominees Marylyn Huff and Cris Asensio were at the Mu Alpha Theta convention in San Antonio.

Junior and sophomore nominees Antonia Green and Stephen Jackson respectively were also unable to attend.

-Dee Geiger

I'm so excited

Freshman Favorite nominees Cynthia Leak and Alex Villarreal happily clap for the announcement of the other class favorites. Photo by J. Babb

Seniors: nominees Steve Autry, Micha Whitley winners Sam Franklin, Jennifer Oten nominees Sheri Newman, Fred Adams

Formal fantasy

Attending the Homecoming dance at the Fairmont Hotel, senior Donna Shaw and her date Darren Bradley take a break from the dancing to sit down and look around. Photo by K. Tucker

Tables of girls

Freshmen Meg Holly and Scarlett Herring sit and eat lunch at the head of a table full of freshman girls who could have been the object of many fantasies. Photo by B. Davis

That someone special had people

Holding hands

"**T**all with blond hair and blue eyes," "long legs," "lots of hair," "rich," "has a good personality," "modest," "popular," "quiet," "shy," "intelligent," "older," "younger," "doesn't have braces," "dark eyes and hair," "soft, deep voice," "good body," ...

These were all ways people described their fantasy guy or girl. As with the saying "Different strokes for different folks," everyone had a different view of "perfect."

Many qualities were important in deciding whether or not a person was that "special one." These included the color of hair, eyes, height,

weight, body shape, personality and other things that varied from person to person.

"My fantasy guy would have to be older, dark hair and eyes, dress nicely, good personality but not stuck on himself, not too shy and not afraid to cry or show his emotions," freshman Deanna Cruz said.

In some cases, people had their fantasy in view but just out of reach. These included the many hopeless crushes that were started and ended everyday.

"He's tall, has a beard and moustache, sexy and debonaire. When I first saw him I thought he was no big deal, then I started seeing him

everyday, and I just turn to butter now whenever I see him," said junior Nicole Benson.

"I just love women. It's not lust or anything bad, I just like to be around all types of girls. I like to talk to them, be near them, just to be close to them," said junior David Garcia.

Everyone had a someone special in his life, secret or not. A little daydream about that fantasy guy or girl made it a little easier to get through the day. With Skyline's enrollment close to 4,000 people, there should have been a fantasy out there for everyone.

-Dee Geiger

Off the wall

Editor's note: This was written by a senior girl describing just one of Skyline's hunks. Names were withheld on request.

He's Skyline's BMOC. He's the dream of oodles of girls. I've often wondered why so many girls think he's attractive. After seeing him surrounded by females in lunch and witnessing attendance girls eagerly stirring up conversations with him instead of picking up the attendance, I decided to contemplate the big question. . . "Why are so many girls crazy about him?"

He may be cute, but I can't picture him on the cover of GQ. Maybe it's the way he dresses that allows him to transform into human flypaper. I have to admit, I've always liked his style but clothes doesn't make a man. Personality could be his magnetic force. Ask him a question and he'll do his best to help you. Other guys may brush away anyone who's not beautiful, but he finds time to speak with everyone. Of course, he has intelligence. Being in classes with him has made me believe that it's possible to be good-looking and brainy. What does he not have? I don't know the answer to that question, but now, I realize why flocks of Skyline girls are obsessed with him.

-Anonymous

Look of love

Having already found that someone special, seniors Chris Sanders and Lee Ann Ivey have a quiet talk outside in the courtyard south of the lunchroom. Photo by D. Green

Football fantasy

Fantasy guys included athletes too. At the Homecoming pep assembly, members of the football team lead cheers in place of the cheerleaders. Photo by D. Locke

Picking one out

Horticulture supplies a variety of floral arrangements for students to choose from. Mary Sue Croll sells carnations to Frank Lara. Carnations were sold for a dollar a piece and a quarter more for a ribbon. Photo by L. Villarreal

A little help

Doug Ware offers help to Cheryl Blair in filling out a Val-O-Gram. Val-O-Grams were sponsored by the Key Club for 50 cents, which enabled a student to give friends a cheerful message on Valentine's Day. Photo by L. Villarreal

The right one

Philip Cantu selects the right flower for a special person. Valentine's carnation was the speciality of the Horticulture cluster. Photo by L. Villarreal

Getting it straight

In order to make the floral arrangement perfect, Amy Powell straightens the ribbon on a basket. Horticulture worked hard to make students Valentine's Day full of flowers. Photo by R. Kemp

Putting it into words

Val-O-Grams helped students like Creshunda Moore express what sometimes is hard to say face to face. Photo by R. Jernigan

S Valentine's Day had students ending love

Cupid was busy stirring the hearts of students, as his arrow propelled love and happiness on Valentine's Day.

The Key Club, for the first time, offered students the opportunity to receive Val-O-Grams from that special someone or from a friend during second period classes. That period was filled with anticipation to see if someone cared enough to send the very best.

"I loved receiving Val-O-Grams from my friends but most of all enjoyed writing some to them so I could tell them how special they are," said junior Rosa Garcia.

Throughout all classes was the sweet smell of the flowers. "Receiving flowers

was really nice especially when they were unexpected," said junior Lottie Wilson

Horticulture supplied students with a variety of flowers at a price to fit everyone's budget.

Gifts of candy, proved the old Valentine adage, "... Sugar is sweet, and so are you."

"Valentine's Day is not just receiving flowers and candy but giving and sharing your love with others," said freshman Lavett Travis.

Bright red and white were the colors of the day as

students showed the spirit of the day festivities.

Through all the commercialism, students were able to see the true meaning of the day. "Valentine's Day is not just receiving candy and flowers but giving and sharing your love with others," said freshman Lavett Travis.

"The best way to spend Valentine's Day is with your family. But you shouldn't forget your friends," said junior Jaime Villela

The mood of the day, set by Valentine cards to flowers which abounded, made it practically impossible to end the day with a frown.

In touch

Kennard Bowen and John Bowdich are two friends who enjoy each other's company. Talking and being able to listen are two of the traits that make a relationship. Photo by A. Williams

Cheering on

At a football game, two close friends like Heather Bean and Stephanie Martin know how to cheer their team on. Photo by D. Burris

A variety of relationships gave students Just ducky

The ability to relate with others is important to all students whether a boyfriend or girlfriend, brother or sister, mom and dad or teacher and other classmates.

Students are better able to relate with someone who faces similar problems and situations that only a friend could understand. "I can always count on my best friend to be there, and I'll always be there for you," said junior Elena Hernandez.

Honesty, forgiveness and wittiness were some qualities that make a friend. "Patience, a good sense of humor and interesting are

only some of many qualities my best friend has," said junior Paula Nash.

After Mom yells "clean up that mess!" and dad takes away the keys to the car, it's a little difficult to be able to get along—much less be able to relate with mom and dad, but after the smoke cleared, students come to the realization that deep down parents love them. "Of course, we have our disagreements but I always can turn to my parents for help," said sophomore Joe Garcia.

Brothers and sisters came in handy. After all the agreements, they could be

quite dependable. "We have our fights and sometimes say things really abusive, but blood is thicker than water," said Nash.

Although students were not always able to understand teachers, in all their madness, teachers did care and tried their best to help students. "Teachers care. They have patience and realize that you're young and take that into account," said junior Evelyn Moats.

Each student needed a person to lean on, who ever it might be. These friends were the people that would understand.

Someone to lean on

Lisa Chakmakjian and John Jones are able to lean on each other. Whenever one is down, there is always the other to cheer him or her up. Friends like these are cherished. Photo by D. Mann

Off the wall

I like my parents. Yes, as strange as it may sound, I actually like my parents. Sure you might find a few students who will tell you they think their parents are "okay", but I have a special relationship with mine.

My relationship with my mother and father is based on mutual trust. My parents feel that I have learned from the mistakes of my two older sisters and won't be stupid enough to repeat those mistakes. I know that I can go to my parents with any problem and I know that they will try to understand, but in return they expect me to see things from their point of view.

Maybe if more students would try to open up to their parents they would learn something about themselves and find new friends in their mother and father.

-Dayna Laster

All smiles

Friends are very important, they not only share in your good times but they also are there when times are tough. Cecilia Hookins and Leslie Renagar show that they will always be there for one another. Photo by W. Woodruff

Getting it together

Eight hour day had students wanting to

Leave it behind

Working 9 to 5. . . no, that's 8 to 4. To many students, being in school over seven and a half hours truly constituted a full working day.

For instance, sophomore David Amri awoke at 6:30 a.m., dressed, ate breakfast and arrived at school by 8 a.m. The next eight hours of the day were filled with fighting hallway traffic and con-

sulting with supervising mentors—teachers. When 4 p.m. came around, Amri was more than ready to head for home and kick up his heels. But, he had to first face the "Skyline rush hour" in the streets and parking lots surrounding Forney and Chariot roads.

"Working at Safeway gave me the spending money I needed for movies, dates and clothes," Amri said.

All work and no play was not the motto Amri tried to live by. He realized, along with other students, an eight hour working day at school had to be cushioned with some other form of entertainment. Whether at an afterschool job or on an outing with friends, Amri somehow drew the strength to wake up at 6:30 a.m. the next morning and begin again.

-Tina Vielma

Time to go

On their way to another photo assignment, seniors Shreill Callahan and Belle Collins walk through the hall toward the student center. The student center offered the photographers various people, groups and scenes to be shot. Photo by J. Davis

Start of a new day

Catching a bus to school was something freshman Tin Nguyen became accustomed to. Although Nguyen lived near the school, he still had to be at his bus stop by 7:20 a.m. in order to arrive at Skyline by 8:00 a.m. Photo by D. Locke

Looking good

Looking good throughout the day required a few touch-ups between classes. Junior Angela Brown does a little retouching before going to her next class. Brown was lucky to have a mirror all to herself for that was a rarity in girls restrooms throughout the school. Photo by A. Williams

Yuk

Paying attention to every detail, junior Keith Minor and seniors Richard Gardner, Rhonda Houston and Dameon Fisher carefully dissect a cat in their sixth period anatomy/physiology class. They had looked forward to the dissection but when the time came, they found themselves somewhat disgusted. Photo by A. Williams

Go fish

Taking a break from the long lunch lines, freshmen Kim Leon and Alyssa Julien play a game of Uno. They both felt playing the card game was a lot more interesting than sitting around doing homework. Photo by L. Strother

Tragedy at the **CAPE**

Tuesday Jan. 28 dawned a perfect day for a launch of the Space Shuttle Challenger. Everyone who turned out to watch realized that this launch would be different because it carried the first teacher in space, Christa McAuliffe.

No one realized, however, just how different this launch would be.

As watchers at the Cape cheered, the shuttle rose from the launch pad at 11:38 a.m. Eastern Standard Time. 72 seconds after take-off, the main fuel tank burst into flames, and the Challenger, 10 miles high exploded. Flames were visible between the orbiter and the rocket booster. Many watchers, seeing these first flames cheered, thinking it was a normal part of the launch.

Experts have not yet pinpointed the exact cause of explosion, but they cite a probable defect in the fuel tank the rocket boosters, or a weakness in the fuel line as possible explanations.

NASA has temporarily suspended the Shuttle program following Tuesday's disaster for the purpose of determining the cause of the explosion and making sure that such a disaster does not occur again.

NASA held memorial service in Houston Friday, Jan. 31, for the seven astronauts, their family and friends. The services were attended by President Reagan and his wife, Nancy

The Coast Guard continued its search for debris that might answer the questions behind this disaster.

-Tracy Rutherford

Live coverage

Millions of Americans, including Skyline's computer cluster, watched as the space shuttle Challenger became the first spacecraft lost in flight. NASA held memorial services for the seven astronauts Jan. 31. Among those attending was President Ronald Reagan, who stressed the importance of America's continued involvement in the space program. Photo by F. Harris

American hero

Posing for this publicity picture, Sharon Christa McAuliffe from Concord, New Hampshire was to be the first teacher in space on the space shuttle Challenger. The Jan. 28 mission ended in death for the seven astronauts when the shuttle was engulfed in flames just 72 seconds after lift-off.

HELP

Helping others played an important part of club activities. Different organizations helped groups of people to serve a purpose and feel good about themselves.

One of the most noticable efforts to help others was sponsoring a Mexican Earthquake Relief Fund where Spanish club members asked students to contribute money during homeroom. Raising a sum of \$643.36, the money was sent to Mexico to help restore homes and provide food for the helpless. "It feels good to help people who are less fortunate than ourselves because it makes me feel like I've done my part to solve the world's hunger problems," said junior Eric Stover, "I was surprised when our

homeroom wasn't able to give more to the relief fund. I contributed and encouraged others to do so."

In addition to raising money for a relief fund, the Spanish club adopted a family for Thanksgiving and Christmas. Sponsor Ramon Arguelles and several members of the club purchased nutritious foods to make a needy family's holidays more enjoyable.

-Lisa Kahanek

Money hungry

Money for the Mexican Earthquake Relief fund was not only collected during homeroom, but the Spanish teachers asked students to donate money during class as well. PARK

Saturday football games were a new thing this year. Although many students really enjoyed the Saturday games, there were still those who hated it. The band, drill, cheerleaders and football players almost all unanimously believed that their weekend was stolen by the event. On the other hand, average students felt it was an extra social event for them.

"Saturday games did not affect the attendance at all," commented Principal Gene Golden. Many parents really liked Saturday games just as long as I came home," commented drill member Kimi Lowery.

Being for or against Saturday games didn't really matter. New state law required limiting school night activities. Thursday night games were just another thing of the past.

Star bright

Choosing architecture as her area of interest, sophomore Kevelyn Miller works on one of her architecture projects under a star used to inspire ideas. First year students not only worked on design presentations, but they worked with model building and free hand drawing as well. Photo by T. Vallier

STAR

Sophomore Lynn Smith sat at her desk, trying to figure out how she will finish her floor plan before the deadline that was given to the class. Her mind boggled with so many ideas that she couldn't narrow them down to just one.

"When I'm sitting here and I am interrupted by something, it disrupts my chain of thought. I just look up at the star and think of being successful and all I can be," Smith said.

Smith finally decided on her idea and finished her floor plan. The star she described and that served as her inspiration was suspended over her desk. It represented just one of the many cliches that most people hear at one time or

another, but to her and her classmates in beginning architecture it meant more.

"Reaching for the stars" was the theme for first year architecture classes. "The process of architecture is to develop ideas," said teacher Tom Cox. This is why he started the year off by giving his classes a theme. "It brings out their creative ability and allows them to develop an idea and just run wild with it," Cox explained.

"Reaching for the stars means trying to be the best you can be in all things," Cox said.

Students reacted positively to this theme. Cox said, "they liked the idea of being imaginative."

"It's a good theme for this class, because Mr. Cox teaches us to do our best on each project," said sophomore Maurice Moss.

-Mark Harris

TEST Put to the

Tests, tests, tests. Educational reforms introduced the TEAMS test for students to graduate and a competency test for teachers to keep their jobs. Also, the DISD piloted its "survey tests" to see if the right material was being taught and learned in the classroom. In 1987, it will count 10 percent of a student's semester grade.

The survey tests reviewed the state's "essential elements"—certain items which must be taught each semester in language arts, math, science, social studies and health. "The test is sort of spot-checking," said counselor and test coordinator Sylvia Valle.

Bob Grobe, executive evaluator in test development for the district, said the survey tests came about because of two problems: different grading standards among schools and among teachers. "An 'A' student in biology

might transfer to another school and get a 'C'," he said. "The tests are an effort to bring about some kind of solution."

The tests were given only two weeks before final exams. "Ideally, it would become part of the final exam or a standardized final," said Grobe.

In upcoming years, the tests will count 10 percent of the semester grade

and the final exam 15 percent. "I think it will give students a chance to improve their grades," said English teacher Barbara Larabee.

However, she said, "I regret we spend so much time on testing. I think the tests get redundant."

"Testing seems to be the name of the game now," said Grobe.

ART

More than just

For two hours on the night Feb. 4, the architecture cluster was transformed into something resembling a music video. Students and parents, gathered for the CDC Open House, crowded into room G-16 as the surrealistic sounds of rock group Pink Floyd filtered through the conversation. Dominating this scene was a large piece of graffiti—laden black plastic sheeting on which was scribbled two words—**The Wall**.

Behind the plastic sheeting was, naturally, the back wall of the classroom. Using latex paint and masonite, the second-year cluster students made it into a montage of famous structures, including the Eiffel Tower and the St. Louis Arch. Previously, the wall had been painted with architectural graffiti surrounding a mushroom cloud. In the

words of cluster teacher Robert Batson, it was "rather depressing, to say the least."

Each student submitted his own original design for the wall, but the finished product was chosen by Batson. He admitted, however, that he incorporated ideas from three of the students into the final concept. Authur Ogle, one of the three whose design was used, considered the wall to be representative of an "ideal city". Ogle also praised Batson, saying he had a way of "pulling out those qualities in us that we might not express on our own."

All in all, more than 40 people attended the "grand unveiling" of the wall, presided over by Principal Gene Golden and Assistant Principal Charles Tuckey. When it was all over the general reaction was that of satisfaction with a job well done and pleasure with the design. As senior Brad Perkins said, "This really gives the room a new look!"

-Kevin Tucker

A new look

Admiring the drastic change to the back wall in the advanced architecture cluster room, first year students Frank Hernandez, Randy Duffy and John Moss wait for the presentation of The Wall. After two weeks of anticipation and advertising for The Wall, the architecture cluster finally revealed the dramatic change to the students during Open House for the Career Development Center. BREAK

PAST

No way to get

"Young lady, where's your hall pass? Young lady . . . come back here!"

This phrase resounded from the halls during much of the school year. Whether rushing to class, going to the counselor or walking to the bathroom, students were continually being questioned by the numerous hall monitors stationed at the various points around the school.

What purpose did these hall monitors serve? To most students, they were merely an inconvenience. "I think that it is stupid for the hall monitors to stop students in tha hall," said junior Lucia Munoz, "it just makes them that much later to class."

Other students were not quite as strong in their opinions. "I think that the hall monitors are necessary, but they could be a little more lenient," said junior Dayna Laster.

The official reasons for using hall monitors were quite clear. Cutting down on traffic in the halls and reducing noise in the halls were two of the prime ones. The major justification for the policy, however, was to cut down on the number of students cutting class.

Despite these good intentions, the hall monitor policy has at times been more trouble than it's worth. Students continued to look upon the monitors as symbols of authority and associate them with constricting school rules.

FAST

Central made

Dallas got an early Valentine's present when the state highway commission lifted its opposition to the widening of Central Expressway from six lanes to eight.

The commission, which preferred a

Pass please

Part of a teacher's responsibility was to serve hall duty. Many students found that teachers took this duty seriously as geometry teacher Mary Morse stops senior Walter Bolton to ask for a hall pass. Bolton claims he was only running an errand for his teacher. Photo by L. Strother

plan to double-deck, tentatively approved the widening plan, Feb. 13.

The new plan would widen and improve the flow of traffic through North Central Expressway and decrease the normal 13 hours congestion period to a 6 hour period. Central, which opened Aug. 19, 1949, had born the brunt of criticism for years.

The new plan would widen Central and called for placing a railline below it from downtown to Mockingbird Lane.

Relief would not be immediate. The plan was projected to be in construction until sometime in 1995.

Crowded freeways were a common occurrence for travelers on Central Expressway. People had to leave earlier than usual to make it to their destination on time. Widening of the freeway is planned to help solve the traffic problems. Photo by T. Vallier

TOP

What was on

What people were doing, watching and reading in 1985 varied but all time favorites were easily recognized.

Back to the Future was the biggest box office draw, grossing \$190 million.

For the stay-at-homes, *The Cosby Show* was the show to watch although it didn't beat out the Super Bowl (in New Orleans with the Chicago Bears blasting the New England Patriots, 46 to 10), the most watched single television event.

Keeping ears busy for *The Boss*, Bruce Springsteen who raked in \$117 million on concert tour. Springsteen's *Born in the U.S.A.* was the best selling album of 1985.

Readers found their time occupied with James Michener's *Texas*, an epic timed to coincide with Texas' sesquicentennial. While historians argued its faithfulness to history, readers made it the year's biggest seller.

KILL

A pill that could

The shock and fear that Tylenol users experienced in 1982 over Cyanide poisoning was once again felt when a New York woman died after taking extra strength Tylenol capsules,

The wide spread threat of potential cyanide poisoning lead Johnson & Johnson, the maker of Extra-Strength Tylenol, to recall all capsules and make the decision to discontinue making capsules because they couldn't make them tamper-proof.

Johnson & Johnson unveiled the new Tylenol caplet which they hoped would replace the capsule. The caplet is a capsule-shaped pill that is coated to make it easier to swallow than a regular pill.

SALT

Not worth its

The end of January brought the removal of salt from the cafeteria.

Director of Food Services Marjorie Craft issued a request to school dieticians saying that the United States Department of Agriculture had found too much salt in the DISD lunch programs. She said that steps might be taken if the amount of salt was not reduced.

The school district decided that it would be easier to remove the salt shakers from the cafeteria than change the recipes to eliminate excess salt.

"We're not trying to take salt away completely but merely trying to reduce the amount teachers and students consume," said dietician Lucille Walker.

The removal of salt is not the first dietary change to come to DISD. Four years ago, whole milk was replaced with

Adding flavor

Senior Richard Gardner takes advantage of having salt available in the cafeteria by adding flavor to his french fries. Although salt was removed from the cafeteria by the end of January, rations of ketchup were reduced to two packets per order instead of the usual pump. Photo by L. Oliver

Cream of the crop

low fat. Two years ago, the salad bar was opened. Finally, last year, fresh fruit was offered.

Students enjoyed the salad bar and fresh fruit, but were not so happy about

the removal of the salt.

"We try to give the students a wide variety of foods to choose from so that they meet some of the recommended daily allowance," said Walker.

-Tracy Rutherford

MAN

The job fits the

How did one man handle the responsibility of handling 4,000 teenagers, a staff of over 300 and learn his way around an 80 acre campus all at one time?

While specific duties and areas were delegated to assistant principals, Gene Golden was responsible for the entire operation of Skyline High School. Assistant principal Dwain Dawson condensed Golden's job into five specific areas. Golden had to see that the academic program achieved what it was planned to while watching that the budget was followed. Golden also had to obtain the teachers to teach the academic courses, and coordinate the administration and teachers. And lastly, he had to maintain discipline and coordinate all happenings at Skyline.

The enormity of Golden's job was summed up when assistant principal Jerry Holley stated, "As far as I'm con-

cerned, he was the only one who could have taken the responsibility of running this metropolis."

-Mary Fitzpatrick

Main man

Once a principal at W.T. White but now at Skyline, Gene Golden settles in his new office. Golden was responsible for a lot of things but the hardest part of his job was overseeing all the responsibilities. Photo by J. Lopez

Game parties a DUD

While it was party time for some, many students were disappointed by the after-game parties this year.

"Good parties require lots of people and it (the after-game parties) was lacking that," said junior Nicol Nichols.

Two after-game parties were held at Footloose, a teen club similar to Fast Times. The first one was open to the public, which didn't appeal to many students: but the second was made private in hopes of higher attendance. Still, many students found hotel parties more exciting.

To the surprise of many students and faculty members, a letter was sent to parents concerning the gatherings at hotels.

Neither Student Activities Coordinator Jerry Holley nor Principal Gene Golden scrutinized the letter before it was sent out. "It caught us off guard," said Holley.

The letter created controversy among students and parents.

"I was insulted," said senior Stephen Johnson, "it put a strain on some parents trust."

Despite the widespread diversity of

opinions the purpose of the letter was summed up by parent Judi Liles. "Our intention was love and concern, we weren't out to hurt anyone."

-Julia Barton

in making black history week a success. Twelve were responsible for making the actual contacts with community leaders. Twenty were involved in hosting and greeting the guests as they arrived. In addition to that students from Rickie Rush's drama classes performed various skits and play's such as "A Raisin in the Sun," and "The Prodigal Son."

"There was more students involvement than ever and because of that, this year's black history week was the best ever," said Evelyn Sims, coordinator of the event.

And so you see

Many guest speakers visited various classrooms as a part of Black Emphasis Week. Speaking to a study hall, Sargeant Lang talks about the Marine Corps and why it is an honor to belong to such an organization. Photo by D. Green

RISK Not worth the

Senate Bill 550. Just more legislative bull that wouldn't affect you. Just some more stupid adult bills on taxation or something equally as boring. Right? Wrong.

This sneaky little bill that became law in Sept. 1985 could create havoc with many a teenager who thought it was cool to go out and have a few before cruising the streets of Dallas. If he were caught—not only was he in trouble with his parents and the law—he would automatically lose his driver's license for a year if found guilty of driving while in-

toxicated.

What S.B. 550 said was that juvenile judges shall order the Department of Public Safety to suspend or deny the teenager's driver's license if he was found to have violated 1) the state laws regarding driving while intoxicated or, 2) the laws forbidding the use, possession, manufacture or delivery of controlled substances or marijuana.

All this meant that a teenager found guilty of selling or possessing any kind of illegal drug would lose his driver's license—or if under age, would not get it for an extra year.

Now it seemed, having a little fun with friends could carry some pretty big penalties. It would be up to teens to decide if it were worth the risk.

Things that go BUMP

Good preparation for days of working on homecoming floats was what ten members of the senate got when they built the red and pink tissue paper covered heart for the Favorites Dance.

The heart, an arch for the favorites nominees to walk through, was constructed by the senate, who also hosted the dance.

"It was our contribution to the dance," said senior Paul Peterson.

The heart was constructed of wood covered with chicken wire. Colored tis-

sue paper was placed through the wire to give the appearance of flowers from a distance. The heart cost approximately \$150 to make. It required three nights at Steve Autry's house, with about 10 senate members working three and a half hours each night to complete the heart.

The senate planned that the decoration would continue to be used in the future. "The intent was that the school could keep reusing the heart year after year," Peterson said.

Have a heart

Holding part of the tissue paper heart that the senate made for the Favorite's dance, student body president Paul Petersen prepares to unload it from his El Camino. The senate made the heart with chicken wire and lots of tissue paper. This decoration served the purpose for the favorites to walk through as their names were announced at the dance. Photo by D. Mann

Giving and seeing RED

For the first time ever, the senate sponsored a blood drive as one of its many service projects. The blood drive was held Tuesday, March 25 in the auditorium.

The drive lasted from 7 a.m. until after school. The giving spirit was rein-

camated when the school raised over 200 pints of blood.

"Skyline is an excellent school and it has excellent students and teachers. This blood drive proved just that," said junior principal Jerry Holley.

To donate, students had to be 17 or older and weigh at least 110 lbs. If you were under 17, parental authorization was required.

something else on their minds: The Junior Olympics.

Lanell Buckley received a letter from the Junior Olympics, sponsored by the AAU, to participate on their track and basketball team. "I was thrilled when I received the letter," said Buckley. "I'm depending on the expo-

Blowing his own HORN

What does junior Danny Allen have that other Skyline band members don't? Allen was chosen for the Skyriders, a nationally acclaimed drum and bugle corps. The Skyriders have different training camps that one must attend to become apart of the highly rated corps. Attending the training camps is only one of the many requirements which include: being between 16 and 21 years old, paying a fee of \$450 for instrument rental and tour fees and being dedicated and hardworking musician.

The corps practices all day long in the summer and then goes on tour around the United States, playing at different stadiums.

They return to Dallas in the middle of August. The Skyriders Drum and Bugle Corps is rated one of the top ten corps in the nation.

-Keishla Moore

Good news in MAIL

When the majority of students think of summer, the sea, the sun and the sand cross their minds. There are a few exceptions to this rule. A select few have

sure and experience to get me a four year scholarship."

Camellia Bowen received a letter at the same time requesting her to be on the basketball and volleyball teams. Though she is not positive she will participate in the Junior Olympics because her career goals lies elsewhere.

Gimme a

BREAK PLAY

More than child's

Fifteen years ago most current students had never even heard of the high school they would eventually attend, but for some, it was already a part of their everyday lives.

Kristina and Karin Murphy, Sandy Irwin, Robert Berry and Mike Gumpert spent each weekday as preschoolers in the child care cluster.

"I remember our favorite thing to do was to play dress up," said the Murphys. "They kept the clothes in a big plastic frog over by the make believe kitchen."

"We used to always go on field trips," said freshman Irwin. "We went to the farmer's market on a bus one time. Back then, it was really neat."

"I always played in the sandbox and made tunnels for my cars," said Karin Murphy. "We had tricycles and we always rode to Forney and back. It seemed like a long way back then."

"I used to hate it when we had to take naps and eat tomato soup for lunch," said Kristina Murphy. "Now I love tomato soup and would do anything for a nap right around fourth period."

"One Christmas we put on a show for our parents. We had to practice everyday and we made Silhouettes of ourselves to give them during the show," said Irwin.

"We were flying kites and when it was my turn to fly it I dropped the string and the kite flew away," said Kristina Murphy. "I cried and cried and my little sister Karin was telling me it would be alright. It's really funny when you think about it now."

"I loved preschool," said Karin Murphy. "It was fun and it brings back a lot of memories."

"If I had the chance to live that part of my life all over again, I would take that chance in a second," said Kristina Murphy.

-Anitha Nair
and Kristina Murphy

Playing around

It was not unusual to see 3 or 4-year-olds running around campus since they actually attended high school for the Child Care cluster. Seniors Robert Berry and Cheri Liles were just two of the many that attended preschool in 1972 and were later reunited as seniors in 1986. Photo by R. Berry

Leading the pack

Brains get the

Due to funding cuts, a series of scholastic competitions, better known as Whiz Quiz, may be cancelled. The organization's sponsor Gary Atwood said that is it a really great organization to participate in and the need for mental muscle rather than physical muscle offered a chance for the non-athlete to compete.

Channel 8 cancelled the show earlier in the year because they said the show did not have high enough viewership. Many other people said viewership was low because it did not have a set time to air.

Last year's Whiz Quiz team won the national competition held in Dallas. Team members were captain Richard Bacon, Ian Holdaway, Zack Van Black and Shervin Dean.

-Keith Johnson

A winner's dream

Due to a lack of funds and low viewer numbers, Channel 8 dropped the Whiz Quiz show. Therefore, there was no Whiz Quiz team this year. Last year's team won the national championship at the National Academic Championship, held in Dallas in June. Photo by J. Babb

HOME

The band stayed

Once again, House Bill 72 restricted band from participating in Parade of Champions. Eligibility requirements were still in effect and if a student wasn't passing a class, that student would be excluded from extra-curricular activities.

The band couldn't participate in Parade of Champions last year because the contest was held on a school day. This year, the contest was held on a Saturday, but high hopes and a lot of practice couldn't let the dream become a reality. House Bill 72 still loomed over the students.

Many band members were upset over not being allowed to participate in the contest, but still others never attended the contest before, so they really didn't miss it. "I would have liked to gone to Parade of Champions, but it wasn't that big of a deal because I still have three more years," said freshman Jennifer Moore. "It upset me that half of the band was ineligible, but I think that if people really wanted to go, they would have passed all their classes."

CASH

Singing for

Money making. Some groups and organizations found other ways to raise money besides selling candy, popcorn or calendars. The band and choir received offers from big name companies to promote a particular product.

Following the band's act at Dr Pepper last year, the choir was asked to perform 7-Up's new jingle. On Jan. 9, all of the Limited Edition and volunteers from Choraliers participated in the 7-Up production to raise over \$1,000.

The choir members wore red cummerbunds and bowties which the company provided for those who didn't have any. In the show, the choir acted as the opening and grand finale of the production. Extra time was allotted for the students to eat dinner or pass time by studying, watching television, playing bumper pool or just socializing. "The

food wasn't that great, but the atmosphere made up for it," said Choraliers member Gloria Limas.

"I'm really glad that some of the Choraliers were allowed to go because it gave us an opportunity to get more exposure instead of just L.E.," said Choraliers member Kim Whitman. "The

actual performance went well also because everyone was real excited."

-Lisa Kahanek

Sing for the money

To raise some extra money, Limited Edition and volunteers from Choraliers performed for a promotional commercial for 7-Up's new jingle. The performance was projected onto a huge screen to emphasize the new song. Photo by C. Stokes

All a part of FHA

"A Choice With The Future". This was the theme for the Feb. 12th Career Day in Home Economics.

The purpose of this seminar was to expose all level students to individuals involved in a variety of Home Economic related careers.

Home Economics teacher Eleanor Rogers organized this even with the help of teachers Metzler, Virginia Blair, Thompson and Garza. "We want others to know that Home Economics is not limited to food, nutrition, clothing and textiles," Rogers said.

The workshops were conducted throughout the day and students were able to attend the ones of their choice.

Among the workshops were Wardrobe and Analysis. "The fashion workshop really taught me a lot of things about coordinating clothes in different ways," said junior LaSonya Jones.

Senior Rodney Tyson, attended a Dallas Power and Light workshop and found, to his surprise, that there are many jobs available in that area.

-Bridget Sims

You light up my life

New home stops COLD

It's a very cold winter day; especially in the guard houses on the parking lot with, seemingly, nothing blocking the wind from the North Pole but a thin corrugated tin wall.

This scene was to change as the construction cluster under the leadership of teacher R.A. Wigman, built new guard houses for the three school parking lots.

The houses were built to replace the old tin guard houses.

"The only thing separating (the at-

tendants from outside) is a thin layer of tin," said Wigman.

The new houses were designed to be cooler in the summer and warmer in the winter. The standard technique for house building were used with the only difference being size. They were wired for electricity, insulated and sheet rocked.

"It gives us more experience in this type of field," said sophomore Johnny Robinson. "When we get ready to get a job, it may help," he added.

A view to a building

Working on completing the security guardhouses, sophomore Dan Brown and Edward Mosley apply techniques that they have learned in the construction cluster to build the houses. Students were given this project after the construction teacher, R.A. Wigman had his hubcaps stolen. The new guardhouses will hopefully reduce theft. Photo by D. Green

A proud moment

Being awarded a medal at the February Academic Decathlon competition, junior Dan Blanton proudly accepts his medal from one of the judges. The overall scores at the competition put the team in fifth place out of 17 high schools.

Short of a WIN

Although the Academic Decathlon did not advance to the state championship at the February competition, they did receive medals and 13 awards.

The team members who competed in the competition were Biju Anthony, Julia Barton, Dan Blanton, Erica Britt, Deidra Franklin, Marylin Huff, Nancy Lawthorn and Anneke Schroen. These students prepared for competitions by attending meetings and taking numerous tests. Overall scores at the competitions put the team in fifth place out of 17 high schools.

"We should have beat the competition, but we didn't start early enough," said Blanton. The sponsor of this organization was Gary Atwood.

-Lisa Kahanek

BREAK

POP

To suck or not to suck, that is the question students found themselves asking when debating on whether or not to buy a lollipop.

When Principal Gene Golden warned the student body about the consequences of sucking lollipops at school, it seemed more and more students could be seen with a stick projecting out of their mouth.

"I don't really care what anyone says," said junior Chaundra Williams. "If I want to eat a sucker I'll do it anyway."

Most students didn't pay any attention to the rule, they just tried to hide their actions. "All I do is just take the stick off so no one will notice," said freshman Becky Bates.

The reasoning behind the rule to ban lollipops came after the French Club sold Le Pops as a fundraiser. The trash from the lollipops could be seen on floors all over the school.

"I don't like the idea of selling them (lollipops) because the trash usually ends up on the floors instead of in the trash cans," said assistant principal Jerry Holley. "If I could have it my way there would be no candy sales at all."

Along with the lollipop ruling came the threat that "unless the trash can be kept off the floor then candy sales will be stopped altogether," announced Golden.

"I don't think that stopping candy sales will solve the problem," said Williams. "People will just bring candy to school with them."

BREAK

HOT

Some like it

Waking up to their last day of freedom was not a refreshing thought to most of the 4,100 people that were to attend Skyline. The next day would bring summer to an abrupt halt and begin a new year of rules and regulations.

Many students chose to spend Labor Day out of town with relatives. "I went to see my grandmother who lives in the country," said junior Krissy Kountz. "My cousin was there and we had a good time."

Everyone liked to go out of town whether it was to the country or the city. The lake was another place people chose to visit. "I went to the lake to see my aunt and uncle. I enjoyed this because I don't get to do this all the time," said junior Tommy Tucker.

Seeing relatives was one way to spend the day, but it was definitely not the only way. Friends offered an alternative to relatives. "I had a party in our backyard," said junior Trisha Carney.

"It was not a real big thing, there were only about seven or eight people there, but it was fun. All it really was a small get together before school started." If worse came to worst and your friends left you and your relatives disowned you, there was always one thing there waiting for you. Work. It was not a thrilling thought to have to work on a holiday, but most found that it had its advantages.

"I worked from noon to midnight at Minyards," said junior Hayward Polk. "I could have gotten off if I had wanted to, but I figured why should I? I had nothing better to do. Besides, I got paid time and a half."

Working could be done on weekends and friends could be seen at school. This was the reason given by many for doing what they did best. Sleeping. "I slept until about 1. I got up and messed around for awhile and then I decided to go shopping. It really turned out to be just an ordinary summer day," said senior Anita McGruder.

Sophomore Cressida Henderson was another who chose to spend just an ordinary day at home. "I slept late and lounged around the house. I watched a

little television and basically did nothing."

Summer is gone now, and for one reason or another everyone was sad to see it go. "The thing I will miss most is watching my soap operas," said freshman Monica Sebik. "I was excited about starting high school, but I really wish summer could have lasted just a little longer."

This was the view that most freshmen took. Freshman Becky Bates said, "I was really excited about starting my first year of high school. I thought it would be fun and exciting. Now that it has been a couple of weeks and everything has had time to settle down. I find that even though it is fun and exciting it is still school with pesky teachers, rules and homework. I don't think it would kill me if I didn't have to come."

McGruder summed it all up by saying, "The thing I will miss most about summer is the freedom I had to do something when I wanted to do it. Now I have to get up early every morning, get dressed and go to school, and I don't have much of a choice whether I want to or not. I don't think I would call this freedom."

WALL

Writing on the

Black marker covered one door of the bathroom stall. Cult-like symbols and "anarchy now" sayings were scrawled haphazardly on the walls. Unfortunately such sights became more common as the year wore on.

Throughout the school there was an unsightly show of decline — not only in bathrooms but also in halls, classrooms and even in textbooks. Everywhere one looked was a distasteful exhibition of graffiti. It appeared students would be happier in New York subways.

"This shows a lack of pride and makes our school look sad," said Herlinda Martinez.

What should be done to culprits brought responses as varied as the graffiti itself. "The student should be forced to clean all the graffiti as an example to others," suggested junior Dayna Laster.

Others suggested suspension or requiring the vandal to paint or replace the damaged articles.

"It shows a lack of maturity and bad bringing up," said computer teacher Jim Furman. "This school signifies many things; two of which are pride and unity."

Unfortunately, a small number of disrespectful students cast a bad light on the entire student body. Others, hopefully, kept in mind the real pride that should be shown for these educational facilities that were all too often taken for granted.

-Gerardo Gamboa

X marks the spot

Acts of vandalism could be found throughout the halls, lockers and especially restroom areas of the school. The vandals, usually some pen crazy students, cost custodians countless hours of work in trying to remove the permanent ink marks on toilet seats, paper towel dispensers, mirrors and on walls. Not only did it hurt the appearance of the school, but it cost hundreds of dollars to repair the damages. Photo by F. Harris

LOT

Problems in the

All was quiet on the Forney Road parking lot. Suddenly, amid squealing tires and frenzied yells, a ragged car pulled into the lot. A nozzle emerged from a car window and began spraying fire retardant on parked cars while the occupants of the vehicle laughed.

Acts of vandalism such as this marred the convenience of school parking lots. Fire extinguishers and tire thieves coupled to create unpleasant surprises for some students as they emerged from school at 4 p.m.

The first of these surprises occurred on Sept. 30, when three Skyline seniors staged a raid on the Forney Road parking lot. These seniors sprayed numerous cars with a fire extinguisher, causing \$8-10,000 worth of damage to paint jobs. Assistant Principal Dwain Dawson stated his belief that the incident was just random vandalism and that the students "didn't realize the extent of what they were doing. Their plan really backfired."

The three seniors responsible for the damage received a "phase 3" hearing, which involves a third party. Two of them are now attending school at Metro, while the third has dropped out of school and gone to work. Further punishment will depend on the number of students who file complaints against the guilty parties. Twelve have done so as of Dec. 1

A second incident occurred in early October when a wheel theft was reported. Senior Brandon Davis discovered his car resting on a jack with both wheels from the left side missing. When questioned, the lot attendant said the theft must have happened between 9 and 9:30, while he was taking the morning's parking fees to the office. Final cost to replace the tires was \$336, which was paid by Davis' insurance company. Although the insurance company talked to Skyline administrators, the school was not found to have any responsibility for the claim.

According to Dawson, Skyline has no responsibility for damages occurring

Raiderized

Cars throughout the parking lot were covered with the white mist discharge from the fire extinguisher. The carbon dioxide spray marred the paint jobs, causing the colors to fade and peel. Photo by J. Lopez

on the lot because it is zoned as private property. As such, it is subject to Dallas city laws which state that the owner of a car is responsible for the car while it is on any private lot. Some security is provided, however. The attendant and the security guards are supposed to patrol the area regularly. On the other hand, Dawson admits that "it wouldn't take long for someone to learn their (the guards) routine." He went on to mention that he had asked the security personnel to alter their routines in order to confuse potential vandals.

Despite these precautions, criminal acts continued to take place, much as they have in previous years. Stolen windshield wipers, ripped-off radios and hit-and-run accidents continued to greet students who braved the Forney Road parking lot with unusual surprises each afternoon.

"Individuality, the quality that makes us our own person."

-Leo Landin

Just your

CLUB

Being a part

With over 50 clubs and organizations, students were given a wide variety of activities to choose from that were just their type. Some clubs required elected membership, but others gave an opportunity for voluntary membership and wide student involvement. Clubs even helped one another.

The world language clubs worked together to get Skyline involved in the CROP walk, a drive to provide hunger relief. Approximately 300 people represented Skyline at the walk-a-thon.

Fundraising also played an important part in organizations. Not only did the club funds benefit from fundraisers, but students were given a chance to show togetherness and build self-confidence in the area that suited them best. Different types of fundraisers were introduced such as the band haunted house. Band grossed over \$600 used towards the band trip in the spring.

Another unusual type of fundraiser was introduced by the Spanish club. Money was raised for the Mexican Earthquake Relief fund. Students contributed money during homerooms and a total of \$643.36 was gathered.

House Bill 72 did not have much impact on club involvement because students were use to it. Marching band suffered, though, losing over half of the membership and causing Parade of Champions to be cancelled.

The band pulled together and rewrote the half-time show. This was exemplary of dedication and pride displayed by many organizations. Working together and making the best of things was what made these clubs stick together and what made students believe they were just their type.

Organizations

Hard work and lot of practice go into perfecting a routine. Senior drill it.Kari Wallace works on her routine to Flashdance. Drill officers made up routines during the summer, choosing selections of music from a list prepared by the band. Photo by D. Locke

Hats Off!!

Leading the line of Silhouettes at the W.T. White pep assembly, senior Amy Bennett marked time to the drum cadence before doing the hat routine to *Skyline Girls*. The Silhouettes were not affected by eligibility as severely as the majority of other groups in the school, and they still remain a traditional part of pep assemblies. Photo by T. Vallier

Look at those legs!!

Daring to be different, the flag corps made a drastic change in their routines this year. Members Rebecca Schuhmacher and Angie Trujillo strike a risque pose, revealing their garters, at the W.T. White pep rally. Flag corps was only allowed to perform at every other pep assembly, so they took advantage of this opportunity to roll on the stage during *Firestorm*. Photo by T. Vallier

Hop to it!

Playing around with varsity cheerleaders Camilla Williams, Kerri Miller and Lornae Jefferson, principal Gene Golden pretends to stretch out before the W.T. White pep rally. The varsity cheerleaders were responsible for leading cheers and arousing spirit at each pep assembly. Photo by T. Vallier

We salute you!

Showing true pride and unity, ROTC color guards Gary Luttrell, Benny Martin, Cedric Gibson and Courtney Kennedy present the colors of the state and the nation at the W.T. White pep assembly. The color guards also presented the colors at the football games during halftime and other school functions such as the PTA assemblies. Photo by T. Vallier

Sure, pep assembly days are full of fun, but the high spirit of the spirit clubs doesn't come easily.

7ats off to those with pride

It was 7:45 on a Friday morning; the auditorium filled with excited students, some of whom were not completely made-up. The band suddenly broke out with a strong marching tune and thus began a favorite pastime—the pep assembly.

Although assemblies were no longer during class time, the spirit was kept alive by members of the cheerleaders, band, Skylites, and Silhouettes. This apparently easy task involved a lot more than what met the eye.

All of the spirit groups started the assembly day in basically the same way. This included warm-ups and pep speeches. "Sometimes we said a prayer before we performed," said junior flag corps member Angie Trujillo. This weekly routine served as the foundation of spirit among the groups.

Along with high morale, club activities played an important part in spirit-building. Silhouettes sold items such as spirit ribbons and buttons which served as a subconscious catalyst of school pride.

The varsity cheerleaders sold spirit links; each class was assigned a color link which was purchased for a dime each. They could also steal links from other classes by paying 15 cents. The class with the longest chain had their class officers lead a cheer at the last assembly of the season.

This project was made in hopes of stopping the class calls in the assembly—to chan-

nel individual class spirit elsewhere. "The Raider spirit just turns into class spirit," said senior Trisha Brantley. "People should put more energy into being Raiders," she added.

Another problem of assemblies was low attendance since assemblies were held before school. Sophomore band member Don Shell said that assemblies held during school time were better. "Having the assembly during school made it easy for everyone—it helped get everybody fired up," he said. Senior drum corps member Anita McGruder thought that different music might draw more attention. "The assembly would be live if we could play whatever the public wanted," she said.

Regardless of the problems, being spirited paid off for the people involved in the organizations. "I wanted to be involved with school," said senior Skylite lieutenant Lynn Reese. "Plus, being an officer, underclassmen really looked up to me."

Silhouette captain Sherri Newman took this concept to a more personal level. "So often our time together got lost in schoolwork and stuff like that, and being part of our group gave us more time to spend together—we're just like family."

Being spirited at the pep assemblies was no easy task, but the hard work and disappointment added up to a true feeling of love and pride for the school.

Pam Woodberry

Spruce up, dear

Making sure everyone is in neat, correct uniform, senior Skylite captain Sabrina Crowder straightens up sophomore lieutenant Danae Polk's collar at the Denton game. Although the Skylites did not actually perform, they played an important part in helping the cheerleaders with the cheers and maintaining spirit. Photo by J. Lopez

Name that tune

Jamming to the beat of Strutt, George Sanders, Byron Bell, Derrick Burton, Brian Tinnin and Armando Barate played loudly and proudly at the Roosevelt assembly. This was the last assembly that all of the band members played together, since ineligibility went into effect the following week. Photo by L. Kahanek

Stacking it up

Although the JV cheerleaders didn't get much recognition, they cheered the JV football team to a winning season. The squad, nick-named Baby Raiders, brought home a spirit stick from summer camp at ETSU. There and during seventh period, the cheerleaders practice dance routines and energetic cheers. Photo by T. Vallier

With 12 band and 24 orchestra members making All-city, the hard work involved kept band members

Blowing their own horns

Tune it up

Watching the band director and reading music at same time was a feat only band students could master. Playing music for the Christmas program, clarinet player Richard Moore, Rhonda Martin and Shawn Michaels practice with the honors band. Photo by B. Davis

Music had no grade limitations. And moving up the ranks was as simple (or difficult) as impressing a director with your talent. Even so, being in band or choir required more than talent, it required hard work.

Being in honors band meant being able to challenge other students for top position. Honors was the highest band. Its members competed in all-city, all region, the solo and ensemble contest and all-state.

Having 12 students pass auditions for All-City, trumpet player Derrick Burton said, "The main reason why I tried out is because it's a challenge. It's a way to compare with people from other places. This was even the first time that I tried out on trumpet, and I felt good about making it."

Symphonic band was probably best known for its participation as the marching band but they also participated in contests

and gave concerts.

One step down from symphonic band was concert band, but all bands achieved one central purpose—playing music and all joined together for marching season.

The choir and orchestra programs also attended contests and concerts as part of their common routines. Special performances at the State Fair Music Hall, PTA meetings and churches required more hard work.

All the hard work paid off with rewards, though. Out of nine schools in DISD, 24 Skyline students made up the majority of the All-city concert orchestra and six members were allowed to tape for state competition. "Everyone agrees that being in orchestra is a lot of hard work, but all of our hard work pays off in the end," said four year all-city viola player Erica Britt.

Striking up a tune

Practicing with the honors band during fourth period, senior Anita McGruder strikes a tune on mallets. Being part of the drum corps meant being able to play a variety of percussion instruments. McGruder made All-city Orchestra playing percussion. Photo by D. Green

Singing is it

Getting involved with the choir program was a neat way to meet people. Freshman Christie Matthews sings *A Chorus Line* during Camarata, the beginning choir class. Photo by A. Williams

Toot your horn

Warming up to scales in the band hall, french horn players Tammy Johnston, Ken Alston and Mike Hill practice for band tryouts. Although everyone was placed in a classroom during marching season, students had to audition for a particular band during concert season. Requirements ranged from playing off scales to sightreading music. Photo by B. Davis

Strings away

All-city and All-state cello players Jeff Johnson and Tommy Roberson play their cellos to perfect tonation techniques. Johnson and Roberson were in the Sinfonietta Orchestra which required extra practice and hard work. Photo by D. Green

Singing to sing

Rehearsing for the Christmas PTA program, alto and bass Choraliers sing a variety of songs from contest selections to Christmas music. All choir groups participated in the PTA program before beginning rehearsals for the musical *Fiddler On the Roof*. Photo by D. Burris

Limited space

Practicing for the PTA program at the beginning of the year, the Limited Edition sings *One Voice*. L.E. was the only choir that performed at the first PTA meeting and much practice went into perfecting moves. Since L.E. is a show choir, the singers choreographed their songs. Photo by B. Davis

Down the line

Poised and positioned while taking a pause between counts during *Firestorm*, senior Angie DuBois and the rest of the flag corps take a short break while the rest of the band practices particular show spots. The corps often had to wait while the drum majors and band directors worked with other marchers. Photo by T. Vallier

The Glove!

Having the same first name as the star who made gloves famous, flag corps sponsor Michael Moore snips the tips of the corps' performance gloves as junior Belinda Donaldson looks on. Moore introduced many new aspects to the flag corps' performance that were not used in the past. Photo by L. Kahanek

YEE-HA!

"Shooting" to the beat, flag corps members Sherri Curtis, Lisa Kahanek, Larissa Madin and Dee Geiger perform to *Wabash Cannonball* at the Samuel game. This routine replaced the original marching show after the band and the flag corps were cut in half by ineligibility. Photo by A. Kahanek

Color my world

Using glittering colorful streamers to add extra flair, senior corps member Dawn Patterson untangles a streamer to put on her performance flag for the *St. Thomas* routine. In addition to the streamers the corps used multi-colored silks, glitter tape, garters and other props to improve their overall appearance. Photo by J. Lopez

The Skyline Flag Corps: the girls that twirled hustled with muscle when it came to perfecting a performance.

A new line of girls

"TWE-EE-ET—TWEET—TWEET!" A line of silks cut the air with a swish, and thus started another performance for the Flag Corps. In order to achieve performance quality, the corps worked through summer band practice and marching season.

In addition to stretching out, running and warming up for morning practices, the corps went through a daily routine of front-hand spins, butterflies, back-scratches and other intricate moves with intricate names. "I didn't mind morning practice that much because they were much easier than after school practice," said senior member Dawn Patterson. They also went through the same routine for the pep assemblies.

People wondered what inspired these girls to try out for flag corps and to work so hard. "When I got involved with something, I felt that I should dedicate myself to it 110 percent," said junior lieutenant Dee Geiger. Having a sense of belonging also appealed to others. "I really liked contributing my ideas and organizing things," said senior co-

captain Rebecca Schuhmacher.

Another strong force behind the corps was the addition of a new sponsor, Michael Moore. He was a member of the prestigious Madison Scouts' rifle team and proved to be very qualified as a sponsor. "Having a sponsor that had knowledge of and experience with a corps helped us stay together—he treated us really strict, and we got a lot more things done," said four-year member and senior co-captain Lisa Kahanek.

This hard-working group enjoyed extra attention this past year from other students at school, and this gave an incentive for first-year members to plan to return. "I will definitely stay next year because I loved it so much this year—I made new friends too," said junior rookie Sherri Curtis.

Although the corps was cut in half by ineligibility which caused major routine modifications, these girls still prevailed with austere work and strong determination.

—Pam Woodberry

Ho-Hum!!

Even though football games are a source of excitement for some, junior flag corps lieutenant Dee Geiger looks on during the Roosevelt football game, bored, tired and ready to go home. Halftime performances took a lot out of the flag corps since they had very physical routines. Photo by L. Kahanek

Tweetie Pie

Striking a stunning pose at the end of the Wabash Cannonball performance, senior captain Lisa Kahanek blows her whistle to get the corps in order to leave the stage at the Bryan Adams pep assembly. The flag corps performed at four pep assemblies this season, and received standing ovations after each performance. Photo by J. Reynolds

Lay it on the line

Even during early morning practice, flag corps members Lisa Kahanek, Rebecca Schuhmacher and Dee Geiger glow with an aura of freshness while finishing Wabash Cannonball. The corps incorporated more dance movements with their routines this year which proved to be a real attention grabber. Photo by J. Lopez

Can we talk?

Before taking places for the W.T. White pep assembly, some members of the flag corps take time out to discuss their performance to Firesform. During this time, the corps wished each other luck and chatted with one another about the routine. Photo by T. Vallier

No time to play

In order to meet deadlines, journalism involved lots of concentration and dedication. Here, sports editor Kim Prince designs a layout for the newspaper. Kim was on both yearbook and newspaper, which required more time and input. Photo by D. Green

Helping others

Performing one of his many duties, editor Todd Vallier shows artist Demetrious Harris how to draw up a quad-pak. Artists were given responsibility for designing a spread of ads each deadline. This entailed ordering type, designing ads, doing artwork and completing paste-ups. Photo by D. Green

Work, work, work

Sitting in the middle of the hallway during one of the Tuesday night forced labor camps, editor Lisa Kahanek orders folios for the Organizations section. With over 60 people on staff, many sections moved to the halls to complete their work. Photo by D. Green

Helping others

Although sophomore Virginia Benavides wasn't directly involved with the speech department, she still found time to help out others during Skyline's state-qualifying tournament. Here, she shows sophomore Jason Sullivan where the dramatic interpretation will be held. Photo by J. Lopez

Relaxation is the key

Preparing to host an NFL tournament is major work, senior Derick Langely who takes a break to relax NFL members had to find judges, prepare each round, keep financial records and forward results. Photo by K. Montgomery

Busy as a bee

At the NFL tournament, Cheryl Blair, Tiffany Davis and Shelisa Taylor tally ballots to determine who will advance to semifinals. Skyline's yearly tournament moved to the fall this year and became one of the state-qualifying tournaments. Over 36 schools and 980 students attended the October tournament. Photo by J. Lopez

All work and no play

Devoting many hours and displaying pride was a common factor for journalism and speech students. This type of dedication helped these students be the best they could be.

Classrooms were vacant. Buses had departed. Custodians went on their usual routine of cleaning classrooms and sweeping hallways. Getting ready to sweep the hallway directly in front of G-building, they saw students laying on the floor working on layouts or sitting around tables working on stories and pasteups and meeting deadlines.

Who were these devoted patrons who were willing to stay each Tuesday night to meet deadlines? No one else but the journalism department.

Meeting deadlines, devoting time and cooperation were all needed for the success of the Origin and Tribune.

The students didn't mind the Tuesday Night Forced Labor Camp.

"Staying each Tuesday after school really helped me in meeting deadlines," said senior Yolanda Jackson, one of the two typesetters for the publications.

Even though staying after school didn't fit into the busy schedule for the National Forensic League (NFL), attending tournaments and doing library research did.

Membership in these organizations was

the objective of the ambitious and forward-looking high school student. It represented recognition of an achievement of which that person will always be proud. For many students, it was the pinnacle of their high school careers. For others, it opened the door to opportunity and success. "It gives you a foundation and starting point in preparing you for a journalistic career," said sports editor Dameron Fisher.

"All jobs you encounter are going to require communication," said NFL member David Steele.

But the greatest value of membership was the encouragement and incentive it gave to become a more successful and influential citizen.

"By being a part of NFL, I will be able to convey my ideas more effectively to others," said Michael Swanberg.

"It (journalism) has helped me in my writing ability as well as my speaking abilities," said academics editor Tanisa Jeffers. "It gave me the opportunity to meet other people and to be able to relate to them."

-Regina Reed

Anybody there?

Although it wasn't an easy job, selling ads was another responsibility for journalism students. Junior Kristina Murphy calls a business requesting they submit their copy for an ad for the Origin. With 54 pages in advertising, over \$10,000 was raised to help pay for the \$50,000 yearbook.

Sitting pretty

Gretchen Cox and her partner perform to *Oh, You Beautiful Doll* at the game against W.T. White. The ladders were just one of the props used by the drill team to enhance their performance. Photo by J. Reynolds

Sax appeal

After playing out on the field at halftime, sophomore Jon Knauf sits in the stands at the homecoming game against Roosevelt. Band members had third quarter off to eat and socialize. Skyline went on to win the game 7 to 6. Photo by J. Lopez

B ring out the best

The band marches on the field and the music starts. The drill team stands ready to perform. a fine tuned performance starts. But what is behind it? Half-time is more than 12 minutes on the field.

Of all the people in the student body, the ones who performed at half-time had to be counted among the most dedicated. Angry sponsors, rowdy crowds, and long hours were only a few of the things these people went through for the short-lived glory of performing. Pride was the main factor in keeping these students involved.

Each person had a different reason for performing. "It's a lot of fun being with people. It (the band) is kind of like a club," said sophomore Jon Knauf.

Another reason for performing was to have a sense of belonging to an organization. "I enjoy myself and since I like what I'm doing, I'm going to keep on regardless of what people say," said sophomore Skylite Lieutenant Laucunna Donetta Smith. "I figure after all the practice, you might as well go out there," said Alex Villarreal.

At times, opposing crowds caused problems. They made rude remarks that performers had to deal with. "It doesn't pay to listen to them. If you like what you're doing, it's worth it," said senior Pam Woodberry.

Putting up with problems was only a small part of the half-time show. "It's fun being part of the band and the half-time. You have to forget about the bad stuff and think about performing," said sophomore Jennifer Kiewit. "It's worthwhile doing things that show the school that you care about it and you have pride," said senior drill member Cathy Huntsberry.

Recognition was not a big part of dedication. Few people won honors, but they kept on because of pride. Being part of an organization was just as important as being in the spotlight.

— Aimee Roebuck

The right stuff

Before the game began against W.T. White, the ROTC color guard consisting of Ronny Taylor, Craig Swindell, Gary Luttrell and Benny Martin presented the flags of Texas, Skyline and the U.S. Different officers requested to be in the color guard each week and were chosen by their commanding officer. Photo by J. Babb

What a play!

At the W.T. White game, band members Bruce Hilbun and Clyde Stokes intently watch the plays. Although many bands lost members due to the eligibility requirements, Skyline was one of the few schools to retain a halftime show. Photo by T. Vallier

Putting it together

Putting the final touches on their routine, flag corps members Jennifer Nelms and Leisa Bussell get ready for their performance at the SOC game. Skyline went on to win the game 9 to 0. Photo by J. Lopez

A word of advice

Sharing her experience, Skylite lieutenant Donnetta Smith gives advice to another member of the Skylites. The Skylites made a spirit line before all home games to cheer on the varsity players. Photo by J. Babb

On down the line

Cheering on the fans, Varsity Cheerleaders stayed on the sidelines at the game against W.T. White. Cheerleaders practiced early mornings and first period in order to prepare for games. Photo by J. Babb

7hirst for excellence

Over the summer and through the school year, students came to school early and stayed late to make the performance better.

As early as 6:15 in the morning sleep-hungry students drag themselves out of bed to get up to school ready to practice. Although the hours were many and the pay only in one's satisfaction, students thought the end result was worth it.

At times practice interfered the plans of those who had to practice. "I gave up being in clubs, summer jobs and a trip to New York," said varsity cheerleader Cari Bosch.

Freshman band member Freddy Guerra gave up playing baseball to be in the band. Even with these sacrifices, both said the time put into practice was well spent. "When people clap for us at shows, we are getting them spirited and so it's worth it," said Bosch.

Drill member Michelle Straughan got to school at 6:45 every morning. Straughan was not alone. Band members had to be ready to march by 7 a.m., while football players stayed after school until 6 p.m. Average practice time ran 10 hours per week for each of the groups. This did not include at-home practice, but practice at school seemed to help

more.

"I try to practice at home, but at school we have someone to help us out," said junior Skylite Aidee Aguilar. Even with the extra at-home hours, students found the practices helpful in looking good in what they did.

In most performing organizations, weather affected practice. "When the weather is bad, we stay inside and practice," said band member Don Shell.

"We practice inside so the weather doesn't really affect us," said JV Cheerleader Sheena Roberts. "We practice in all weather except rain. We don't practice then because the weapons would rust," said ROTC captain Gethon Robinson.

Practice was a way of life for members of performing organizations. Countless hours were spent perfecting routines and making sure everything was just right. The most common complaint was that the practices were too hard; but at the same time, they were beneficial. This was one case when practice definitely made perfect.

-Aimee Roebuck

Slurp!

The day was hot, the water was not as sophomore Jennifer Kiewit discovers when she takes a break from summer band to quench her thirst. Band members gave up part of their summer to get ready for the marching season, which began the first week of school, and for marching contests held throughout the year. Photo by D. Locke

In the army now

Practicing a rifle drill, ROTC member Robert Watson prepares to do a routine called a Manual of Arms. Watson was a member of the drill team which went through various phases such as inspection, regulation drill and free drill. Photo by E. Aviles

Practice makes perfect

Practicing in front of the school building, the Skylites readied themselves for the Longview game. Dedication was shown through the practice that the Skylites went through. Their practice lead to spirit-filled performances at games. Photo by D. Locke

All together

Early morning practice led to a better performance at half-time. Here the band practiced for the last time, which was a relief to many band members. The early practices made many lose sleep just to get to practice on time. Photo by T. Vallier

At attention

Straight and tall, flag corps members Dee Geiger and Michele King perfect their routine to Wabash Cannonball. The flag corps featured at half-time this year which was an honor to any group. Photo by T. Vallier

Out of time

At early morning drill practice, the team works out in the student parking lot. They stretch out and warm up to work on their routine. The drill team won awards for their performance to *Oh, You Beautiful Doll*. Photo by T. Vallier

On the lookout

Preparing for the first game, varsity cheerleader Cari Bosch makes spirit signs. Each cheerleader made signs for all the games and these were displayed at pep assemblies and in the student center. Photo by D. Locke

Get it together

The day started early for the flag corps. Due to rain, the corps practiced in the auditorium instead of outside. Here, they perfected a routine to *Trooper Salute* in which they used colorful banners. This was something new to the corps and added a patriotic feeling to the song. Photo by T. Vallier

Cheering 'em on

Waiting anxiously for the cheerleaders to begin a new cheer, Skylites Aidee Aguilar, Tracy Slaughter, Lupe Martinez, Anita Jewett and Cynthia Lawrence concentrate on arousing spirit during the Samuell pep rally. Skylites didn't earn a credit for the work they did, but they were a vital part of the spirit organizations. Photo by T. Vallier

Clowning around

Having a good time at the Spanish Club Halloween party, members Kay Newman and Lisa Kahanek attack the refreshments. Celebrating their first party by playing many games, members were given a chance to get to know each other better. Photo by R. Kemp

A work of art

Creating a masterpiece, drill members Angie Bohne and Melinda Mann paint a sign for the hall decorating contest during homecoming week. All Silhouettes were required to help decorate the student center which was their designated area for the contest. Photo by D. Green

Friends forever

At the birthday party for Jim Edgeton, juniors Leigh Anne Payne and Maria Giangliullo socialize while eating cake. This was one of the many band parties, but what made this one special was that it was a surprise party for Edgeton's birthday. All band members chipped in money to buy him a black motorcycle helmet. Photo by D. George

Dancing to the beat

Although few in number, the JV cheerleaders still aroused spirit in the pep rallies. They also won second place in the hall decorating contest during the week of homecoming. Photo by D. Locke

We got spirit, yes we do

Being a part wasn't that hard, but showing it could get down right expensive. That's what members of clubs and organizations discovered as club after club announced t-shirt sales. Still other organizations had jackets, sweatsuits or jerseys.

Band, drill, cheerleaders and Skylites all had expensive jackets. Optional for band and Skylites, the \$15 jacket were mandatory for Silhouettes. The patches for the jackets cost extra, usually around \$6 each. Silhouettes of the week were given a "boot patch" for their jackets, and these badges of honor were proudly worn. "Getting Silhouette of the week was a great honor. It makes you feel like all your hard work has paid off," said senior Lynnell Oliver.

Jackets for cheerleaders were mandatory also. Their jackets cost around \$55. Patches for their jackets cost \$5 each.

"My cheerleading jacket symbolized my school spirit to Skyline," said junior varsity

cheerleader Danny Uselton.

Things got tougher for new band members who had to earn their letters. Old members already had their "S"s but new members had to earn 100 points by going to all-city tryouts, all region try-outs, all area tryouts, all region jazz tryouts, or being an all state band member or by having perfect attendance each six weeks.

Non-spirit clubs usually had less costly apparel while yearbookers spent \$19 on a sweatshirt and pants, most other clubs bought costing \$8 to \$12. Shirts consisted of many different styles, logos, designs and colors. The yearbook staff used the logo for the yearbook to put on their sweats. The only requirement to receive one of these shirts, was to simply be involved in the club, and pay dues, and of course, pay your \$8, \$10 or \$12.

-Cherie Coulter

Taking a break

Watching the Samuell pep rally, freshman Armando Zarate waits for his cue from Jim Edgeton to begin playing his trumpet again. Freshmen were not allowed to march during halftime show, but they still attended the band functions. Photo by T. Vallier

Wear it proudly

Wearing her Skylite jacket with pride, junior Aideo Aguilar talks with a band member at the band's haunted house. The band grossed over \$600 at this fundraiser to use towards their spring trip. Photo by R. Kemp

According to plan B

Drinking cokes and socializing, tour guides Doug Thompson and Paula Kindle make the best out of plan "B" for the first party of the year. Originally, the tour guides were planning a hay ride; but due to rain, the hayride was cancelled. Making the best out of the situation, everyone still cooked hot dogs and s'mores as planned. Photo by T. Vallier

Let's play dress up

An advantage to being a senior Silhouette is being able to participate in a parade at the Fair Park. Seniors Iris Wesley and Amy Kraft, wearing formal dresses, snack on refreshments and wait for the parade to begin. Photo by D. Durrett

Playing games was a neat way to take a break from it all.

Going my way?

Paddles away

Getting ready to make his move, senior Suradet Sookma waits for the ball that's about to come flying across the net while playing ping pong at the first tour guide party. Many games were played at the party, but ping pong was the favorite. Photo by T. Vallier

La Di Da Di, it's a tour guide party! Even though memorization was enormous, exams were hectic, and tours frequent; tour guides found time to P-A-R-T-Y.

Parties allowed time for relaxation and it also brought students closer together.

"It (the party) was great. We played a lot of games and had a lot of fun," said Paula Kindle.

"We were allowed to bring our dates and we all played neat games," said senior Kim Norrell. The games consisted of ping pong, darling smile please and a number of mind games.

Chess Club was another way for students to relax and get away from it all.

"It (meetings) was a time for us to play chess, checkers or backgammon and to enjoy the fellowship playing them," said junior Scott Burkham.

Each Thursday morning, students met in room 210 to challenge chess club instructor Andrew Lumpkin, and other students.

Lumpkin was willing to give a \$10 re-

ward to the person who could beat him at all three games the first time they played.

"I have lost each game at different times but not all three to the same person," he said.

Each organization served a purpose.

Being a tour guide did a lot for the guides' confidence. It let them know that someone trusted them and that they were capable of performing adequately.

Chess Club offered its members a chance at wider competitions. They were able to participate in the competition of the high school Dallas chess club.

Since 1971, tour guides have kept up the tradition of giving tours, having parties, taking exams and enjoying themselves.

Chess Club has kept up its tradition of playing chess, checkers and backgammon with a few subtractions. The members didn't have to pay any dues to be a part of the club nor was the Dallas chess club a group activity, as was in the past, but rather an individual one.

-Regina Reed

Where to next?

Senior Doug Thompson proudly wears his tour guide sweatshirt which contains a design of different cartoon characters representing each of the 28 tour guides. In the past, t-shirts usually displayed one or two cartoon characters but to distinguish the 1986 guides and be different, tour guides decided to create a mob scene. Photo by D. Locke

Think about it

Daily tests were given during the first six weeks allowing tour guides to learn new information about Skyline. Here, senior Windell Williams studies for an upcoming exam. Photo by K. Montgomery

Get the picture?

Showing off the photography cluster, Rebecca Schuhmacher explains the concept of the cluster program to a German student. Skyline attracted tours for the different types of people ranging from business, foreign exchange, students and junior high schools. Photo by D. Mann

Stepping out

Sitting on the steps in front of the auditorium was a common routine for tour guides on days that they gave tours. Here, seniors Rebecca Schuhmacher, Gloria Limas, Lisa Kahane and Suradet Sookma wait for a group of junior high students to arrive for their tour. Although time did not permit the students to see all of Skyline, they were at least familiar with certain areas before the tour was over. Photo by D. Mann

Checkmate

Playing chess every Thursday morning gave juniors Scott Burkham and David Garcia satisfaction. There really wasn't a formal chess club this year, but students had the opportunity to gather and play chess every Thursday. Photo by F. Harris

Games people play

Concentrating on his game, senior Stephen May prepares to move a pawn to beat teacher Andrew Lumpkin (not shown) in a game of chess. If a student beat Lumpkin in their first attempt at each of three different games, that student would be rewarded with \$10. Photo by F. Harris

And over here...

Getting used to giving unexpected tours, Dena Wright shows a group of German students the cosmetology cluster. Group shots were scheduled for that day, but to accommodate, pictures were rescheduled for another day to better show off the school. Photo by D. Locke

Groups

ROTC Staff: Ronny Taylor, Sharon Bennett, Gethon Robinson, Brian Jackson, Connally Erwin

Diamond Disc Club Front: Jose Ruiz, Cheryl Phillips, Connally Erwin, Cassandra Robinson 2nd row: Heidi Mathis, Vanessa Collins, Stephen Robinson, Ronny Taylor Back: Sherry Bolden, Gethon Robinson, Robert Gamble, Brian Jackson, Juanita Carter

E-E-E-K!

Halloween was a time of ghosts, witches and warlocks, and senior Rebecca Jackson kept with the tradition with a little green paint and help from freshman Kim Hodge for the marching band's haunted house. The haunted was run by band members, and the band earned over \$600 profit from the project. Photo by R. Kemp

Making ends meet

Looking contemplatively at a bag of Blow-pops, senior Keywanette members Gayla Jackson and Tonya Brooks prepare to receive their share of the candy. Blow-pops were just one of the various sweet treats sold as fundraiser at Skyline. Photo by B. Collins

Having a multitude of clubs and fundraisers was only a small part in the game of

Making the green

"Hey, do you have peanut M&M's?"

"Nah, just sold my last one—sorry!"

This conversation was commonplace school year-round, and each student was guaranteed an abundance of items ranging from Snickers sold by ROTC or notebook paper sold by the D.E. store; however, it was not the access to the merchandise that counted but the benefits from them that did.

Of Skyline's many clubs and organizations and their many fundraising activities, the most frequent one, M&M's, ironically was not the most favorite product to sell. "I was so sick of selling M&M's—too many people sold them, and we needed different types of candy to sell," said senior French Club member Teel Wesley. Although the competition for selling candy was stiff, these candies brought in the most capital.

Items sold dealing with Raider spirit produced large profits, also. Spirit ribbons, sold by the Silhouettes, were popular during football season—as evidenced by the flapping ribbons that decorated thousands of shirts and jackets. "The money we raised went towards supplies that we needed during the year so that we didn't have to use our own money," said junior Silhouette Yancy Bearden.

When students needed fast cold cash or a quick bite to eat, the fundraisers really came in handy. Receiving candy or monetary credits from friends or self-use was widespread about the school. "I had already eaten so many fortune cookies without paying for them, giving away a few more didn't matter," said senior Asian club member Michael Mundy.

A real money-maker which had a hint of professionalism was the sales made by the D.E. The student-workers earned their money by receiving commission on merchandise that they sell.

"We bought the merchandise wholesale and then priced it just enough to make a reasonable profit," said D.E. instructor Stanley Baker. He also added that the Skyline sweat-shirts were the most profitable item at \$13.85 and 15.85 for the hooded sweatshirt.

The adage of "money makes the world go 'round" was strongly supported by fundraisers. Since ten percent of the funds aided the purchase of computers, chairs, and other things for the school, one could justly say that the clubs were not the only ones to benefit from fundraisers.

-Pam Woodberry

Roll out the dough

Although fees for club and school activities consumed much of students' extra money, Theresa Souder, Danae Richardson, Brad Hargrave and Shandia Covington still found the funds to pay for Homecoming tickets. The Senate earned most of its funds from the tickets which it sold. Photo by J. Lopez

Sell it, Baby

Giving the D.E. store a bit of competition for candy sales, freshman Jason Prince makes a small fortune for the Spanish club by selling Snickers. Many organizations sold candy bars as a fundraiser. Photo by B. Davis

Aiding those who need help was another goal of clubs—they relied on each other to help

Spread the word

When organizations participated in fundraising, they were sure to earn profits; however, the money earned by the groups was not always used for the clubs' own personal interests.

Such social catastrophes as world hunger and natural disasters were just two incidents which benefitted from the clubs' relief projects. Members from language clubs in addition to other Dallas groups participated in the Crop Walk, Nov. 3 at City Hall Plaza. The money earned from this walk-a-thon helped to feed needy people locally and nationally. "When I first started the walk I was excited about it and had a lot of energy, but as I grew tired, the thought that I was helping to feed others gave the determination to continue until the end," said senior German club member Linda Amie.

The Spanish club prompted a school-wide campaign to donate spare money in an October homeroom to help the Mexican earthquake victims get a new start. Posters were placed around the building asking students and teachers to help. "This was the first time that Skyline had a campaign like this, we did very well—we raised our \$500. Not only was it worthwhile in purpose, but it also got the members of our club involved in something together," said Spanish club president Gloria Limas.

With the advent of the holidays, the spirit of helping others filled the air. The Senate used its personal account to buy the materials used to make fruit baskets at Thanksgiving for the elderly at the Willow Bend Care Center. "I had a wonderful time there—I felt good because the people there were happy to see us, especially since they weren't expecting us to visit them," said sophomore vice-president Margo Gomez.

The D.E. store gave 75 children from the United Way agency \$15 each, and took them shopping at Town East Sears. "The funding for the project came out of the D.E.'s profits. It was really neat—there were kids everywhere hollering, 'I want this! I want that!' and afterwards, Mr. (Stanley) Baker (sponsor) passed out large stuffed animals to each child. I wish we could do it again," said senior D.E. student Jalonda Pearson.

Members of organizations have showed their goodwill to those in need through participation in projects which helped others. "I loved every minute of helping those little kids shopping, and I would do it again," said junior D.E. worker Bret Fletcher. Although the clubs didn't "pocket" the revenue for themselves, they were rewarded with self-satisfaction from what they accomplished.

-Pam Woodberry

All in the family

After walking 10-km in the Crop Walk, Skyline's participants posed for a "family portrait" to remember the event. Photo by F. Harris

Energize me!

In order to get psyched up for the November 3rd 10-kilometer Crop Walk, junior French club member Duc Tran relaxed before the event which was held at City Hall. This even allowed the various language clubs to raise money by having sponsors donate an amount of money for each kilometer they walked. Photo by F. Harris

Pass it on

Posters were a sure way to spread the word to students and teachers to donate spare change to the Mexican earthquake relief fund, and junior Spanish club member Maria Bravo helped place such propaganda around Skyline. Over \$500 was raised to help the victims of the disaster. Photo by E. Aviles

Gift of Love

Surprised by the unexpected treat, a resident of the Willow Bend Care Center reaches for the fruit basket given to her by senior senator Laura Gentry. The Senate used money from its account to obtain the material for the baskets which were made after school hours. Photo by L. Oliver

Cashing in on it

Senate and D.E. were two groups at Skyline who used money as well as time to help people

People helping people. When this phrase was mentioned, many groups at school come to mind. Two of these were Student Senate and Distributive Education (D.E.) These served the community as well as the students.

Senate was an elected group of students who organized school activities and did what they could to serve the school. The senate took fruit baskets they had made to a near by nursing home.

"The project really helped us feel better about ourselves and that we are helping someone," said sophomore vice-president Margo Gomez.

Distributive Education helped people, but not necessarily older people. The D.E.

Store gave students experience in running their own business and gained a more realistic view of the real world.

"If there was room, everyone should be able to be in a work program. It's not a cop-out. You have to be a good student because we do our share of work," said senior Jonathan Morales.

At Christmas, D.E. students took underprivileged children to Town East Mall to shop for a Christmas toy.

-Aimee Roebuck

Making change

After ringing up a sale, Cathleen Bert gets ready to give change back to a customer. Duties in D.E. ranged from being a cashier to stocking the store. Photo by W. Woodruff

Making a friend

While visiting Willowbend Care Center, vice-president Denise Golden talks to a resident. Senators gave each resident a fruit basket they had made. Photo by L. Oliver

All decked out

Senators weren't always serious, at least for one day. Lisa Ingraham was one of the contestants in the '50s contest held to boost school spirit. Photo by J. Lopez

Accounting it

Recording money amounts that came in. Mica Whitman prepares to close the store. D.E. students had to count money before and after the store opened and closed. Photo by W. Woodruff

Make it clear

A new topper for the Capitol Building is project Historian Dena Wright explains during one of the monthly meetings. Senators collected money in the Student Center to donate to the recasting of the Goddess of Liberty. Their money was added to other donations for the restoration. Photo by D. Burris

Concentration

Catching up on some work during an off time at the D.E. Store, Brett Fletcher calculates with a friend. Students in distributive education had to keep books as well as make sales. Photo by D. Green

Making a sale

Socializing was a part of being a good salesperson as Amy Hely and Krista White demonstrate at the D.E. store. Salespeople got commission for everything they sold and used the profits to give needy children the chance to buy Christmas toys. Photo by R. Kemp

The decision is

Deciding on committees executive board members Lynell Oliver, Shelly Moore and Denise Golden talk over the creation of three basic committees. These standing committees, publicity, decorating and social, to take care of business throughout the year. Each senator was on meetings counted just like regular meetings did. If a senator missed three meetings of any kind he would be kicked off senate. Photo by B. Collins

Take note

The activities of the Key Club and Keywanettes to improve the image of young people made students and adults change their ideas.

Teenagers. A word that evokes images of lazy, self-centered, bad grammared youth. This was an image the Key Club and Keywanettes actively worked to reverse.

Affiliated with the Kiwanis Club, the Key Club was more than a service group to the community. It also helped the image of students and young people everywhere. Once a month, the club attended an area church to improve the image of youth to adults.

"We just want to show that not all kids are on drugs or messed up. I guess that's why we wear ties and socks—to separate us in a way," said sophomore Carl Moon. Each member was supposed to commit a minimum of 50 hours of service each year, although service took many forms.

Activities included working at the March of Dimes Haunted House and serving as Silhouette guards at football games.

"Our activities make us feel good about ourselves and what we can do for others," said sophomore Alex Winslow.

Keywanettes were the females counterpart to the Key Club. "Keywanettes help the

community and make us feel good about being able to help," said junior Jenny Robalino. The Keywanettes made a festive atmosphere on Dec. 19 by decorating the janitor's lounge.

"The janitors don't get any thanks for what they do around the school and the Keywanettes just thought they deserve some credit," said sophomore Victoria Johnson.

Other activities included decorating Buckner Children's Home on Dec. 14 and working in the March of Dimes Haunted House. During the holidays, the Keywanettes collected food for needy families.

Unlike the Key Club, who met weekly, the girls met every two weeks. They, too, had a kind of dress code. Girls had to wear slacks or skirts. Good behavior was also expected.

"I like the feeling of helping people who are needy to show that we care," said sophomore Tanisa Jeffers. This was a common feeling among members of the Keywanettes and it summed the whole purpose of the group's service to the community.

-Aimee Roebuck

Getting it down

During a weekly Key Club meeting, members Jeff Diffie and friend take notes on dates of upcoming activities. At least one member was expected to attend a monthly Kiwanis meeting. The Kiwanis sponsored Key Club. Photo by A. Williams

Let me tell you

Discussing the success of the Keywanette food drive, Paula Kindle talks to members in a biweekly meeting. Although the canned food drive was not the groups most successful community project. The cans of food were donated to those who really needed them. Photo by A. Williams

Here we wait

Awaiting the appearance of their Silhouettes, guards Gary Joe and Paul Peterson stand ready to escort their assigned drill member to their seat. Guards also escorted officers across the field to meet the opposite teams officers. Photo by T. Vallier

Deep in thought

Thinking seriously while signing in Keywanette Angela Cantu gets ready to listen to the business at hand. Keywanettes donated time and canned goods to make the holiday special for many people. Photo by A. Williams

All smiles

Closing out the Keywanette meeting with a joke, members Matiko Bivins, Stacia Henderson, and Monica Hill get ready to go to class. Keywanttes sold Blow Pops to raise money this year. Students enjoyed the switch from M&M's and Snickers. Photo by A. Williams

On to Broadway

Dressed according to their roles in the play *Joyeux Noel*, French Club members Kimberly Davis and Sharon Rybarski get ready to make their grand entrance at their Christmas program open to the public. French III students prepared for this program six weeks. Photo by A. Williams

Dance fever

Concentrating on learning the Chopstick dance, sophomore Lauren Johnson practices in the hallway next to the Asian room after school while instructor Hsin Hui Wang watches. Asian Club members, although few in number, usually met after school on Thursdays to practice various dances. Photo by B. Davis.

Being allowed to participate in the Cotton Bowl Parade, senior Connally Erwin smiles as he carries a banner during the parade. Photo by F. Harris

A sincere gesture

During one of the officer installation meetings, Katherine Reid presents FHA officers Yvonne Phillips, Cassandra Hall and Kimbra Mangrum with a single red rose symbolizing sincerity. After the meeting FHA members gathered in the lounge for refreshments prepared by the sponsors. Photo by A. Williams

Let's celebrate

Having just been announced that she is a rookie Silhouette, freshman Mylana Bailey talks with freshman Monica Seik at the Christmas party for new drill members. Over 120 girls tried out for Silhouettes, but only 57 made it. Bailey was one of the lucky ones. Photo by L. Oliver

All work, no play

After a short break, French Club vice president Cheryl Blair disposes of her Pepsi and is ready to continue the Crop Walk. The activity was sponsored by most of the language clubs to help raise money for world hunger. Photo by F. Harris

Not just another act

Clubs sponsored extra activities to excite students and increase attendance.

"The Spanish Club will meet at 8 a.m. and 4 p.m. Tuesday."

To the casual outsider, two meetings for the same club may seem a tad strange. The Spanish Club didn't think so nor did officers expect everyone to be at both. This was but one of the little extras the Spanish Club did to boost membership. Having morning and afternoon meetings allowed students a choice.

Clubs looked to provide extra services or more fun and more variety to give members a reason to stay active.

Other Clubs used civic-minded activities to get members involved. Language clubs participated in the CROP Walk, a fund-raiser to help relieve famine in Ethiopia. Members found sponsors to pay for each kilometer they walked.

"We offer extra activities which benefit the students by being able to participate," said French Club sponsor Joni Caldwell.

French Club members also attended a play,

Infidelities, by Marivaux.

"I really enjoyed being a part of the French Club. I feel it was one of the most active clubs," said senior Chere Howard.

Language clubs were able to keep membership high by allowing interest to be the only requirement. Neither Spanish nor German Clubs required members to be enrolled in the class.

"The German Club is to promote interest in German literature and culture among students in general," said sponsor Keith Williams.

"It's really interesting being in the German Club, because you learn about different cultures and literature of the Germans," said senior Nancy Farquhar.

Keeping membership up was a challenge for clubs who had to keep all meetings outside of school hours. Adding little extras was the way many clubs answered the Challenge.

In the giftshop of the Science Place, Science Club members Johnathan May and Dan Blanton flip through one of the many educational books that the store sells. The Science Club initially went to the Science Place's planetarium presentation of Halley's comet. Photo by D. Green

Playing in the rain

Although the band was soaked to the bone in water, they still played for the Dallas Water Utilities annual comemoration for outstanding employees. Rain hampered the outside performance, but the food and drinks provided by the company made up for it. Photo by Dallas Water Utilities

A helping hand

Senior Fabiola Parra helps one of the many biligual students who received gifts from the ESL Club. The club decided to "adopt" this particular class when Anna Bobadilla's mother, the teacher of the bilingual class, told her of the hardships that the children's families were going through. Photo by A. Bobadilla

Getting the most out of getting out

One, two. One, two, three—" began Misty Hinojosa as the band began to march inside the Hall of State playing Olympic Fanfare at Fair Park. The reason for the gala festivities was the Veteran's Day parade. The band responded to the call of the Dallas Water Utilities who sponsored the whole affair.

The band also worked at White Water for two weekends in a row towards the first of the year to raise money for their trip to Nashville during spring break. "We worked really hard but the whole experience only drew the band even closer together," said junior band member Eddie Rose. All in all the band set the pace for other clubs and groups do go out on outside activities.

Although the band was a pacesetter in outside activities other clubs and organizations surpassed them in other outside activities. For instance, the Fine Arts Club, a new club sponsored by English teacher Pat Niedecken, went on numerous activities in-

cluding a trip to the Meadows Museum at SMU, an outing to the Shakespearean play *As You Like It* and another play, *The Skin of Your Teeth*. Even the smallest groups began their guest for outside activities. Russian club went out to see *White Nights* starring Mikhail Baryshnikov, the world renowned Russian ballet dancer. Although it was not the first outing of the Russian club, it was the first of they year. "It's hard to schedule events for such a small group, especially when the students have other things to do for other classes," explained Russian teacher Tanya Morgan.

Outside activities were both educational and fun, however the grim fact that they would have to be taken any time except on school time remained. "When my French III class wanted to go see two plays, both of them were turned down," said French teacher Joni Caldwell. Thus the year was a touch and go situation.

-Todd Vallier

Look at that

Members of the Fine Arts Club ponder over a piece of modern art in the Meadows Museum of Art at S.M.U. The newly created Fine Arts Club proved to be one of the more active clubs by going to plays, museums, food festivals and other cultural activities. Photo by F. Harris

Feliz Navidad

The joy of giving was the only motivation for the ESL Club's trip to the Lakewood Elementary school where they gave a class of bilingual students presents and other goodies. Portraying Santa Claus, senior Miguel Celestinos gives a fourth grade student some socks and a popular transformer toy. Celestinos drew the boys' name a few days before the field trip so that he could have time to go out and choose the gifts. Photo by A. Bobadilla

What a steal

While visiting the planetarium at the Science Place in Fair Park, senior Nini Zarzuela and junior Karla Gurson look at some tiny seashells in a jar. The Science Club tried to further the interest of students in the field of science by taking more educational and exciting field trips. Photo by D. Green

Award winner

Todd Vallier explains to Linda Villarreal and Dee Geiger the layout design that won him an Honorable Mention at the Journalism Educators Association's convention in Cleveland, Ohio. Students attending this conference paid their own way and competed in similar competitions against other students across the nation. Photo by J. Barton

Tis the season

ESL's club sponsor Anna Bobadilla begins the introduction of elementary students to their high school counterparts. The ESL Club members each had an elementary student to buy one gift for. Due to their unexpected arrival in Dallas the ESL Club decided to adopt their class and throw them a small Christmas party.

Pursuit

At the traditional Christmas party for the yearbook and newspaper staffers, staffers Robert Berry, Joe Lopez and Todd Vallier enjoy talking and playing trivial pursuit at the party. Yearbook and newspaper staff alumni were also allowed to attend the party. Photo by P. Woodberry

Chopsticks

Learning the chopstick dance was one of the neat things about being in a small club. Asian dancer Carole Herndon performs the dance at a performance for the holidays. Photo by T. Vallier

Tree trimmings

Senate officer Steve Autry puts decorations on a Christmas tree that was donated by the Magnolia Seed Company. Senators asked each club and cluster to make a special ornament for the tree. Photo by B. Davis

During the holidays, many clubs and organizations found that they could

Party all the time

While department stores counted their Christmas profits, their Skyline counterpart, the D.E. Store, looked forward to giving away a portion of theirs.

As one club caught up in the Christmas spirit, D.E.'s 40 members took a field trip to Sears, escorting children from Marrilac Social Center. Each child was given \$15, a discount from Sears and help in selecting a gift.

"This project was designed to show them that there are better things in life. The gift wasn't the point," said Denice Golden.

Things didn't go as smoothly as language clubbers planned, when the International Language Dinner Festival was cancelled when weather forecasters predicted an early winter storm would shut down Dallas. The clubs planned to share foods, customs and fun, and to collect toys for needy children. Instead, lockers full of tacos, eclairs and borscht returned home to be eaten by family members; and plans for Christmas giving had to be revamped.

Spanish members held off to Dec. 20 when they shopped for Christmas dinner and gifts for a needy family. French clubbers collected donations for a needy child in a French speaking country.

"Just being able to help others at Christmas gives you a warm feeling inside," explained Spanish Club President Gloria Limas.

Senators used their party to help others as each senator used a toy as his ticket to the party.

"We have these projects because it fits our purpose in serving the community," said student body president Paul Petersen.

Officers took the gifts to a needy family Dec. 23.

Not all the Christmas spirit was used to

help others. Some was used just to have a good time and spread cheer. The Spanish club took members to the Science/Engineering magnet at Nolan Estes plaza where they participated in a Carol Festival.

"It was an event aimed at bringing the different language groups within the district together. I really enjoyed it, but unfortunately we didn't have adequate representation from Skyline", said Spanish teacher Anna Hodges.

Yearbook and newspaper staffs had a party at adviser Judy Babb's house. Food, gag gifts and "the world's most important Trivial Pursuit game" were the order of the evening.

"This was a fun way to spend Christmas because we were with the people that we had to work with everyday. It was fun to spend time with everyone in a more relaxed atmosphere," said editor Todd Vallier.

Christmas plays and performances also signaled the season as the Asian club acted as the opening act for the French Club's play, *Joyeux Noel*. The Dec. 19 performance enlisted Asian club members as chopstick, cup and Samurai dancers.

"Even though not many people came to our performance, we still had a lot of fun showing off all of the hard work that we had practiced so long for," said Asian Clubber Carole Herndon.

The French Club divided up by level with French III presenting the play, French II singing the French National anthem and French I singing carols at the reception which followed the play.

"Helping someone else have a nice Christmas left me with a warm feeling for my vacation," said D.E.C.A. member Lori Holy.

-Cherie Coulter

Food for thought

Giving food to needy families for Christmas was the purpose of FHA's "operation food basket." FHA member Pam Rask, along with the helpers at a warehouse, fills the baskets full of food. Later, all of the FHA members that helped took the baskets to the families. Photo by D. Burris

Care to dance?

Spanish dancers Shun Nettles, and Rosie Ochoa come on stage to perform their dance for the language day festival. Other language clubs participated in the festival which required a lot of hard work and practice. Photo by T. Vallier

Waiting for curtain call

Getting to see *A Christmas Carol*, meeting the cast of the play and getting a free ticket to go were some of the rewards of being involved in ESL. ESL members Maria Rodriguez, Kim Nguyen and Eric Nava wait outside of the Arts District Theater for the play to start. Photo by B. Kirby

Spreading The News

Words of love

Buying a val-o-gram, Cheryl Blair sends a valentine greeting to a friend. Val-o-grams were a new fund raiser for the Key Club this year. For fifty cents someone could send a message of their choice to their valentine. Photo by L. Villarreal

Read it all

Taking in the latest news, freshmen Tracy Adams and Lori Bennett read the newspaper. The *Skylark Tribune* has been known by three names since the paper began. First was the *Skylark News*, the came *Skylark*, and finally the name was changed to the *Skylark Tribune* in 1979. The paper now sells 1,000 to 1,800 copies per issue and cost 25 cents. Photo by R. Jernigan

Letting people know

Organizations

Clubs did lots of things to tell members about things that were going on. Methods varied but the goal was

etting the message across

What's the best way to tell someone about an earthquake, walk to help the hungry or even a club meeting? Clubs differed on how they communicate, but the important thing was getting the word out.

Announcements over the public address system to keep their members informed didn't always work. "Sometimes you don't hear the announcements because people talk or you are getting ready to go and don't listen. They aren't the best way to stay informed," said German Club member Cressida Henderson.

Some clubs announced the meetings during class. French Club members were told of meetings by sponsors during class while the drill team got most all of its information during first period. "The best way to keep up with what is going on is not to be absent,

especially during football season," said drill team member Sara Norris.

Posters also spread the news. "There's usually a poster somewhere members can see it. You can probably see a poster more easily than hear the announcements," said French Club member Sandi Wolchansky.

The Key Club had a word-of-mouth approach to meetings. "We have phone committees to tell people about our weekly meetings," said president Sam Worthington. The Art Club also used word-of-mouth and a monthly calendar to keep students informed.

Although clubs and organizations didn't use all the same methods of spreading the news, students still managed to stay informed.

Because of pressures from home and clubs, students had to work harder at their grades a different way, but they all were

Keeping it under the hat

Next, please

Serving cokes to a thirsty crowd, student body president Paul Petersen gives up part of his evening to help out the senate. Members of clubs had to make time whenever their club needed them. This sometimes meant time that would have been spent on homework. Photo by J. Reynolds

"Failure notices come out next week!" These words seemed to haunt everyone. Just the thought of getting a failing notice—and maybe even getting an F (now a 69 or lower) on a report card—made every student wish that he was out of high school. Students involved in clubs and organizations had things even worse. Those students had to keep up their grades while trying to be active in their clubs.

When parents received bad report cards, the punishment was often grounding for an entire six weeks. But, students managed to get "ungrounded" for a night that included a club activity. Parents often were lenient when it came to their children's involvement in school-related activities. Some found it a little hard to try to juggle keeping grades up, while trying to be very involved in their club.

Being involved in clubs meant attending meetings, going to activities sponsored by the club, selling candy or other goodies and going to the various parties.

"I think that if someone joins a club, he should feel that he should support the club by attending the activities," said French clubber Sara Norris.

Often, when clubbers would find out about a certain activity, they would try to plan getting their homework finished early.

"Although grades aren't really a factor in being involved in Key club. When I find out that we are participating in an activity, I try to find out in advance about homework so I can go home and get it done before I attend the activity," commented Darrin Diffie, Key club member.

Some students found out there was just not enough time to be involved in a club.

"I have to work at my job every day and do my homework, there just isn't enough time to be involved in a club. I really admire people who can find enough time in their schedules to fit everything in," said senior Scott Young.

It took a lot of patience and hard work for students who were active in clubs to "fit" everything in; but for those who did, it was well worth the effort.

—Cherie Coulter

Casual talk

Socializing at the Mardi Gras, senior Leslie Strother and junior Traci Demus get to know more about each other and the different languages offered at school. Students considered the Mardi Gras a fun way to learn about different cultures while they danced and ate new foods. Photo by J. Lopez

Benched

Being in the band didn't always mean getting to play, as these members found out. Failure meant having to sit on the sidelines for the game. Once grades were brought up a member could perform again, but until then he could only cheer on his team. Photo by J. Reynolds

An evening out

Working on layouts that will be in the yearbook, staffers Cheryl Blair, Tiffany Davis, Pat Keith and editor Tammy Johnston stay late on Tuesday night. To ensure publication, Tuesday nights were reserved for work on the yearbook. These Tuesday nights lasted from 4:00 to 7:30 and from October until March. Photo by D. Green

C onducting a classic

Being a member of an organization was great, but being an officer meant more responsibility and dedication. The officers were the pace-setters.

They were the outgoing ones; the students that liked being in charge, showed leadership abilities, and became the leaders of the pack. They were the officers of certain clubs and organizations. They were also the ones that made a club exist.

Being an officer wasn't always easy. Obtaining the position wasn't always easy either. Students had to prepare speeches and prove themselves capable of the job. They were usually selected by vote, such as senators, but sometimes the sponsors appointed the positions as with the Spanish Club.

"I want an officer who is intelligent, hard working and dependable," said Spanish Club sponsor Ramon Arguelles. "They must also be enthused about things and have good moral character."

Duties of an officer ranged from arranging and conducting meetings, organizing fundraisers to planning group activities. Each officer had specific duties and responsibilities which he was expected to carry out to the best of his ability. This required a lot of hard work plus a lot of time, dedication and devotion.

Some students even held more than one

office position. Senior Marylin Huff was president of MAO, Science Club and National Honor Society. Gloria Limas was president of the Art and Spanish clubs.

Despite the number of positions one held, the important factor was seeing to it that each club remained active and members remained interested. This was sometimes hard to do when schedule conflicts occurred. "You have to compromise your time with the club's time in order to get the best possible results to benefit both," said Limas. "There would be parties and meetings scheduled for the same time and it would be hard to work around. I'd usually get the club members to help out."

Two leadership positions people rarely thought about were the drum majors and publication editors. These positions required a lot of hard work, but were less obvious because of the fact that they affected fewer people and required special skills—a knowledge of music or journalism.

No matter what office position one held, they all had common factors—leadership and responsibility. These were the characteristics that allowed people to work together to make a club the best that it could be.

Lisa Kahanek

Coke is it

Conducting music with a coke in one hand is typical of drum major Cris Asensio. Drum majors usually switched duties and either conducted music, wrote down demerits or ran errands for the band. This was Asensio's second year to be a drum major. Photo by L. Kahanek

Any suggestions

What's Cookin'?

Even though smaller clubs were seldom noticed, they carried on as any other more popular club.

Every Thursday after school, members of the Asian Club met to practice Chinese and Japanese dances. Besides learning the steps to the dances, other activities included selling fortune cookies and throwing a Chinese New Year's party.

"I enjoy being a part of the Asian Club," said senior Donn Cross. "I really love dancing and I feel it was something different."

Even though smaller clubs were seldom noticed, they carried on as any other more popular club.

"We added extra activities such as seminars, dinners and speakers and participated in art competitions to keep it alive," said Art Club sponsor Floretha Williams.

Students, as well, found the club to be somewhat interesting.

"Being a member of the Art Club was real exciting," said junior Jaime Villela. "It brought us closer together due to the cooperation we had with each other," he said.

"It gave us a chance to go to different museums and learn about different cultures,"

said junior Dana Williams.

The Fine Arts Club, a newly established organization, hoped to promote appreciation of the fine arts in Dallas by attending performances and museum exhibits.

Members found the club exciting and interesting. "We took a trip to the Dallas museum of Fine Arts to see *Skin of our Teeth*" said senior Doug Thompson. "We also visited the Meadow Museum at SMU to see art related to mythology."

"It was really enjoyable. We attended theatrical performances and other activities," said senior Steve Johnson.

These clubs were not only unrecognized but also small compared to the larger clubs such as the Spanish, French, Keywanettes, Key and German clubs, yet they continued on in high hopes and great spirits.

"We may be small, but we've been successful so far," said Fine Arts sponsor Patsy Niedecken. "We have a good crew of creative students."

Let the activities begin

Clubs gave students a chance to get away from everyday classwork. They also tried to arouse interest among students by offering different activities.

"What are the requirements?"

"There aren't any, just fill out this form, remember to pay dues, and consider yourself a member."

Most language clubs didn't require a person to take that particular language in order to become a member, but most people didn't realize this fact.

"I've always thought that you had to take the language to become a member of any club," said sophomore Mary Singer.

"If I had known about this fact earlier, I would have already joined one of the clubs," said junior Leon Simon.

Clubs tried harder than ever to stimulate a positive interest among students. By so doing, they participated in numerous activities.

During the month of October, all language clubs united to raise money to aid World Hunger. With an activity called "Cropwalk". Even though it required walking 10 kilometers (6.3 miles), students found it a joy to help out in raising money for the cause.

"It was fun even if it did require lots of hard exercise and work," said Spanish club member Lupe DeLeon.

"To outsiders, it would probably seem totally boring, but it turned out not be a lot more fun and successful," said French club member Linda Amie.

Clubs participated in weekend events because they weren't able to have any social activities during school hours. Members found weekend activities exciting.

"Sometimes I didn't have anything to do over the weekend, so club activities came in handy," said ESL club member Edith Hernandez.

Clubs played an important part throughout the year because it allowed time for relaxation from everyday class work and gave the opportunity to meet other people.

"I enjoyed participating in different club activities, because you were able to do neat things and meet other people at the same time," said German club member Tracie Collins.

"Clubs give you the opportunity to share ideas," said Italian club member Martha Zamarripa, and teaches you the art of cooperating with each other."

-Regina Reed

Busy as a bee

Preparing for the Mardi Gras that was to take place after school, French club members Ligia Tovar and Jenny Robalino help out with the decorating by hanging streamers above the doorway to the cafeteria. The purpose of Mardi Gras was to write all the language clubs together to have a good time while celebrating "Fat Tuesday." Photo by F. Harris

All ears

Part of the FHA program included having guest speakers speak out on certain issues like smoking, child development and vocational education. To give students an insight on home-economic related occupation, speakers from various businesses like the Federal Reserve Bank and the Dallas Power and Light Company gave FHA members advice on how to manage a successful career. Photo by R. Jernigan

Cultural awareness

Showing one of her slide presentations on French castles and cathedrals to the French Club and guests, Nadine Faulk takes time to go into further details on one of her slides. The slide show took place in the cafeteria after school one day to make the students more aware of culture. Photo by F. Harris

All work, no play

Getting ready for a speech tournament, a student from Bryan Adams (not shown) asks for assistance from helpers in the auditorium. Senior Michael Swanberg looks on as he waits for his turn to draw a topic for the tournament. After selecting a topic at random, participants had only thirty minutes to do research on that topic. Photo by J. Lopez

Party time

Many activities were planned for the Mardi Gras Celebration. Among the activities was a dance contest and an election of the Mardi Gras King and Queen. Students had a chance to socialize, eat, drink and dance. Sampling the grapes which was one of the foods available for students, Jenny Robaline and Sam Worthington use the time to socialize with Ligia Tovar and Adrianna Cervantes. Photo by B. Collins

Let's play ball

Taking time out from a visit to the State Capitol the Governor's mansion and meeting with Attorney General, ESL members decided to have a picnic at Towne-Lake in Austin, Texas. Edith Hernandez, Esperanza Ahumada, Pinthary Sye, Fabiola Parra play soccer while waiting for their meal of turkey, ham and cheese sandwiches with the standard chips and fruit one usually takes on a picnic. In the know

Party time

What a neat way to start off the year of many activities, an ice cream party! Senior Nancy Lawhorn drinks a coke at the NHS, MAO and Science party. Lawhorn is a member of each club like other friends. Activities were usually combined since the same members were in each club. Photo by A. Williams

The brains of the school. Everyone had brains, but these people put them to use. They joined such clubs as Mu Alpha Theta (MAO), National Honor Society (NHS) and the Science Club.

They weren't only stereotyped as being brainy and super smart, but they were also stereotyped as being no fun. This is where the stereotyping went too far.

Membership of these clubs often overlapped. They all thought on the same level and were interested in attending math contest and hearing lectures on science. They were also interested in parties and having a good time. Being a member of these clubs meant doing all of these things and more.

"On weekend nights, when we usually had the parties, you didn't have to worry

about homework for a couple of hours," said science club member Deidra Franklin. "It's like you get to meet people all over again."

Other activities other than parties that members enjoyed ranged from various math contests to visits to the planetarium to see and hear about Halley's comet. NHS also viewed a play **The Skin of Our Teeth** with the Fine Arts Club.

"As president, I stay to organize the activities and let everyone know what's going on," said senior Marilyn Huff. "Being president of three clubs is hard, but since a lot of the same people are in all clubs, we sometimes combine parties and stuff, we have a lot of fun."

-Lisa Kahanek

Time out for snacks

Eating ice cream was one of the neatest ways to beat the heat at the first NHS, MAO and Science party. Senior Joe Hill and Chris Spikes sample the ice cream while talking with friends. Photo by A. Williams

Future preparations

BACK TO THE FUTURE

Preparing for tomorrow was a vicious circle for organizations—in order to be ready for the future, they were constantly

Looking ahead

Getting ready for the future was a perpetual cycle for organizations. The organizations went through constant preparation to be ready for the near or distant future.

A typical type of preparation for the future was inductions into clubs. "I think that inductions save time. Since requirements were tight and a person had to have a good standing with teachers, only a limited amount of members were chosen," said senior NHS secretary Jennifer Bozick.

Applying for membership, although usually done in the fall of the upcoming school year, was also done the semester preceding the pending school year. "We tried to get applications for journalism squared away early so that the counselors could get

schedules straightened out, and also in order to get an idea of the size of the next year's staff," said yearbook editor-in-chief Todd Vallier. The staff offered membership applications to the students during the month of February.

Trying out and running for a position in a club was a more challenging way of attaining club membership. "Trying out was a fair way for getting into a organization because the judges actually see you. When you just submit an application, you're just another person," said senior cheerleader David Lopez.

No matter which method an organization used to obtain members, it was sure to get people.

Eligibility

Those students who considered trying out for junior varsity cheerleaders also had to face the issue of eligibility, which was presented at the tryout meeting. Whether or not a person was passing his or her classes determined if he or she could attend morning practice sessions. Photo by K. Garcia

Getting things done and paid on time haunted many an organization at school—members of these organizations often found themselves desperately

Searching for time

"That candy money is due when?!"

"What the @#i★%! Do you mean that I was supposed to be finished yesterday?"

Deadlines. Organizations can't live with them, but they can't live without them. To the teachers, deadlines meant urging the students to meet them. "I didn't think that students understood how long it took to do things—procrastination was a natural habit, and students often didn't use their time wisely," said journalism instructor Judy Babb.

To the students, deadlines signified personal sacrifices, especially those of free time. "I had to take some of my journalism work home over the weekends to finish it and my social life went to hell," said chief sports editor Robert Berry.

One type of deadline which plagued all of the various organizations was the deadlines to turn fundraising money in. "What

students were taught at home determines whether or not they know the importance of getting dues paid on time," said assistant band director Kevin Baker.

Sometimes getting things done was out of the students' control, particularly collecting profits on fundraisers. "Sometimes the problem was the quality of the products—people would order something and then wouldn't pay up when the order came in because it wasn't what they expected," said sophomore FHA member Deidra Summerfield.

The multi-faceted "gem" called deadline was by no means a perfect stone, but it was a very important one. "If it wasn't for deadlines, no one would try to pay for or do things on time," said head band director Jim Edgeton. Without deadlines, organizations would be practically non-productive.

-Pam Woodberry

The write stuff

Being on both the *Tribune* and the *Origin* staff proved to be a challenging task for junior Julia Barton. Barton was editor-in-chief for the *Tribune* and faculty editor for the *Origin*, and meeting deadlines predominated her daily tasks on these staffs. Photo by D. Green

Work 'n Play

Striking up a tune

"When are you going to pick up your eMe-eMe's, muchacho," yelled Ramon Arguelles as Joe Student quickly rushed to his next class. "Later, Mr. Arguelles," Joe replied as he muttered under his breath "that makes one more box to the six I already owe."

Having to sell fundraising items such as M&M's and Snickers were just some of the things members had to do in order to raise money for their organizations. But the real problems was finding the time to complete school work and still remain active in club activities.

"I don't have time to do anything. I never see my family. I rarely have time to do homework. Sometime I feel like I live at this school. I sometimes hate it so bad I want to quit and never come back," said student life editor Dee Geiger.

Doing well in one's academic courses also played a vital role in the participation and activities of all organizations. The no-pass, no-play rule forced students to put stricter standards on studying and reduced standards on social activities.

Because of this rule, many organizations suffered a loss of student participation. Band, drill and athletics lost up to one third of their members.

"We had to readjust. We did this by making up a totally new routine and overall I think we did pretty well," said band director Jim Edgeton.

The no-pass, no-play rule also forced students to spend more time with their books and allowed less time for club activities. Those who studied harder and managed to work within the rule by dividing their time and energy between the many organizations found that their "normal" life was sometimes hard to keep up.

"I have too much to do and not enough time to do it all, I sometimes feel as though I just can't make it," said junior Lottie Wilson.

Balancing time between clubs was difficult to do since some of the clubs had their meetings simultaneously.

"It's kind of hard to attend the Spanish club meeting and French club meeting when they are held at the same time, you just have to choose," said sophomore Fernando Munoz.

It took a special type of person to remain active in more than one organization and still keep up with one's grades. This person had to have dedication and pride. They also had to set priorities.

"You just have to do without some things," said senior Charles Hudgins.

Enjoying what they did was the main reward. Being able to participate and enjoy themselves with others was well worth the time and effort.

"It's great to find someone doing the same things you like to do said senior Gary Smith.

Just a

GAME

Breaking a sweat

Size and dedication gave the athletic department the winning edge in competition against other high school teams. Even with the continuing enforcement of H.B. 72's no pass-no play rule, the Raiders still managed to take home district championships in golf, tennis and volleyball.

However, because of the no pass-no play rule, player shortages presented a problem for teams. In fact, the freshman football team was eliminated after five games and many of the JV football players moved to the hole-punched varsity. The JV football team was left without a quarterback in mid-season and the quarterback for the eliminated freshman team was assigned to take over as starting quarterback on the JV team. This switch-a-roo of players from one team to another was vital for the declining population of some teams.

Still worse was DISD's interpretation of H.B. 72 that would not allow golf and tennis to compete during the fall season while their neighboring district teams did.

In this football game against Samuell, running back Michael Conners receives good coverage from tackle Jeff Thomas. Conner was able to move the ball 27 yards in 5 carries. Skyline lost this game 14 to 2. Skyline's preseason play was a disappointing two wins and three losses. Photo by D. Green

Sports

Mike Teal

With an impressive district batting average of .421 and an overall batting average of .313, first baseman Mike Teal contributed a great deal to the baseball squad.

Teal, who was voted first team all-district for the '84 season, is an outstanding defensive first baseman. Head coach Tony Tovar said, "Teal makes good contact with the ball and he also a good pressure hitter."

In off season play, Teal lead the team with a batting average of .500. "Teal is a good leader and a hard worker and also a future team captain," said Tovar.

Consistent

Wind up

With an off-season batting average .400 pitcher Herman Johnson just could not pull this one off. Raiders lost the third game of the North Garland series 10-8. Johnson returned to the squad in hopes of brooming the starting Raider pitcher for the 86-87 district season

Gangway

Herman Johnson dodges a inside fastball from a North Garland pitcher. Raiders went on to win the game by a score of 4-3. Johnson who had an off-season batting average of .400 will be returning to help the Raiders in producing another winning season with a season record of 17-11 on last year.

Strike Time

Pitcher Eric Rosar helped the Raiders produce a 4-3 win in the first of the against North Garland. Rosar, who had a .410 batting average in off-season play could not produce another win as Raiders lost the series 1 game to 2.

Though Skyline had a new coach and pitching staff, the Raiders still

Wound up as winners

The good news was that the Raiders won the bi-district championship. The bad news was it was the North Garland Raiders instead of the Skyline Raiders.

Skyline breezed through the district season destroying their opponents, only to lose in the first round of the bi-district playoffs.

The Raiders, headed by a strong hitting attack, romped past their district opponents enroute to an 11-1 district record.

A new coach and a relatively new pitching

staff played a major role in the team's slow season start of 1-4.

Coach Tony Tovar came to Skyline from W.T. White to replace the late coach, Harold Hughes.

Senior lettermen Joe Dixon, John Marek, Jason Dean, Craig Blandford and all-state shortstop Rod Murrell, along with first baseman Mike Teal, made the transition easier with consistent performances.

"I've been a head coach before so it's not new to me; but it's a

challenge and I'm initiating my own program," said Tovar.

The loss of graduate John Marlow, the team's leading pitcher and inspirational leader, left the team with a young and untested pitching staff.

Eric Rosar (4-5, 269 ERA) and Robert Vauric (5-4, 369 ERA) matured as the season progressed and kept the Raiders in several games.

Early in the season, the Raiders lost several games because of poor defense.

In an 8 to 2 loss to

North Mesquite, the Raiders allowed four unearned runs. Marek said, "Against North Mesquite, we had one bad inning with a lot of errors and they scored eight runs."

The Raiders' tough schedule did not allow much room for error. "We've played some really tough games, but we got better every game," explained Tovar.

Once the district season began, the Raiders conquered their early season problems

cont. pg. 136

North Garland won bi-district playoffs, but Skyline went down

Swinging

cont. from pg. 135

and coasted to 6-0 district record.

"We were playing much better, we're pitching consistently and we're hitting better," said Tovar.

After allowing 34 runs in their first eight games, the Raiders allowed only eight in their first six district games.

Their hitting also picked up as they rolled over SOC (12 to 0), Velt (13 to 3), BA (12 to 0), and Samuell (11 to 1).

The Raiders, who won 19 straight and 29 of their last 31 district games saw their winning streak come to an end against Spruce, 5 to 3.

Spruce struck for

five runs and seven hits in the third inning, while limiting the Raiders to only two hits.

The Raiders met BA in the final game of the district season to determine the first place finisher. As with their first contest, the Cougars were no match.

Rosar allowed only three hits and Blanford, who had three hits, drove in three runs as Skyline won 11 to 0, setting up their bi-district confrontation with North Garland.

Both teams went into the third and final game of the series with one game apiece, the first won by North Garland 5 to 4 and the second by Skyline 9 to 4.

North Garland

drove in one run in the bottom of the first inning to take the lead, but Skyline quickly tied it up when, in the top of the second, Craig Blanford hit his second home run of the series.

The lead was once again taken by North Garland in the bottom of the second and was increased to a 10 to 1 lead by the bottom of the sixth.

Skyline rallied in the seventh inning, scoring six more runs including a home run by Herman Johnson; but it was too little too late, as the game ended there 10 to 7, ending with it Skyline's hope for a state playoff position.

Providing other team's defeats was Skyline's main

Service

It's not easy at the top.

Or so the tennis team learned after winning the district championship in '84. The team was under a lot of pressure for the '85 season since they were expected to perform as well as the year before.

But the Raiders were confident that this season would be successful just as their previous ones had been. "I think we're going to do really well," said veteran Laura Gomez, "I'm really confident since we did so well last

year!"

To insure that they would stay on top, the Raiders started practicing before the end of the first six weeks, while the season did not begin until March. Only bad weather could halt the team's progress.

The work paid off as Skyline not only won district again, but went undefeated doing so. The 10-0 season record included the Raiders final victory over arch rival Bryan Adams. For coach Gary Newsome it meant 10 more wins to add to his impressive

four year record of 33-5

Veteran players like Josh Webber, Ryan Burgess and Darren Burgess for the boys; and Donna Smith, Rhonda Southard, Julie London and Laura Gomez for the girls, dominated the season despite the fact that the Raiders gained many new players from try-outs.

As for the team's future, Gomez said, "We have a common goal of staying number one!"

-Robert Berry

Capturing district championship made the season a

Smashing success

Consistency and talent carried the Raider tennis teams to the top of District 10-A AAAA.

The boys' team, led by brothers Darren and Ryan Burgess, placed first in district. Darren, the team's number one singles player, placed second in the overall district standings. Ryan and partner Josh Weber placed first in overall district doubles.

The girls' team placed first in district

with helping hands from Dawn Smith, Rhonda Southard and Julie London. Smith placed first in overall district singles while Southard and London placed first in overall district doubles.

Skyline finished in the top slot with Samuell and Bryan Adams following in a close second and third place, respectively. The district championship was the third consecu-

tive one for the team.

"We have a lot of depth," said tennis coach Gary Newsome. "We should win district again this year."

Senior tennis player Darryl Robinson has similar feelings. "We'll get it (district championship) again. It's expected. Other teams fear us."

With boys' players Darren and Ryan Burgess, John Bowser, Darryl Robinson, Mar-

kus Zimmerman and Glenn Robinson; and girls' players Southard, Smith, London and Jeri Davis as returning players, both teams "look strong" according to Newsome. Rachel Clem, a promising newcomer, is expected to do well also.

"If grades don't kill us, we should have a good year," said Newsome.

-Kimberely Prince

Up in the air

With a high leap, Julie London returns her opponents serve during a practice game at Skyline's tennis courts. The practices, which began the first six weeks, helped to make the Raiders district champs. Only adverse weather conditions could halt the practices. Photo by M. Philips

Net profit

Rushing the net, Julie London attempts to return a lob during a doubles game against Roosevelt. London and her partner, Rhonda Southard, shut out the opposition which set the tone for the rest of the team's season. Photo by D. Green.

Let's swing

An overhead smash is Julie London's response to her Roosevelt opponent's high lob. This return put London ahead by a score of 15-love. She kept this lead and prevented her opponent from scoring the rest of the game thus winning handily. Photo by D. Green.

Smashing

An overhead smash begins Rhonda Southard's game against a Roosevelt player. For Southard, singles were not as desirable as doubles, the game in which she and her partner were district champs. This did not keep her from winning this singles match, though. Photo by D. Green.

Return for deposit

Sending back her opponent's serve, Laura Gomez feels less than enthusiastic about her shot. She need not have worried though since she caught up and passed her opponent after a shaky start in this practice game. The team practiced during seventh period as well as after school. Photo by M. Phillips.

The edge

Senior Aretha Adams edges out a South Oak Cliff runner in mile run at the Air-line Relays. Photo by J. Lopez

Statebound

Good sport

Senior Herb Williams shows good sportmanship towards a Roosevelt runner at the Leon Hayes Invitational Track Meet. Williams joined the team at mid semester and ran "scratch leg" (first runner) on the 800 meter relay for ineligible trackster Sam Franklin. Photo by J. Lopez

Both track teams had to overcome many

Hurdles

Successful seasons are usually characterized by teamwork; but for both the boys and the girls '84-'85 varsity track teams, it came in the form of individual achievements.

The Raiders began the season with 79 tracksters, 30 of which were lost to the infamous House Bill 72 "no pass, no play" rule at the semester. The losses restricted the track program and forced the Raiders to lose valuable time regrouping.

The loss was re-

flected at the Spruce Invitational, the year's first meet, at which Skyline finished seventh. The Raiders improved as the season progressed, winning four of their last nine meets.

Larry Fuller was instrumental in the team's success; never finishing below third in any meet, and being the first person in five years to go the state meet from Skyline.

Along with Jeff Thomas, who was the only junior to qualify

for the regional meet in the shot put, Fuller provided the key points which often made the difference between a third and a fourth place finish.

"I'm spending more time on the discus now because I know Jeff can take first in the shot and if I can do the same in the discus, it means valuable points for the team," said Fuller.

Junior Michael Johnson and senior Billie Smith gave the Raiders a strong 1-2 punch in the spring events.

Johnson, who had already received recruiting letters from University of Washington and University of Texas at El Paso, was ranked in the top 10 in the 200m dash throughout the year.

Johnson finished third in the district meet behind Spruce junior Gary Henry and Roosevelt senior Roy Martin, who were both ranked in the state's top 10.

Smith was also ranked in the area's top 10 in the 100m several

cont. pg. 145

-Sam Franklin

Senior Sam Franklin, ruled academically ineligible last season, hopes to reach state in the 800 meters and mile run. Franklin set all 800 meter in mile records for the freshman and sophomore divisions, which currently still stand.

Last season, after placing first in Irving High School's Cardinal relays with the time of 1:57, Franklin's chance for state was cut short when he was deemed ineligible, causing him to miss district and regional meets. "After seeing that H.B. 72 wouldn't change for me, I had to change for it, that's the attitude many athletes have. If they don't realize that they'll pay like I did," said Franklin.

Superman

Able to leap tall buildings in a single bound, it's a bird, it's a plane, it's junior Johnny Allen running the 300 meter low hurdles in the district meet at Loos stadium. Allen placed second and went on to regional to finish eighth.

cont. from pg. 142
weeks in the season.

Senior Edward Elkins, who was overlooked by many, finished first in the 800m at the district meet and ninth in the regional meet.

For the Lady Raiders, the year was a repeat of the previous one as they once again took third place in the district behind South Oak Cliff and Roosevelt. This was not entirely unexpected for, as coach Mary Thomas said, "We knew that we did not have a chance as a team."

Pouring it on

Senior Aretha Adams finishes first in the 800 meters. Adams also ran the 400 meters and mile run. A four year track member, Adams is ranked as one of the best all-around track athletes. Photo by J. Lopez

As a team, the Lady Raiders may have fallen but several members still were able to make the season successful. Many of the runners were able to place in the district meet, including Carvena Harris whose 35 foot jump gained her a first place in the triple jump.

Aretha Adams placed in two events at district with a first in the 800m and a second in the 400m. Adams also ran the anchor leg of the mile relay which finished second with a time of 4.04 minutes. At the regional meet, she took third in the 800m, failing to qualify for the state meet by one second.

"I was torn a part at

regionals. Next year I am going to warm up more before I run," said Adams.

The Lady Raiders did have one member of the team go to the state meet as Marshette Reddick placed second in the 100m in both the district and regional meet. Reddick then placed fifth at the state track meet with a time of 11.8 seconds, her season best.

Both track teams have proven they have the individual talent needed to win district. All they must do is combine it into one winning team for next year.

Brian Saddler

As a fourth year veteran, Brian Saddler was the main drive that took the golf team to the district championship. A third year letterman and winner of the Unity Award, Saddler took over as the team's main player after Darryl Fuston graduated.

Coach Sophie Redditt said, "Brian is the backbone of the team. He does his best to help in every way."

Golf

Brian Saddler led the golf team as they

Drove to first

He looks down on the green. His ball is 15 feet away from the cup. Sinking the shot will clinch the district title for his team. Missing it means a whole year before they get the shot to be champions again.

A hush falls over the crowd, as he silently lines himself to make the putt. He says to himself over and over again, "Don't worry, you can do it! You can make this putt!" Keeping his hands steady, he swings his club back. It hangs for a split-second before it comes back and makes contact with the ball. He closes his eyes for he does not want to see the results.

Ever so slowly the ball moves ahead over the patch of green towards the cup. Ahead of it lies the possibilities of moving onward and perhaps going all the way. Behind it lies all the sweat, pain, and work his team put into the season just to get this far. The ball rolls to the edge of the cup and hangs for one moment, and then falls in as if pushed by some unseen hand. He opens his eyes in time to see it fall in and feels himself being lifted off the ground by his teammates as a cheer rises from the previously silent crowd.

this dramatic happened to the golf team, the end result was the same. The Raiders took the district title going undefeated with a 10 and 0 record to their credit.

The team's chances were not all the certain at the beginning of the year though. They first had to contend with the void left by Darryl Fuston's graduation. Brian Saddler filled this void.

Saddler, a third year letterman, had been on the team for four years. The first three years were spent in the shadow of Fuston.

"It was frustrating. Fuston was better than I

Although nothing

cont. pg. 149

Watching out. As his ball arches toward the green, Brian Saddler watches it to its destination. Unfortunately the wind caught the ball and the final destination was a sand trap. It took him two additional strokes to get it back onto the fairway and yet another to make the hole. Photo by S. Redditt

All Right

An elated Derek Graham cheers as he sees his putt go in to the hole. Graham was regarded as the second best player on the team by coach Redditt. He took second place at the first Roosevelt meet. Photo by S. Redditt.

Roughin' it. In an attempt to get his ball out of the rough, Brian Saddler hits it back onto the green. After which he sunk a four foot putt to go ahead with one stroke under. Photo by S. Redditt

Spectator

While Derek Graham lines up his putt, Mike McDonald watches patiently. Putting areas such as this one allowed the players to practice their putting techniques. The team's mastery over these skills allowed them to go undefeated. Photo by S. Redditt

Swinging time

At Keaton golf course's first hole, Al Hill completes his backswing to drive the ball toward the green. This par four, 404 yard hole was taken easily by Hill in three strokes to put two under par. Photo by S. Redditt

Fore!

On the last hole of the day, Sim Howell makes a long drive onto green. After which, Howell sunk easy one foot putt to finish up four under par for the day. The Raiders won the match against their archrival Bryan Adams. Photo by S. Redditt.

Soaking up the sun

Taking a break between holes, Al Hill stretches out on the ground. Hill then proceeded onto the tenth hole where he went one under par. Afterwards, he finished the course at three under par. Photo by S. Redditt

Packing it in.

One of the more tedious tasks of golf is performed by Brian Saddler, who lugs his bag to the next hole. Unlike the professionals, the Raiders had neither caddies nor golf carts to transport their equipment. Their playing though was professional since the team won the district championship. Photo by S. Redditt

Puttering around.

Coordination and steady nerves combine to make a good putt, as team captain Brian Saddler tries to use both in his attempt to go three strokes under par. He sank the putt and proceeded onto the fifteenth hole to finish the game. Photo by S. Redditt

Tee time.

With his ball teed up, Brian Saddler, the team captain, lines his shot up. This par four, 404 yard hole was easily taken by Saddler with only two strokes. The rest of the 18 holes fell as easily with Saddler finishing the day at four under par. Photo by S. Redditt

The season was in doubt until the golf team

Teed up

cont. from pg. 146

was, but it was good to know I was almost as good as him," said Saddler.

Saddler handled the responsibility well, ranking the number one player on the team all year, as well as being selected by the team to receive the Unity Award.

Coach Sophie Redditt said, "Brian is the backbone of the team.

He does his best to help in every way."

Not that the team needed much help as they beat every other team in the district. Not even their most stringent opposition, Bryan Adams, who came into the next to the last game undefeated, were able to pose a threat to the Raiders, who went away with their perfect record intact.

Saddler, the team

captain, said, "It was rewarding to beat BA twice in one season. We worked hard to beat them."

After having won the district title, the Raiders competed in the Regional Tournament held in Conroe. This tournament was the downfall as they finished twelfth in a field of 15.

-David Green and Robert Berry

Didja know ...

- the Raiders have shut out SOC for three consecutive years
- the defense placed fourth in the area for total defense
- for the past two years the defense was ranked first in the metroplex
- the Raiders went for nine quarters without allowing opponents a score
- the defense has scored in three out of the five district games this season
- the Raiders held SOC to a -7 total offensive yards
- the Raiders blocked a punt in four consecutive games
- during the district season, the defense allowed opponents an average of 6.6 points
- Herman Johnson scored 34 points against Bryan Adams, the Raiders had the ball nine times
- the Raiders have lost to BA twice in 14 years
- the Raiders went for 16 quarters without an offensive score at one point during the season
- Jeff Thomas and Sam Brewer made the most tackles (21) in one game

Tug of war

Kickers Steve Autry and Herman Johnson warm up on the sidelines in the game against Longview Pinetree. The 13 to 12 loss put the Raiders pre-season record to 1 and 1. Photo by R. Kemp

Best foot forward

Junior Herman Johnson splits the up-rights as senior Tony Gray holds. This extra point helped the Raiders defeat the Nacogdoches Dragons, their first opponent of the season, 16 to 14. Johnson led the team in scoring with 34 points. Photo by J. Reynolds

Samuell	2-14
Roosevelt	7-6
Bryan Adams	6-7
4 wins 6 losses	

Jeff Thomas

Senior defensive linebacker and offensive guard Jeff Thomas led the varsity team in sacks. He was also one of the leading tacklers on the squad. By the season's end, Thomas had a total of 83 tackles. "He's our team barber," said defensive coach Joel Ezar. "He cuts down opponents like a barber cuts hair."

A two year letterman and two-time winner of the Wendy Hickman Award, Thomas served as one of the team's captains. His leadership ability gained him the respect of head coach M. McCollum. "He's an excellent contributor on the field and team leader," said McCollum. "He led quietly and did it in a determined way."

Still waiting

during the game against Nacogdoches, head coach M.A. "Red" McCollum anxiously awaits a referee's call. Although the Raiders were penalized for holding, they still won the game. McCollum said penalties were not a factor in Skyline's 7-6 record. Photo by D. Locke

Skyline beat Nacogdoches 14-12 as they Kicked off the year

It came down to the last game for the Raiders. They had to win.

But hopes of making the playoffs died with a 7 to 6 loss against Bryan Adams.

"We had more talent than B.A. We should have won," said defensive coach Joel Ezar.

The rest of Skyline's 4-6 season also was like this. They had the talent to win, they just didn't.

"Our biggest weakness was that we overlooked a lot of our games," said defensive player Claude Jefferson. "We decided before the game even started that it would be an easy win. As a result, we didn't concentrate as much as we should have and the other teams usually

took advantage of the situation."

Poor concentration and mental mistakes combined with an inconsistent offense to result in the team's biggest weaknesses.

"We were not very consistent overall," said defensive coach Joe McCown. "Our passing game was not very good and the defense was a little susceptible to the pass."

At one point in the season the team went 16 quarters without scoring offensively. It had to rely on the kicking game and the defense for all of the points.

"We had a pretty good team," said defensive player Sam Brewer. "There were a lot of times the defense would give the offense

good field position, but the offense couldn't produce."

The Raiders also had problems with the punting game. "Early in the season we had a hard time finding a good center to snap the ball to the punter," said special teams coach Larry Covin. "We also had to experiment with different punters."

The team's strengths, however, overshadowed the weaknesses. The team's biggest strength was their defense, which was ranked fourth in the metroplex.

The defense, who nicknamed itself the Dogs, was led by returning lettermen Jeff Thomas and Fred Adams. Sam Brewer

cont. pg. 152

Defensive Stats

92 first downs allowed

660 passing yards allowed

1,054 rushing yards allowed

13 interceptions

28 fumble recoveries

Give me five!

Congratulations were given to senior Fred Adams by senior Chris Thomas for Adams' stopping a SOC first down attempt. Skyline had its best defensive game against SOC, allowing them a dismal negative seven total offensive yards. The Raiders dominated the game with a 9 to 0 victory. Photo by E. Aviles

Throwing down

By slamming this Bryan Adams player to the ground, senior linebacker Sam Brewer adds another tackle to his record which totaled 11 by the seasons

end. Later in the game, Brewer snatched an interception and ran it back for a 61 yard touchdown the only points scored by the Raiders in this 7 to 6 loss. Photo by R. Kemp

Up, up and away!

Aw shucks!

Disappointment shows on the face of senior fullback Tyrance Barnett after a 14 to 2 loss to Samuell. Barnett's season was brought to an abrupt halt after a knee injury in the Roosevelt game. Photo by E. Aviles

Skyline's loss to B.A. made them

Sit out the playoffs

cont. from pg. 151

was also a standout. He recovered 6 fumbles, intercepted 2 passes and made 107 tackles. He also blocked four punts, which included a three game stretch where he blocked a punt in each game.

In preseason play, the defense allowed an average of 18.6 points per game; but in district play, they cut it to an average of only 6.5 points per game. They allowed opponents only 1,711 yard in 10 games and only 92 first downs. They intercepted 13 passes and recovered 28 fumbles.

They also set a new school record by blocking a punt in six straight games.

The defense had its best game against South Oak Cliff. Shutting out the Bears by holding them to 12 yards passing and negative 19 yards rushing for a net total of negative 7 yards, the defense allowed only one first down during the game.

The kickoff and field goal units also played a major part in the Raider's success. The kickoff team was able to hold its opponents to less than five yards per return. Place

kicker Herman Johnson led the team in scoring with 33 points.

"If it had not been for Herman, we would not have won a lot of the games we won. We won a lot of two or three point games," said senior punter Steve Autry.

James Perkins and Michael Conner contributed greatly to the Raiders offensive game. Perkins caught 17 passes for 253 yards, including a 70-yard touchdown pass from Wendell Johnson. Conner carried the ball 103 times for 487 yards.

Willie King

showed his leadership abilities in the second half of the season by coming off the bench from third string quarterback to become a starting quarterback. He completed 24 passes for 318 yards in four games.

"Willie showed us some talent we really didn't know he had. He proved to us he was good enough to start, so we gave him the opportunity," said head coach Red McCollum.

"Willie picked us up and gave the team much needed morale," said senior center Jason Jernigan.

cont. pg. 155

Mad dash

Senior Michael Conner dodges three Samuell players while trying to gain a first down. He was stopped just short of the 15 yard line. Conner averaged 3.5 yards per carry this season. Samuell stopped Skyline 14 to 2, handing them one of their six losses. Photo by J. Lopez

Gotcha!

After recovering a fumble, senior Jerry Burrell is stopped by a Samuel player. Although the defense managed to get the ball to the offense, they failed to score. The only score of the game was a two point safety. The defense and the kicking game played a major part in Skyline's scoring this year. Photo by T. Vallier

Busting out!

Senior wide receiver James Perkins shows his "fighting spirit" after the halftime period against W.T. White. The Raiders defeated the Longhorns, their last pre-season opponent, 24 to 21. Photo by D. Green

Chorus Line

Varsity players anticipate the opening kickoff to Spruce at Forester Field. Once again the defense was responsible for two of The Raiders five points as they trapped a Spruce man behind the goal line in a 6 to 5 losing effort. Photo by J. Reynolds

Way to go

Senior Tony Gray congratulates senior Frank Jordan after he recovered a fumble in the season opener against Nacogdoches. Jordan's fumble recovery set up a Raider touchdown. The Raiders defeat the Dragons 16 to 14 in one of several one or two point victories or losses. Photo by J. Reynolds

Fred Adams

Senior Fred Adams, a two-way player, has played football all four of his high school years.

Excelling as a defensive and offensive player, Adams has collected statistics in most areas of the game. Defensively, Adams has had 74 tackles, 4 fumble recoveries, 1 interception and 5 quarterback sacks. Offensively, he rushed for 206 yards on 59 carries and caught 7 passes for 79.

Offensive Coach Harry Lantz described Adams as one of the most dependable players on the team. "He's the one you can depend on to make it when it's not there. You need three or four yards? Give the ball to him. He'll get it and sometimes more," said Lantz.

On the go

Senior running back Fred Adams puts a move on a Bryan Adams defender. Although Adams rushed for 206 yards this season, he was held to none against BA. This was not only Adams' worst game, it was also the varsity's. The offense managed only 39 yards of total offense and one first down in the 7 to 6 loss that eliminated The Raiders from any chance at advancing to playoffs. Photo by J. Lopez

Inching along

Senior running back Michael Conner inches for a first down before being stopped by a SOC defender. Conner rushed for 478 yards on 94 carries this season. The offense gained 120 yards total yardage in a strong defensive battle ended in a 9 to 0 shutout of the Bears. Photo by J. Lopez

Attack!

Rushing into the SOC backfield, junior defensive guard Jethro Pugh forces the quarterback to make a futile pass attempt late in the fourth quarter. Skyline held SOC to a lowly 12 yard passing game as they pulled it out 9 to 0. Photo by J. Lopez

Offensive Stats

72 first downs

697 passing yards

1,101 rushing yards

13 interception

Varsity Front: Scott King, Tommy Elliott, Tony Monk, Michael Conner, Chris Thomas, James Terrell, Claude Jefferson, Wendell Johnson, Tony Gray, Tyrance Barnett, Alfred Matysek, Mike Gumpert 2nd row: Coach Joel Ezar, Pat-

The offense gained valuable yards

Rushing

cont. from pg. 152

Among the 39 players, 24 were returning lettermen. These players provided the basis for the team."

"We had what you call 'a senior team,'" said McCollum. "They had the experience and quickness needed to win."

"There were a lot of players that played on the team last year," said Ezar. "We were 6-3-1 last year, so these guys knew how to win."

Skyline was not hurt by the no-pass, no-play rule as badly as some other teams, but it did affect them. Eight varsity players watched the game from the bench, dropping the total number of players from 39 to 31.

"We did not lose any starters," said McCollum, "but we did lose players that were playing a lot of football. With these reserves out for the season, the starters had to play more. This meant that there

was more chance of injuring a starter and did not allow them much needed time to rest."

The biggest reason for the team's losses was mental mistakes. "Self-destruction was the reason we lost so many games," said coach Covin. "The only game we were physically beat was in Denton, we lost to them simply because they were a better team than we were."

"A team can always play better," said Jernigan. "We had to cut out the mental mistakes to win. Sometimes our toughest opponent was ourselves."

"We had a very emotional bunch of kids," said Covin. "If they could have scored first in every game, they would have lit up the scoreboard, but when they were scored against first they dropped their heads and let it get to them."

-Kristina Murphy

On your mark...

Junior running back Johnny Allen scurries past a Roosevelt defender for a 10 yard gain. Allen rushed for 76 yards in one of his best games of the district season. Defensively, Allen collected six tackles and two interceptions. Photo by J. Lopez

Both the freshmen and JV teams failed to

Dodge H.B. 72

A 12 to 0 scrimmage victory over Rockwall set the tone for the first of the JV season. The team lost only one of its first seven games before coming up on its toughest opponent — Housebill 72's no-pass, no-play rule.

Leading rusher Darren Lee contributed to the wins by exploding for 272 yards against Plano East and 204 yards against SOC. In each of these games, Lee scored two touchdowns. He finished the season with 1,132 rushing yards and 10 touchdowns.

Then came the end of the first six weeks, report cards and ineligibility.

The rule knocked out 15 of the JV's 28 players. With only 13 eligible players left, the team was in a tight position. "It killed my team when three of my quarterbacks failed," said JV coach Sherman Hughes. Hughes' team wasn't the only one effected. It also disrupted the freshman team.

In fact, the freshmen had only played four games when failures killed half the team. With a 2-2 record, the remaining 10 players moved to the

JV team to enable it to finish the season.

"At first, I lost confidence. When the freshmen started to improve, especially Kevin McKinney, the freshman quarterback, things looked better," said junior wide receiver Derek Young.

Despite the shakiness of the season, the combined team won their last game against Bryan Adams to clinch the district championship.

"In the final game, we got everything together and showed how good we were," said McKinney.

-Terry Marrable

Darren Lee

Sophomore Darren Lee, the leading rusher for the JV team, averaged over 100 yards a game. On the season, he gained 1,132 yards and scored 10 touchdowns.

"He reminds me a lot of Billy Smith and Michael Conner. He's fast and has a lot of talent," said JV coach Sherman Hughes.

Cross country started to practice early in order to

Hit their stride

Susan B. Anthony would be proud. After years of having a male dominated cross country program, Skyline finally had a girls team that made a showing at the district meet. The Lady Raiders took an overall second place, only eight points behind the first place Roosevelt team.

The team was led by freshman Dori Mann who took an individual second place in the girls varsity race. Her time of 13:59 was just three seconds slower than the first place finisher from Bryan Adams. Coach David Holland believed this season was just the beginning for Mann. "I'd like to see her aspir-

ing to go to state next year," said Holland.

Following Mann's second place were sophomore Lisa Brook's seventh place time of 15:17 and senior Lisa Arredondo's twelfth place time of 16:38. Helping to provide the two needed points go ahead of Spruce were Jenifer Stone and Sharonda Smith who took fifteenth and twenty-second places, respectively.

The boys season was not quite as successful as they could only manage an overall fourth place at the district meet. Their highest finishing runner was Warren Smith whose time of 20:38 earned

him an individual eighth place. Also placing were Pat Patterson with fourteenth place, Robin Wright with twenty-second place, Brian Brian with twenty-fifth place, and Robert Moxley with thirty-fourth place.

The fact that of all the Skyline runners at district, only one had placed the previous year, coupled with the fact that Coach Holland was the third new coach in four years made the team a relatively inexperienced one. With all but three of the runners who planned to return next year though, the teams felt their chances for next year would be better.

Until Fairbanks, Raiders were On the up

Goalsetting. This factor seemed to carry the Lady Raiders volleyball team to the top or at least until they could not go any more.

"Any team not as good as ours will not beat us unless they are positively the better team," proclaimed volleyball head coach Jettie Sams.

This attitude, dedication and the tradition of winning carried the Lady Raiders through district, bi-district and area championships.

"In the beginning I didn't anticipate we would have a good team but as the season went along, players worked harder and things fell in place," said Sams.

In district play, the Lady Raiders had a slow start, losing to Richardson 15-10; 10-15; 16-14. The next few games the Raiders were on both the winning and losing ends. However, in the seventh district game things fell in place for the Lady Raiders and they were triumphant over everyone they survey in district play.

"At first I didn't think we were going to win district but as the season progressed I felt better," said Shelly Washington.

Triumphant over their next nine opponents, they defeated Velt 15-5; 15-10 to

cont. pg. 162

Aretha Adams

"The kid has a lethal serve," said volleyball head coach Jettie Sams. Senior Aretha Adams, team hitter and top vertical jumper, has a number of awards under her belt. She has been chosen first team all-district, and rated as the number one spiker in the city. Playing an excellent supporting role in the Lady

Raiders success, Adams started in the number one hitting position.

"All through the playoffs we looked to Adams to kill the ball and shut down the opponents big hitter," said Sams. "Adams has always had a positive attitude and has been easy to coach."

Spike it then

Team captain Camellia Bowen spikes the ball in the match with Spruce which the Raiders won 15-4; 15-8. Bowen the team's most versatile player was nominated player of the year for their district. Leading the team in points scored Bowen was also elected to first team all-district. Photo by D.Green

MVP

Team captain setter No. 40 Camellia Bowen, sets the ball to Veronica Terrell in a game against Samuell which the Raiders won 15-6; 15-8. Bowen led the Lady Raiders to a district, bidistrict and area championship for the '85-'86 season. Bowen received the honors of Player of the Year and was elected for her second year to the all district first team. Photo by J. Lopez

Double trouble

Two Lewisville players block Regina Jones' spike, their effort was still not enough to hold the Lady Raiders as they went on to win this pre-season game. Jones was selected as a second team all district player for the season. Photo by D.Green

Dink on them

Lopez

Clinching district, bi-district, and area the Lady Raiders had to stay

On their toes

cont. from pg. 160
clinch the district title.

For the bi-district championship, they faced and conquered Wilmer Hutchins by scores of 15-13; 17-15.

Lead by coach Sams, who for her second year was voted Coach of the Year, the Lady Raiders faced and easily defeated Richardson Pearce 15-4; 15-10 for the area championship.

Nothing could stop the Lady Raiders — until they faced Cypress Fairbanks, a team seeded in No. 1 in the state.

Losing the first set

15-10, the Raiders went into the second set ready for play. As the lead see-sawed from team to team, until the tenth point, both teams struggled for the lead.

The tide turned as Fairbanks unleashed its most skilled offensive play. The following winning points for Fairbanks came from serves which were 85 percent aces. Keying in and attacking Skyline's weakest players, Fairbanks served to them and the Raiders couldn't return the serve as they lost to Fairbanks, 15-10; 15-9.

They beat us on the serve," said Sams. "We

couldn't receive their serve."

At this point the Lady Raider's season ended. Senior Rhonda Houston attributed the loss to mistakes at crucial points in the game. "They were more consistent than we were and more fundamentally skilled. Our team hustled, out-jumped and out-moved them. We were better athletes but they were better volleyball players," said Sams.

Despite the loss, the Raiders still achieved their goal of not letting a lesser team beat them.

-Dameon Fisher

Go for it

Camellia Bowen sets the ball to Veronica Terrell in a victory over Kimball, 15-3; 15-2. Winning got the Lady Raiders one step closer to the district championship which they achieved in a final win over Roosevelt which took them to bi-district against Wilmer Hutchins. Photo by A. Williams

Setting pretty

Camellia Bowen, sets the ball for an awaiting player to spike it in the area championship game. The Lady Raiders faced Pearce and held them to 14 points for the entire set. Defeating Pearce by scores of 15-4; 15-10, the Lady Raiders clinched the area championship. At regionals, the team fell to No. 1 seeded Cypress Fairbanks. Photo by J. Lopez

Unreturnable

Eligibility problems did not keep the J.V. volleyball team from

Hitting the court

Most teams use inexperience as an excuse for failure. Junior varsity volleyball coach Mary Thomas didn't have to.

The team started the season with six girls who played for the Raiders last year and one who had played elsewhere. But in the middle of the season, five of those seven players were no longer playing for the JV team. The no-pass, no-play ruling forced three

players to watch the rest of the games from the stands and Shelly Washington and Sheila Jones were moved up to the varsity team when it lost two of its players for the same reason. This left only Bridgette Daniel and Mary Marrs out of the original seven players.

This predicament forced Coach Thomas to take four of her inexperienced players and use them as starters. These four players

were Lisa McCuin, Caressia Wysinger, Robin Oestricher and Sabrina Wyman.

"It took a lot of guts for those girls to go out and play with so much pressure on them to win," said Thomas. "They really made the transition well and they beat South Oak Cliff and Samuell, who are good teams."

While only a freshman, Marrs was a major force behind the

team's 8 and 2 district record.

"We played half of our season with girls who had never played before. They did extremely well for inexperienced players," said Thomas.

"I really enjoyed coaching this team," said Thomas. "They had no discipline and no attitude problems. They were not content to just serve and bump. They wanted to play power volleyball. I

think they are probably the only JV team in Dallas to play power volleyball. It takes a lot of thinking and cooperation to play like they did. They really put out a lot of effort."

Varsity coach Jettie Samms said, "If we can get this much dedication out of the JV team every year, the varsity team will have many winning seasons to look forward to."

8 wins; 2 losses

The Lady Raiders tried to

Out jump the rest

Winning teams don't usually have new coaches. They don't usually have a lack of substitutes. Nor do they usually have to begin practicing in the hall because the gym is being used for another sport. Skyline's girls varsity basketball team had all of these obstacles, but they still managed to have a winning season and place second in the district.

"This is my first year coaching at Skyline, and I was really excited about varsity. Coming in on this team, I knew that we had to work to be the best. I tried to incorporate a tutoring program in with practice and the results were great. Grades are a must, and I strictly believe in no-pass, no-play," said coach Vickie Sellers.

Coach Sellers also

had to deal with the fact that the gym was occupied by the volleyball team until late November and with the problem of a lack of substitutes.

Recruiting will make a difference in the team. I feel that we have too few athletes and that is one reason, the only reason, we lost to South Oak Cliff," said Sellers.

Senior Camellia

Bowen, a third year member, shared coach Sellers opinion about the February 5 South Oak Cliff game. "We had them all wrapped up in the first half. In the third quarter, we lost the advantage and they came on stronger than us," said Bowen.

This 49 to 87 loss was just one of three the Lady Raiders experienced. The other two

Up, up and away

Jumpshots

were just one way the girls scored their points.

cont. from pg. 166

were both against Samuell. The season's pluses outweighed the minuses, however, as Skyline won seven of their district games which enabled them to place second in district.

The Lady Raiders had two defeats over Spruce (65 to 41, 59 to 41), Roosevelt (65 to 32, 62 to 50), and Bryan Adams (66 to 60, 63 to

44), as well as one over South Oak Cliff (59 to 34).

Coach Sellers viewed her program as being very successful. "I'm very pleased. We are a cohesive team and that's very important because I don't believe in putting all the pressure on one person. I don't believe in that, I believe in teamwork," said Sellers.

As far as the next season, coach Sellers did not look that far in the future. "I try to live each season as it comes, and I don't really have a plan for next year. I know that we will continue to work, because the team will be very young. That will be no problem, though, because we will work just as hard," said Sellers.

7 wins, 3 losses

The Raiders were prepared to

Dunk the competition

For the first time in four years, the boys varsity basketball advanced from regular district to the playoffs with a district record of seven wins and three losses. The Raider's victories included wins over Bryan Adams (60 to 59, 78 to 60), South Oak Cliff (78 to 76, 72 to 70), and Spruce (68 to 54, 75 to 57). The team's final district victory came in a game against Samuell in which junior Larry Johnson scored eleven points, seven of them in the last 30 seconds, with a final

score of 36 to 33. The teams three defeats came at the hands of Roosevelt (59 to 60, 52 to 54), and Samuell (47 to 50).

Although the Raiders lost their first bi-district playoff game to South Garland 60 to 71, the team was still happy to have made it that far.

"Anytime you get in the playoffs it's an honor," said coach J.D. Mayo. "We won over 20 games this year, even though there were some good teams in our district and region."

Senior Kelvin Kiz-

zee thought the team did a good job in making the playoffs. "We did good in making the playoffs considering we had a shortage of players due to the no-pass, no-play rule."

Other accomplishments of the team included placing fifth in state and winning the Austin Independent School District tournament.

Junior center Larry Johnson was instrumental in Skyline's successes, averaging 25 points and 15 rebounds per game. He also re-

ceived several honors: All-District, Dallas Morning News All-American, and Dallas Times Herald Player of the Year. All district honorable mentions were awarded to Anthony Johnson, Lyle George, Reginald Green, Victor Allen and Lamont Lewis. Burnis McFarland was named Sophomore of the Year for district 10-AAAAA and Kizzee made the All-District second team.

Ronald Vaughn

Senior Ronald Vaughn had been a varsity member for two years. Emerging as a team leader, Vaughn had helped the team to become district champs. "He's a madman on the court. He's always very emotional," said teammate Burnis McFarland.

On the fast break

Senior guard Anthony Johnson directs the offense after a steal by Burnis McFarland. Although Johnson was not a starter, he contributed to the team by scoring four points against Spruce. This was the first district win for the Raiders. Photo by E. Aviles.

Concentration

Junior Larry Johnson shoots one of the Raider's 21 free throws in their first district game against the Spruce Apaches. The Raiders shot 71 percent from the free throw line. The Raiders defeated the Apaches 75 to 57. Photo by E. Aviles.

The Raider's opponents were

Slamdunked

The Raiders began the season with only one returning starter and a few players with varsity experience. Lack of experience wasn't, however, a major obstacle as the Raiders defeated South Grand Prairie, Garland, Hillcrest and North Dallas in pre-season scrimmages.

Against district 10AAAAA opposition, the Raiders trounced Carter 83 to 60. Carter, usually a major conten-

der in district, fell victim to the Raiders twice in pre-season. "They executed their plays really well, I guess they just out-played us," said Carter player Clifton Tisdale.

Led by pre-season, All-American Larry Johnson and Kelvin Kizzee, the Raiders hustled to a 9-1-0 record thru the first 10 games.

"So far in pre-season we've played pretty well. We have played some tough

teams and gained valuable experience from the games," said coach J.D. Mayo.

The Raiders were picked to place third in district, a difficult task considering the district had five of the area's top 10 teams.

-Sam Franklin

Movin' out

Power forward Kelvin Kizzee, one of the few experienced varsity members, makes two of his 14 points in the Skyline victory over Spruce. "Kizzee is one of the most consistent players we have on the team," said Coach Mayo. Photo by L. Strother.

Larry Johnson

The Carter Cowboys became one of center Larry Johnson's victims as they fell to Skyline 83 to 60. Johnson stuffs the ball for another points as Skyline plays a pre-season game in their home gym. Johnson, who always scored in double figures, netted a triple double against Carter. Photo by L. Strother

Low down

Moving the ball down court after snatching a rebound, senior Ronald Vaughn sets up a play. Vaughn contributed 14 rebounds to the 51 total collected by the Raiders against the Apaches. Vaughn, a two-year varsity player, averaged 9 rebounds per pre-season game. Photo by E. Aviles.

On the rebound

Senior Ronald Vaughn pulls down a rebound against a SOC player in a Raider victory over the Bears 72 to 70. Number one ranked SOC was upset in the last 10 seconds of the game. Photo by R. Kemp

Phillip Elliott

Sophomore forward Phillip Elliott averaged 18 points, 4 assists and 10 rebounds a game to help the JV Raiders take third place in district play. "Phillip is very consistent in stressful situations. Without him, I don't think we would have done as well as we did," said teammate Jonathan Griffith.

6 wins, 4 losses

The J.V. and freshmen basketball teams

Jumped into play

Despite a slow start for both the boys junior varsity and freshman basketball teams, both teams proved they were winning teams by the season's end.

The freshman team had a district record of 6 wins and 4 losses. The losses came at the hands of Spruce (26 to 32), Roosevelt (31 to 49, 32 to 34), and Bryan Adams (36 to 46). Skyline's victories were at the expense of Bryan

Adams (42 to 32), Samuell (42 to 41, 60 to 34) South Oak Cliff (45 to 44, 54 to 43), and Spruce (38 to 33). According to coach R. L. Gatewood, "They played very well."

The junior varsity team also had a district record of 6 wins and 4 losses, gaining their victories over Spruce (42 to 32, 53 to 38), Bryan Adams (65 to 42, 48 to 31), and Samuell (35 to 32, 41 to 36). They

suffered two losses at the hands of both Roosevelt (41 to 50, 38 to 54), and South Oak Cliff (38 to 59, 32 to 44). "The slow start was due to the games starting immediately after organized practices," said coach Edward Wesley.

With good balance on both teams, the coaches looked forward to seeing their students to lead the future varsity team to victory.

Water polo was the result of having a new coach

On board

"Practice makes perfect," or so hoped the boys and girls swim teams prior to their season.

Despite the fact that their first district meet was not until Dec. 13, Coach David Holland had the teams start practicing early in October. For the first few weeks, the teams would do running workouts which allowed the coach to continue working with the cross country teams and then go to the pool for an hour long swim work-

out. After the cross country season ended, the teams began swim workouts which were an hour and half long and consisted from 3,000 to 4,000 yards.

The main exception to this pattern was in the form of a game: water polo. Approximately once a month, usually on a Friday, Skyline and Bryan Adams, who shared the pool, would split into two groups of players. Coach Holland would then explain the rules by saying, "You can't

shoot all the way across the pool and you must let people come up for air. Other than that there are no rules!"

What would ensue was described by Holland as a free-for-all. According to him, the purpose of water polo was to strengthen the swimmers while letting them think they were playing a game.

This did not stop Holland from joining in though or using a water hose to liven things up.

-Robert Berry

Out on a limb

In the middle of practice coach David Holland stands on one of the diving boards to get a better look at the swimmers. The team's practices paid off as the boys team won their first district meet with Samuell 108-29 and girl's team won theirs 110-12. Photo by J. Reynolds

Pull!

By winning their sixth district championship and the regional title, the Raider wrestlers were able to

Stand tall

After helping the Raiders win their first ever regional championship, six members advanced to the state meet.

As a team, Skyline tied for fourth place with R.L. Turner with 68 total points.

"Although it would have been nice to win, I'm happy with our overall standing," said wrestling coach Larry Karl. "Our goal this year was to place in every tournament we participated in; we did. I'm very proud."

Individually, Zane Braggs, a 119 pound

junior, finished in third place. Also finishing in third place was Derek Doss in the 138 pound weight class. Tracey Day and Vincent Durham finished fifth in the 132 and 155 pound divisions respectively. Winda Jackson and Jess Sweet were eliminated in the earlier rounds of competition.

"The guys who wrestled individually did a really good job. Durham beat some guys who he had lost to earlier in the year. Braggs had an outstanding tournament," said Karl.

The road to state

was not an easy one. However, the Raiders did find success along the way.

The team won its sixth District Championship in nine years. With nine wrestlers in the finals, five were crowned champions: Corey McKinzie at 105 pounds, Day at 132 pounds, Doss at 138 pounds, Durham at 155 pounds and Jackson at 176 pounds. Four members took third place and two wrestlers with fourths.

Durham was voted the most outstanding wrestler of the tourna-

ment by the coaches and the officials. "He was very, very impressive," said Karl. Durham was selected on the basis of wrestling performance and sportsmanship.

The District Championship gave the team some momentum going into the regional meet. With 189 points, the Raiders were able to finish first over St. Marks with 159.5 points. Wrestlers who placed first or second at the regional meet were allowed to participate in the state competition.

At regionals,

Braggs, Doss, Durham and Jackson won first place in their respective weight classes. Day placed second and Sweet placed third. Although he finished third, Sweet was able to advance to state because he challenged the second place finisher and beat him.

The wrestling team's season was a successful and productive one. "Hard work and determination made us this year," said Doss. "We had a great ending for a great year."

-Kimberly Prince

Positive attitudes, depth and experience have helped the wrestling team dominate opponents on the road to regionals

Head to Head

With 10 returning wrestlers who had been to state competition the previous year, the wrestling team had both depth and experience.

"We should do even better this year because we have so many guys with experience," said wrestling coach Larry Karl.

"The team wanted to go undefeated. It hurt when Newman-Smith got past us. The loss did create a positive reaction among the wrestlers," said Karl. "They realized they were going to have to pull together in order to come out on top. I think it's going to work out okay."

In dual meets early in the season, the team compiled a 3-1 record. They defeated Lincoln,

SOC and Bryan Adams 52 to 17, 58 to 20, and 63 to 18, respectively. A tough Newman-Smith squad handed Skyline their first loss.

In the Lake Highlands tournament, Skyline placed third. In the Bishop Lynch tournament, the team finished second to Newman-Smith.

"At that tournament (Bishop Lynch), we felt good. They (Newman-Smith) didn't beat us by much; we just couldn't work it out," said junior Zane Braggs. "Since then, we've been working hard. We're pushing ourselves more because we want to do better."

In order to do better, the team diligently practiced on "riding" or controlling the oppo-

nent. "We're not bad; we're just not as good as we should be," said Karl. The team has also taken steps to ensure physical conditioning.

In addition to running and weightlifting, the wrestlers worked out on a resistance machine designed to strengthen leg muscles. "Nobody likes it, but it gives you a good workout. It's the machine everyone loves to hate," said Karl.

The keys to having a successful season were good grades, dedication and hard work according to Karl. "If we stay healthy and wrestle hard, we should at least make some noise at the state competition."

-Kimberly Prince

Rolling over

On their way to a second place finish in district the Raiders had to keep district opponents

Faked out

After being buried and forgotten, the boys soccer team was literally resurrected for the playoffs.

The boys team's playoff hopes were supposedly shattered when the Raiders faced the Samuel Spartans in district play. The Raiders dominated the game, scoring two quick goals early in the first half. Nevertheless, the Spartans walked away with a 3 to 2 win and a pass to the playoffs while Skyline stayed home.

This Spartan win and the team's previous nine district games were nullified when it was discovered that Samuel was playing several illegal players. UIL rules stripped them of their second place standing; and the district awarded the Raiders, who originally placed third, the second place crown.

Going into the playoffs, the Raiders faced North Mesquite, a team undefeated in district play.

After one half and 20 minutes of the second half, both teams struggled to score the first

and probably winning goal. Unfortunately for Skyline a North Mesquite forward was first to score that winning goal on a header as a result of a Raider penalty. North Mesquite beat the Raiders in this bi-district game 1 to 0. "It was our strongest game. Our defense held them. Everything started to click but we couldn't put the ball in the net," fullback Joseph Rincon said.

Although not successful in their second consecutive playoff berth, the Raiders were successful in district play and individually, with Evelio Flores and Yonas Tesfaye voted first team All District and Joseph Rincon and Kevin McKinney chosen second team All District. Also Dameon Fisher and Duane Randolph received honorable mention.

The girls team, on the other hand, had a season filled with ups and downs, starting the season off with wins against Madison and Spruce 13 to 0 and 7 to 0 respectively. The Lady Raiders started experiencing problems

midway through the season.

One of the major problems for the girls team was a coaching change. Inez Flores assumed the coaching position in place of Lazo who was previously coaching both teams "The coaching change affected us a lot. We didn't know what she expected because of her different style of coaching and most of all, it was untimely," said player Dolores Santoyo.

Moreover, the girls team had to forfeit two district games because they were playing with two illegal players.

No-Pass, No-play also affected the Lady Raiders who lost their goalie, Kim Waddington, and their starting halfback, Edith Hernandez.

Despite the trials the Lady Raiders went through, they still finished third in district standing with a record of 6 to 4. Also Laura Lasley and Michelle Monte were voted first team All District and Delfina Tovar and Kim Henson were voted second team All District.

Footwork

Fullback Delfina Tovar clears the ball in a game against the Spruce Spartans. Tovar's efforts were not enough as the Lady Raiders lost 2 to 1. Allowing only seven goals scored all season, the Lady Raider fullbacks are holding up to their end of the bargain. Photo by R. Kemp

Excellent form

Forward Katherine Curtis dribbles the ball downfield to give the Lady Raiders an early 1 to 0 lead in the game against Madison. Curtis, a member of the state team who averaged two goals a game played a key factor in the Lady Raider's success as they went on to stomp Madison, 13 to 0. Photo by D. Green

Go for it

Allowing only 10 goals scored all season, keeper Armando Beltran makes a diving save in the Spruce game. The Raiders won 4 to 1. Beltran, who started the year off in the forward position, found that goalkeeping was his better talent, being ranked as one of the top goalkeepers for the district. Photo by R. Kemp

Mano a mano

Halfback Ricky Martinez puts a perfect through ball to Chuong Vu which later set up a score for the Raiders early in the first half. Despite such opportunities, the Raiders lost to the Spartans 2 to 3. Scoring on lucky shots, the Samuel Spartans were victorious in one of the two teams' meetings. Photo by D. Green

Agony of defeat

Starter Michelle Monte heads the ball over a Samuell defender. While Monte made many key defensive plays, the Lady Raiders still lost to the Spartans, 1 to 0. Even with this loss, the girls were still contenders for district. Photo by D. Green

Goal guy

Making a flying save, goalkeeper Armando Beltran, noted for his awesome saves, allows only one goal in regulation play as the Raiders defeated Spruce 4 to 1. Efforts such as these from Beltran kept the Raiders in contention for a district championship. Photo by R. Kemp

The soccer teams wanted to Go ahead

"Discipline, if you don't have a good disciplined team you don't have anything," said coach Arturo Lazo as he described his plans for the boys and girls soccer teams. Despite the fact that he had the added responsibility of another team when in previous years he had only one, coach Lazo was confident that he could handle both.

"I know the talent on the team and who's going to make it and who isn't," said Lazo.

The Raiders started off their season by winning their first three district games. The wins included a 7 to 1 defeat of Madison, a 6 to 1 defeat of Lincoln and a 3 to 1 defeat of Spruce.

"We used the Lincoln game to work on

our passing skills. We worked well together and their only goal came from a defensive mental mistake," said Dameon Fisher.

Despite their domination of the season opener which ended in a 13 to 0 win over Madison, the Lady Raiders early season games were not as successful as the boys. Losses of 1 to 2 by Samuell and 1 to 5 by Bryan Adams hurt the Lady Raiders cause. Only a 5 to 1 win over Spruce kept their winning percentage at 50 percent.

Both teams still had five district games before playoffs and there was still hope that Skyline would not have one, but two district winning soccer teams.

Shooting

for personal goals was the purpose of gym.

The game is played to win. The goal is to be the best. But in physical education, winning the game isn't what makes the grade. Achieving the goals you set for yourself is.

The yearly activities consisted of basketball, softball, volleyball and ping-pong. Jogging, weights, aerobics and tennis would help to keep the student in shape, and for the socially active person, there was bad-

minton and folk dancing.

Everyday, students had to dress out. Dressing out consisted of a white top, sweat pants or shorts and tennis shoes with socks. Students received a daily grade for dressing out and participation.

There was also a skills test and a written test at the end of each six weeks.

The goal of the P.E. teacher, Pat Jackson, was for every student to

enjoy her time in P.E. "I want every kid to be an achiever in some way," said Jackson. So those concerned with making the grade in P.E. could put their fears to rest. To make the grade in physical education, winning wasn't required, but trying was.

-Sonja Jackson

"I've been proud to part of Skyline these years and I can say I've gained a lot of experience in auto body. proud to graduate in an outstanding class."

-Augustine G.

Although the playground on campus isn't for the student body, the preschoolers have using it through the child-care cluster.

TIME

Learning to do

Highly trained teachers, advanced equipment, more hands-on experience, a two or three hour block to use as a work period and much more were reasons students chose the career development center to be just their type of educational experience.

Not everyone was happy though. Lack of mass interest in bricklaying, iron working, sheet metal and electrical trades cost these teachers their jobs and interested students their opportunity to take those courses. Students had to be reassigned to different areas, sometimes not of their liking.

Clusters including commercial art, electronics, science, fashion and graphics had their three hour blocks reduced to two in an effort to make more time for academic courses.

A big blow to the CDC program came in the H.B. 72 requirement that all cluster teachers had to get degrees within six years or be terminated. No longer was work experience enough.

Despite the problems, clusters continued to excel, winning awards and in getting jobs for their students.

But CDC was only one part of academics. New course offerings made Skyline even more appealing. A humanities course joined the ranks of the newly added AP European History and Mass Media to make the diverse course offerings even between the academic offerings and the career offerings, Skyline had something to offer everyone. It was no wonder that better than 4,000 students found Skyline to be just their choice.

Working on a mum for the horticulture cluster, Sue Croll staples ribbons to lace. Mums were a popular item at homecoming where one could find the horticulture cluster cluttered with orders to be filled and mums hanging on walls.

Horticulture

Teachers: Joe Skinner, Joe Johnson

No. of students: 52

Location: A Building

Goals: to beautify and preserve nature, to learn landscaping and how to make a career with plants

Activities: work in flower shops, greenhouse, nursery, maintain baseball and football fields, to make homecoming mums and flower arrangements, do landscaping around school, supply school and students with plants

"It's fun. You learn a lot if you listen and pay attention."

-Amy Powell, 9th

Strumming through the Basics

"Back to the basics" was the battle cry of DISD administrators. As a result, the principles of "reading, 'riting and 'rithmetic" were brought back and expanded to include other academic classes such as computer science, economics and fine arts. These courses, coupled with the traditional English, math and science classes, made accademic life interesting for most students.

Foremost among the academic concerns of any hopeful scholar were the so-called "hard" classes of English, math, science and history. For most students, these courses surpassed all others in homework assignments, tests and required study time. Even so, a number of people went over and above their requirements by enrolling in AP English or calculus. "I took the advanced placement classes in order to give myself a chance to place out of some first-year college courses," said senior Nancy Lawhorn.

Although all students saw the

necessity of requiring the "three R's," other required courses, such as physical education and health, received some criticism. "I don't see why gym should be a required subject," said cluster student Patick Burnett. "I believe that physical education should be the student's own responsibility outside school." Of course, those who were accepted into a cluster were not required to take a physical education class, provided they could pass a fitness exam.

For freshman and sophomores wishing to participate in an advanced or honors high school program, new requirements were put in force. These included additional credits in computer science, fine arts and a foreign language. While these new standards seemed harsh to some, administrators did not believe that they made much of a difference. Principal Gene Golden observed that "these requirements are not all that different from what advanced students would take on their own initiative, anyway.

This is just a way of recognizing and noting that fact on their diplomas." Following this course of study enabled students to receive an academic seal on their diploma.

Although the trend was toward getting all of the required courses "out of the way" during the first three years of high school, there were those who found themselves, for one reason or another, still in need of a specific class during their last year. "I took a study hall during the tenth grade so now I've had to take a World Geography course," lamented senior Patrick Keith. "My advice would be to make sure you have taken care of all your required courses first." Seniors found that these courses cut deeply into what they had thought would be an "easy" year. As one person put it, "Having to take an academic course during twelfth grade really makes you think twice about skipping class or goofing off for a year."

-Tannisa Jeffers
-Kevin Tucker

Let's get physical

P.E. was a required subject which came under much criticism. Even so the work went on. Work which included calisthenics or stretching exercises, which all gym students were required to do at the first ten minutes of class in order to warm up for future gym activities. Photo by R. Jernigan

What's up?

Juniors Teresa Green and LaMonica Hopkins wait patiently to be interviewed for the Executive Assistance program. The program gave students a chance to go out into the real world and work with professionals in the field of their choice. Photo by D. George

Educational applications

It's Monday, Nov. 18, 1985, 71 juniors are called down to the auditorium unaware of their fate. Actually this fate turned out to be a new learning experience. These students were nominated for the Executive

specialized field.

Nominees had to fill out applications and return them within a week to the counselor's office. On the application they gave information rang-

Getting real experiences out in the real world made the Executive Assistant Program worthwhile for the juniors. The one-on-one personal experience with a professional, in the field of their choice, gave them a chance only a few received.

Assistance Program. The purpose of the program was to give students a chance to work with people in a

ing from their names to an overview, telling what they expected and why they wanted to be in the programs. The nominees also chose the field that they would like to participate in and were interviewed at school.

Out of the 71 students that were nominated, 39 applied and 38 were

accepted. The students "went to work" with their assigned professional and spent half a day with him.

"I like it (Executive Assistant Program) because it gives me a chance to pick the field that I work in—law—and I will also be eligible for some scholarships," said junior Lamonica Hopkins.

After they completed their first semester on the program, the students had the option to be in the program again.

"I was in the program last year and Fridays were the most fun because we had seminars and lectures by interesting guest speakers," remarked junior Teresa Green.

The executive assistant program gave juniors the opportunity to work in the "real" world with "real" professionals in their field.

-Danny George

Fill in the blanks

Filling out an application for the Executive Assistant program took extra time from junior Deanna Pierce's schedule. Pierce interviewed at several places after finding out that she made the program. She left school during fourth period to go on interviews. Photo by D. George

Study time

Reading a required novel, *The Adventures of Huckleberry Finn*, in Barbara Larabee's third period class was a way junior Tierra White spent her time waiting to see if she made the Executive Assistant Program. White planned on being a buyer in the program. White was accepted on the program for the second semester of the year.

World of Manufacturing

Teacher - Richard Pennington, Glenn Easley, H.D. Crawley and Rex Jones
Students - 99

Location - A-building

Areas of study - The Manufacturing cluster offers programs which enable the student to understand the concepts for producing goods and providing services with modern industrial technology. The program will provide opportunities for the student to make safety judgments, to develop industrial skills and to acquire effective work habits.

Areas of Interest - The two-year programs in the specialized fields of Quality Control, Machine Shop, Sheet Metal Work, Welding and Technical Drafting are conducted in laboratories similar to those in industry.

"Everybody thinks Manufacturing is an easy, boring cluster. It's really neither, it takes a lot of skill to form sheet metal layouts."

-Darren Evans, 12th

A seen through the eyes of a child

"Easy as A-B-C and 1-2-3."

Some of the clusters appeared to be all fun and games, but appearances were deceiving. They had to follow strict curriculums just as the other clusters.

For instance, child care students worked out of their curriculum when it was not their time to teach the pre-school students. Their curriculum consisted of a weekly current events and observations of the pre-school students. They also learned about safety of small children.

Students were given a chance to teach pre-school four times a year. They had to turn in a lesson plan for the week in which they were assigned to teach.

The child care pre-school students were taken to the cosmetology cluster in order to receive manicures and new hairstyles. Second year cosmetology student, junior Rene Hoffer said, "I feel that this was good experience, but the little kids were very fidgety and talkative."

Child care pre-schoolers were not the only students who were given a chance to roll around in the dirt. The horticulture cluster students got hot and dirty quite often. They served as grounds maintenance which included planting flowers, elevating the baseball field, keeping the lines on the baseball field and all the other things that kept the campus looking neat. The cluster also trim-

med the trees at the administration building.

Some clusters had to get down to business in a more fun way than others. Regardless of method, the goal was the same—learning a marketable skill.

-Tanya Moore

Hold still

Sophomore Sandy Johnson, a first year cosmetology student, curls the hair of pre-schooler Kristin Middleton. This was one of the activities that the pre-school students were exposed to. This allowed the cosmetology students to get experience in working with small children. Photo by R. Jernigan

Hand care

Second year cosmetology student, junior Tracey Hill manicures the hands of pre-schooler Timothy Gooden. The boys as well as the girls were given an opportunity to receive haircuts and manicures. The cosmetology students found that the kids were very fidgety and talkative. Photo by R. Jernigan

Television production

Teachers: Ben Waldrip, Roger Bowling
No. of students: 60

Location: G Building

Areas of study: lighting, cameras, acting and direction

Goals: to prepare for career as a cameraman, audio control technician, video control technician, lighting technician, recording technician, script writer, industrial media specialist, producer-director, technical director

"When we first began it was really scary, but when you get on camera, you realize it's really fun."

-Tanya Romo, 10th

A and the winner is

"The thrill of victory and the agony of defeat" was a very real statement for cluster students who competed in local, regional, state and nationwide contests. The District Vica Skilled Olympics allowed several students to show of their talents.

Cosmetology was one of the many clusters to participate in the Vica contests. Junior Tracey Hill, a second year student, took home a first place ribbon in the hair styling contest, as well as in the mannequin head comb out division.

Maribel Ramirez placed second in the mannequin head comb out division and won a first place ribbon on her portfolio. Other winners were: Thuy Le, fourth in hair styling, Rhonda Martin, second in wet sets; Paula Stafford, first in the notebook division and Audrey Breedlove, second in the notebook division.

The Commercial Art cluster also ran away with honors. David Malphurs, Leo Landin and George Gomez took first, second and third, respec-

tively in the advertising division. This division was one which they were allowed three hours to think of the design and layout of a billboard for a coke advertisement. For his design, Malphurs a second year student, advanced to the regional level. Overall the commercial art cluster reaped 14 blue ribbons and 4 second place awards.

The plastics cluster also fared well. Robert Guy, Elliot Kennedy, Bertran Bell and Pat Patterson ran away with blue ribbons—Guy, Kennedy and Bell for their joint creation of a bird cage and Patterson for the design and manufacture of his own portfolio.

Science cluster students had a heavier load, entering two totally different contests while at the same time keeping up with their curriculum assignments. Sophomores Brian Norrell and Greg Weaver and seniors Eric Badowski and Ron bone, among others all entered the toothpick bridge contest. These bridges had to

have a maximum of 900 toothpicks and withstand the most pressure to win. The team of Bone and Badowski took seventh place.

These students, as well as others, worked on their science fair projects simultaneously. Projects ranged from chromatography (separation of amino acids) to the affects of temperature on enzyme activity.

Contests were basically extra curricular activities which required extra work and time. As junior Marco Juarez explained, "Contests are good for me, I think because I'd like to see what it is I can do and how well I can do it. Besides that the hope of winning something is there, along with a sense of adventure."

-Tanisa Jeffers

Curl up and die

Thuy Le, a first year cosmetology student, styles the hair of her model Sandra Gonzalez. Thuy cut and styled Sandra's hair in the VICA contest. The style had to be a new summer trend and the model had to wear clothes that were to coincide with the hair style.

Easy does it

Senior Elliot Kennedy and junior Robert Guy works on manufacturing a bird cage. the cage took a blue ribbon in the VICA skilled contest.

Waiting and anticipating

Anh Le, a sophomore in the first year science cluster, observes her chromatography project. She was to identify amino acids and fruit juices.

Bridge

Sophomore Greg Weaver, a first year science cluster student, works on his toothpick bridge. The bridge was entered into a contest in which the one that could withstand the greatest amount of weight would win.

Winners

Vicki Krone, Leo Landin and Arnold Autry show their artwork which was entered into VICA contest. Vicki and Arnold won blue ribbons and Leo took second in the skilled contest.

Simply amazing

Juniors Diana Biretz and Renee Medina admire the art work of fellow student Marcus Roberson. His picture won a blue ribbon in the VICA skilled contest.

This is the life

Junior Armando Villarreal takes a break from duties of the 1986 Origin staff to read to horror sci-fi, *Pet Sematary* by Stephen King. Unrequired reading was a way lots of students took time off from boring, monotonous work. Photo by D. George

Munch out

Junior Patty Bethke munches on Skyline's all-time favorite: Peanut M&M's, while working on activities to complete the current module of the curriculum for the Man and His Environment cluster. Eating during class was against the rule in most classes, but cluster students were often given a break. Photo by T. Jeffers

Fashion??

Junior Linda Lozano looks at a copy of Vogue magazine while Leslie Parker looks on. Reading magazines was one of a variety of things students did to pass time during instances of "nothing to do." Photo by T. Jeffers

Z-Z-Z-Z...

Sleeping peacefully, sophomore Dehnor Raynor forgets about his assignments. Sleeping in class could not be helped in some instances and was sometimes necessary to remain active and energetic throughout the day. Photo by T. Jeffers

Just messing around

You're sitting there, the lecture isn't interesting, the assignment is hard, class is going slowly and you're really bored!!!! What do you do?

"I usually lay my head down and catch up on my sleep every spare moment I get," said senior Rose Marie Gibbs. Added junior Renee Byars, "When I don't feel like doing much or have completed everything, I often write notes and goof off with friends. Mostly because when many different school activities and assignments can tend to make you forget about those you care the most for (friends, boyfriends, etc.)."

Although the common practice was to just mess around others used

the spare time just to put things into perspective. "It's not very often that I get a few free moments, but when I do, I think is some sort of order; besides that I tease the girls around me!" said sophomore Kerri Parrish. Sophomore Janice Davis stated, "When I don't feel like working, I think about things I'm not supposed to; things unrelated to the subject at hand."

Besides just goofing off, thinking and sleeping students often did things more constructive such as reading books and catching up on homework. Others, though, continued to stick to the old ways of eating, throwing paper, and everyone's

favorite: plain ole' nothing (staring into space or at someone you like, jamming to imaginary music, counting the holes in the ceiling, etc.)

Overall most students felt a few moments used as free time helped them through days in school especially when things became monotonous and more of a routine. As sophomore Edwin Drayden summed it up, "Very often I stop work in class just to doodle, I mean it gives me a little satisfaction just to release some energy and blow things off by letting my thoughts roam, and drawing whatever it is I see."

-Tanisa Jeffers

Crayolas and me

Junior Paula Nash colors a figure which she had previously sketched contrary to popular belief coloring was not considered "babyish" among some high school students, but a creative way to pass the time. Photo by T. Jeffers

Commercial art

Teachers: Gayla Burgess, Becky Kores

No. of students: 72

Location: A Building

Special instruments: bow compass, map colors, protractor, paints, X-acto knives, screens, pens and pencils

Activities: draw figures and shapes, learn about layouts and advertising

Goals: To gain awareness in color, design and art

"I got in this cluster because I want to expand my artistic capabilities."

-Shane Cochran

Fool ups, bloop and blunders

"Whoops."

A dreaded word to be sure.

How mistakes were handled in clusters varied from "do it over" to "get the eraser." Architecture and commercial art clusters had electric erasers which not only cleared away unwanted pencil marks, but also ink, some paints and markers. Senior Vincent Birdwell, a second year student in the architecture cluster said, "I spent two weeks working on the location plans of a bank, and the electric erasers helped me correct my mistakes a lot quicker."

These erasers can cause a bigger problem than one may have had to begin with, as junior Renee Medina, a first year architecture student came to realize. These erasers will make a hole in a drawing board if they press down too hard or leave it in the same spot for too long. The commercial art students also used pro-white when the error was beyond erasing. They used Miskit to prevent paint from running.

Erasers were not the only things that helped students correct mistakes. The computer cluster students

were helped by the computer itself. Junior Sonya Johnson, a second year computer programming student said, "The Hewlett Packard tells what errors are in the program. Lines then may be edited or whole programs may require debugging (correcting errors)."

Students within the photography cluster often make mistakes, some which may not be easy to correct. Incorrect composition (the way things are placed in the picture) may be changed by repositioning the picture on the easel during printing. Some mistakes could not be corrected, such as the contamination of chemicals during processing. "First year students often print pictures backwards," added senior Maryann Ehrenberger, a third year photography student.

In some other clusters, mistakes were not correctable. In cosmetology, if chemicals were mixed incorrectly, hair colors could turn out completely wrong. Chemical burns were also a problem the students made when

putting on perms. Students were taught to cut hair at least one-half inch longer than what the customer requested, but this did not always work for beginning students. Sophomore Bridgette McCorry, a first year cosmetology student said, "I had to do a drycut and one side turned out shorter than the other, but nobody really noticed."

Food service could not easily cover up their mistakes. Senior Anthony Johnson, a second year food service student said, "I made a lemon pie that required one and a half cups of sugar. I then added water to dilute the sugar, but it did not work."

Cluster students found that it was almost impossible to get things done completely perfect on the first try, but with a little time, effort and determination these students succeeded in eventually getting it right.

Santa is coming to town

Junior Laura Malloy works on her Christmas card ornament. The commercial arts students were required to design Christmas cards. Malloy designed a Christmas tree ball. The students sold the cards for the Christmas season. Photo by R. Kemp

Commercial art

Teachers: Gayla Burgess, Becky Kores

No. of students: 72

Location: A Building

Special instruments: bow compass, map colors, protractor, paints, X-acto knives, screens, pens and pencils

Activities: draw figures and shapes, learn about layouts and advertising

Goals: To gain awareness in color, design and art

"I got in this cluster because I want to expand my artistic capabilities."

-Shane Cochran

Oops!

Senior Vincent Birdwell, a third year architecture student uses the electric eraser in order to correct a mistake on his bank location plan. These erasers could correct mistake in pencil, ink, marker and some paints. They saved the students a lot of time because of the quickness and thoroughness of the eraser. Photo by R. Kemp

Priced paid for beauty

Junior Shandon Manley, a second year cosmetology student, styles her mannequin. Styling was only one of the projects in which these students were required to complete successfully before they could receive a license. They were also assigned to do perms, cuts, sets and other things.

Quick, get the Raid.

Monica Lopez, a freshman in the computer pre-cluster debugs her program. This was required before the students programs would successfully be completed. The pre-cluster students were not exposed to the computer on a day-to-day basis as the first and second year students were. Photo by E. Aviles

Brush up or brush out

Three million dollars: "MEGA-MONEY" — something all want, but seldom have. This was the amount of money invested on the equipment used within the clusters. The tools that over 2,400 students handled everyday average around \$1,800 a piece.

The first cluster that came to mind when one thought of expensive equipment was science cluster.

Money — that's what makes the world go around. And it's also what keeps the clusters at Skyline operating smoothly. The average cost of a piece of equipment ranged from \$10 to \$10,000. This equipment allowed students to get hands-on experience in the fields they chose to make a career.

Aeronautics and computer science clusters came in next with their equipment ranging from airplanes to keyboard. But all of the clusters contributed to the millions of dollars spent to enhance the studies within the clusters.

The equipment allowed students to get hands-on experience just as if they were out on a job. Science cluster student, Kebran Alexander said, "We are taught how to use all of the different weighing machines and

other equipment ranging from the analytical balance to the spectrophotometer."

The electronics cluster was one of many sections that added to the amount of money spent on the clusters. The isyloscope, which was used to measure a variety of voltages and other wave forms, cost over \$10,000. The animation equipment that was

used within the commercial arts cluster cost approximately \$2,000. In the photography cluster the enlargers that were used to enlarge pictures had a price of \$500 apiece.

Before students handled equipment, clusters required that a safety rules test be passed so that students were aware of dangers of careless handling of the apparatus. Junior Jeanette Nezat, a second year cosmetology student explained their

safety test required a minimum grade of 75. Electronics and science cluster students were also required to pass a safety rules test.

These resources were not simply placed here for students to admire—they were expected to use them regularly. "We are exposed to the equipment about once a week, but we can use it on any day," said Hayward Polk, a second year electronics student. Other clusters such as science and cosmetology used their equipment often. Jethro Pugh, a junior in the second year science cluster said,

"We have a separate lab period daily in which we use the equipment." Nezat added, "We use the equipment most of the time—about four times a week or more."

Overall, the millions of dollars spent on the equipment was not put to waste, but put to use.

-Tanya Moore

Tipping the scale

Second year science cluster students, juniors Kebran Alexander and Jethro Pugh uses the mettler to measure the weight of an unknown object. The mettler was one of the several weighing devices that the students used. They found the weight of things ranging from a single hair to a couple of eggs. Photo by Amy Williams

Computer blues

Sophomore Marc Wallace, a first year computer cluster student works on one of the program assignments in which were required for these students. They were given a separate period each day in order to get hands-on experience with the computers.

Photography/Cinema

Teachers: John Spann, Frank Sloan
No. of students: 91
Location: G and F Buildings

Goals: to learn how to process film, photography people, make prints and make films

Activities: field trips, photograph professional models, help with yearbook cover, use various cameras

Special instruments: Yashica cameras, Omega enlargers, 35mm cameras, view cameras, video cameras

No crying matter

G

irls work at 'guy's' job

Transportation is generally thought of as a man's job, but that was not always the case.

"At first, they guys looked at me like 'you have some nerve to be in here,'" said first year diesel mechanics student Diana Acevado.

Acevado proved her worth and her ability to do the job, earning her classmates' respect.

Information please

Browsing through some of the *Aviation* magazines collected by her teacher, Melissa Rodriguez, a first year aeronautic student, looks for pictures and stories of planes she likes. Her class wrote letters asking for information from the company that made the planes. Later the class held a discussion exchanging brochures and pictures. Photo by D. George

Acevado found she had trouble removing screws from the engine and lifting parts out. Still, she vowed not to let anyone help her with either job. She said she would come back the next day to finish the job if she had to.

Andrea Wright, second year plastics student, was quicker in engraving and doing assigned jobs than any of the second year male students; but, like Acevado, she still had trouble where they had none. "It's hard to change some of the molds, the metal ones. They're too heavy," explained Wright.

Some jobs the girls wanted varied from extravagant to out of the ordinary.

"I want to specialize in Mercedes maintenance," said Acevado.

"I was going to get into auto mechanics, but my mother said that airplanes were more the future," said Melissa Rodriguez, first year aeronautics student.

"I want to be a pilot, get into the air force," said Angie Cedillo, first year aero student.

And some girls don't even intend to go into the field they are taking classes in. "I just signed up. I like it, it's fun. I may get a job in plastics if my other plans don't work out. I plan on going into real estate," said Wright.

-Joanna Garcia

Principal project

First year plastics student Elena Salazar puts the finishing touches on a desk tray by filing off the rough edges. The dozen trays she made was her first money taking project. Each sold for \$6 and first customers were principals Gene Golden and Charles Tuckey. Photo by T. Vallier

Some like it hot

Jeanielle Archie, second year Appliance Repair student, works on a toaster oven. Students started working on small appliances after five to six weeks. In the second semester of the first year, students got into the major appliances, washers and dryers. Photo by T. Vallier

P.M. Aeronautics:
Front: Clayton Claridy, Jeff Theobalt, Corey Rosenthal
Back: Raul Gonzales, David Amri, Anthony Buresch, Cesar Delagarza, Steve Hill, LeAnne Bentley, Melvin Morris

Aeronautics

Teachers: Jerry Smith, Keith Bauer, John Brown, Jim Putney, Roger Edwards

No. of students: 173

Location: A Building

Goals: gain license, train aircraft mechanics, to get FAA license

Special interests: Skyline is the only high school in Texas teaching aeronautics — it is one of five in the nation

Activities: Field trips, glider rides and occasional helicopter rides

Revin' to go

Aviation occupational exploration student, freshman Morris Shaw overhauls a small four stroke engine. The pre-cluster students were also given a chance to work with the aircraft parts. Photo by R. Jernigan

Team work

Break time

Freshmen Israel Ramirez and Jason Singletary work at cleaning engine parts in the aeronautics pre-cluster. The students were exposed to the apparatus on a daily basis. Photo by R. Jernigan

A m I safe anywhere?

Cars vs. planes—no, it was not another one of those court cases, but it was a factor that was causing great dilemmas among travelers.

With the earth-shattering crash of the Delta flight 191 at DFW in August and the flight of servicemen that crashed in Newfoundland at Christmas, safety became a question. Not only were these crashes but others that made 1985 the worst year ever for air travel big headlines, brought the reality of air travel risks home to everyone.

Senior Robert Noah, a third year aeronautics student said, "I feel the main cause behind the airplane crashes was due to the lack of inspec-

tors."

While car fatalities were also up, the big difference between the numbers killed in individual car wrecks and the crashes of commercial airliners made air traffic scary. "I believe that flying is safer than driving a car. Anyone can get a driver's license," said senior Scott King.

Twenty-one hundred hours had to be obtained before entering a flight academy. This included 755 hours of study of the engine package, 20 hours of flying with an instructor, 20 hours of solo flying and other tests. Aeronautics students were given chances to ride in and attempt to fly helicopters.

"I don't feel that the airline crashes will alter the amount of traveling done by plane," said Noah.

Automotive cluster had different views. The majority believed that driving was safer due to the better survival rate in car crashes, but that flying would still be popular. "I think that more long distance travelling is done by plane," junior Johnny Allen said.

Even though opinion varied when safety of cars and planes was the topic, they both will remain the dominant forms of transportation.

-Tanya Moore

Interior Design

Teacher - Susan Thornton

Students - 40

Location - G-58

Areas of Study - blueprint reading, drawing, drafting, space planning and period style.

Areas of Interest - Career opportunities as a commercial designer, Residential Designer, Textile Designer, Furniture Designer, Manufacturers Representative, Craftsman or a Retail Salesman.

"I never thought I'd like Interior Design as much as I do now. I just got in this cluster because I thought it would be fun to learn how to decorate houses, but now I realize it's more than fun, but a lot of work."

-Angela Kissentaner, 10

Flyin' high

Seniors Eric Donalson and Ronnie Hodge, two fourth year aeronautics students do a pre-flight inspection of a helicopter. Several students were given an opportunity to ride in the helicopter. Photo by D. George

Dirty, Grungy, Greasy

Juniors Eugenio Rodriguez and Charlie McCullar, second year automotive students, work on a 318 Dodge engine. They were to change the engine blocks for one of their many customer's car. Photo by D. George

Hitting the books

First period: English III, read chapters 1-5 of Huckleberry Finn (Boring)
2nd period: Spanish I Complete un pagina uno coposicion en Espanol. (Did I miss something?) 3rd. period: Geometry Section 6.5, Proving Parallelograms (Easy Stuff. . .) 4th period: Another Atwoodian Chemistry exam (Hmmm, Hey! I'll just guess. . . no problem!!). . .

These were thoughts that often crossed students minds toward the end of the day. Schoolwork was a never ending process. It started at 8:30 a.m. and went on til 4:00 p.m. and even well into the night as the very dreadful: HOMEWORK!!! Homework was a very basic part of being a student, but not all felt this way.

"I think it really can be unnecessary especially on weekends and the day before test in the same class. Besides that, I don't understand what

teachers try to prove by giving us work to complete at home. I mean its like, a job. . . we work all day and then well into night. Where does the break come in?" asked junior Camille Reeves. Added sophomore Monica Crenshaw, "I greatly dislike the homework I receive simply because I get up at 6:00 a.m. go to school, get home at 4:30 p.m. and work all day with a thirty-minute break. Therefore, I feel after hours should be left for peace of mind and extra-curriculum activities."

Others though, believed it was necessary despite the fact they often felt bugged down. They felt it would equip them better for the future. "Homework is good for people, it really helps when tests and final exams pop up. It really is great in the long-run (scholarships, college, ect.) Personally I think the more the better."

said junior Carla Cooper.

Differences of opinion were varied when homework was the topic and so were the places it was done. These places ranged from other classes, lunchroom, and the bus to bathrooms at home and at school, as well as on the phone and while watching T.V.

Homework was a touchy subject which brought many varied opinions, but most looked at it as just another challenge; Possibly the biggest one, especially if good grades were expected to be maintained. As senior Sean Starkey added, "I really dislike homework a bunch but it's impossible to teach everything necessary in one classtime hour. Maybe the solution would be to stay at school longer, but somehow I doubt if that would go over any better than the present situation."

-Tanisa Jeffers

No time to eat

Sophomore Vickie Johnson studies the use of personal pronouns in order to complete assignments for her 5th period English II class. Skipping lunch was vital sometimes to avoid receiving low grades. Photo by T. Jeffers

Pre-Aviation: Front: Fred Davis, Joe Rivera, Armando Aguilar, Dwight Turner, Mike Thompson, Shon Cooper Back: teacher Roger Edwards, Bill Roe, Yul Ragland, Luis Cruz, Craig Crenshaw, Wayne Pace, Morris Shaw, Melissa Rodriguez, Robert Perez

Science

Teachers: Gary Atwood, Paul Hoehn, James Huggins, Hugh Brown

No. of students: 70

Location: B Building

Goals: Primary emphasis of this program is the development of a student's skills so that he may attain a more intelligent career choice in science.

Areas of study: Biology (advanced, two hours), Chemistry (one hour), Trigonometry/Analysis or calculus. Two or three of other advanced sciences.

When I learn something new in here, I feel as though I've really accomplished something."

-Leah Alexander, 9th

Getting up, not cutting out

Meeting graduation requirements either made or broke honors students. A freshman or sophomore in the Advanced High School Program or the Advanced High School Honors Program had to take one year

and science.

The Honors students were not the only ones affected by the new graduation requirements, however, since regular high school students had to take an extra year of English

they believed that the new requirements were unfair and stupid.

"The extra courses are too much, I'd rather have it the other way," said sophomore Rolanda Golden.

On the other hand, some of the underclassmen thought that the new graduation requirements were really helpful. "It goes with the territory, if you make it in Honors you have to do it," said sophomore Mal West.

There were mixed emotions about the new graduation requirements, but the fact remained that, whether they liked it or not, students had to take these required courses to graduate in June of their senior year.

- Danny George

Graduation requirements are what cause a person to graduate in June or in July of his senior year. These new requirements created a load of mixed feelings for the students.

of Computer Science or Computer Math, two years of a foreign language, one year of Fine Arts, and an extra year of English, mathematics

and mathematics also.

The extra courses that the freshmen and sophomores took were requirements for their graduation; the juniors and seniors did not have to take them. Freshman Angelia Coday said, "It does not really bother me. It's not that much of a big deal."

This feeling was not shared by most of the underclassmen because

Finding out.

Working diligently on her French, freshman Kecia Adams studies for her French I test in Mademoiselle Flores third period French class. Adams practiced daily on learning her French nouns and articles. Most students believed learning the articles with the nouns was "tres difficile." Photo by D. George

Help me Senora!!

Helping Cesar Delagarza learn the Spanish language was one of the many things that was done by Rouchelle Scisney in Arturo Lazo's third period Spanish III class. Mr. Lazo gave his students extra time during their class to work on their individual and group assignments. Spanish was one of the foreign languages that could be taken for credit as an academic requirement. Photo by D. George

Hitting the city streets

Yellow school buses—yuk.

No one wanted to ride one—unless he was going on a field trip. Mid-day excursions into the real world made a ride on the rattling, poorly heated 30-window, natural air conditioned banana the rare exception to the rule. Field trips were designed to be educational and fun. Field trips brought their share of fun in typical and unexpected places.

The computer and architecture clusters got a look at some jobs in the real world. The computer cluster saw how the computer world was run at the Infomart and the architecture cluster went to Core Laboratories in Los Colinas to see an actual construction site. The computer cluster also ventured to Southern Methodist University where they saw the computer learning center. But computers were not the only things that they saw—“At the end of the trip we saw these

gorgeous guys walk by the bus. At first they wouldn't wave, but then one of them turned around and waved at me!! I almost died!!!” said junior Nicole Walker, second year computer cluster student.

A couple of surprising things that happened on field trips happened on the child care and man and his environment clusters' field trips. When child care was at the Martin Luther King Center, one of the students saw one of her former teachers. “I was excited to be back and was happy to see my old teacher since I hadn't seen her since I was five years old,” said junior Danette Simmons.

Man and his environment attended a congressional hearing in the city council chambers. The council discussed violence in television programs and how commercials show kids what they “really” want.

“What was really shocking to me

was when I found out that children spend more time watching television than they do at school,” said junior Paula Nash. As a result of this Nash said, “We should not let our children watch too much television because it can be harmful. I will practice this on my own children.”

Educational experiences were not the only matters that students had this year. They had fun and learned different things than they would have if they had stayed at school. Field trips gave them their chance to have fun not only in school but out of school.

—Danny George

Hurry up.

Senior Rodney Durham waits for the program to run while using an IBM computer while at the Infomart. Durham visited the Infomart with the rest of his peers on the computer cluster's field trip. Using the computers made the visit “worth the trip.” Photo by K. Tucker

Upbeat rhythm cools classroom blues

It's been a long day and Michael still has three seemingly endless hours to go. He desparingly walks into his 5th period Interior Design cluster and is immediately refreshed. His favorite song, "Digital Display" is blaring throughout the room. Michael lets out a yell, and hurriedly rushes into his work.

This was one way in which students began their day in clusters. While outlawed in traditional classrooms, music was something often viewed as part of some cluster's course. Students felt the relaxed atmosphere added to the amount of work they completed and made them feel as if they were in a nice homey environment, not as impersonal and cold as a school the size of Skyline could be.

Horticultural students were just a few that heard music regularly while working in class. "The music keeps me, as I think all of us, well entertained and working steadily. I think it works better in a room filled with some part of sound, rather than a really quiet one," said junior Demetrius Anderson.

"Music also keeps most of us from talking. It also wakes me up and gets me started especially since my cluster's in the morning," said Connie Carter.

Many clusters played music regularly because teachers believed it added to the amount of work produced. "We have an exercise in here where at the first 10 to 15 minutes of the class we are allowed to lie down on the tables, and listen to classical music while centering our minds on our work. This allows us to relax a bit and clear our minds before we set to the task of completing assignments," said second year Architecture student Julie Reynolds.

Commercial Art students felt the same way. "Music reduces the common noise and really makes the work easier. It also calms me down after attending a few of my regular academic subjects," explained sophomore Eddie Brackens. Added first year Commercial Art teacher Becky Kores, "Creative people need anything that stimulates and adds to creativity. It keeps them from working in a sterile environment."

Although some clusters had a little bit more freedom, others did not. Teacher of first year Photography John Spann said, "We listen to music in here only if they've been acting maturely, and as to what kind it's usually of my own whim and fancy. "What he calls his own whim and fancy is what I call dentist office or

elevator music, that easy-listening stuff. Somehow he thinks it won't disrupt the class, and to be thruthful it doesn't, it just puts us all to sleep," yawned freshman Byron Bell.

First year Architecture student Steve Deleon added, "Sometimes Mr. (Tom) Cox lets us listen to music if he's in a good mood. Most of the time we listen to tapes because he has boxes and boxes of all kinds; classical, jazz and rock. I think he thinks it relaxes us, but it just gets me ready to PARTY! ! !

Though music was generally played in clusters to help students work faster, sometimes it was played softly for the relaxation it produced. "We try and play something that will sooth and quiet the kids while they sleep, because they're usually a little playful and energetic after they've eaten," said first year Child Care student Tobitha White.

Though many cluster's were lucky to be allowed the chance to listen to a little "jam," during class, all were not. As first year Science cluster students Philip Bagley, John Standerfer, Carlos Fiero agreed, "Music is allowed in some clusters, therefore it should be allowed in others because just as it helps those who have it to consistantly finish assignments, it would enccourage those who lack.

-Tanisa Jeffers

Laying it out

Cutting it to pieces

Interested in learning how to lay bricks, wire a house or fix transmissions? You'd better plan on trade school. You can no longer take those classes here.

Change was the byword for the career development center as clusters lost hours, teachers or both in the wake of House Bill 72 or by the lack of student interest.

While CDC coordinator Charles Tuckey didn't believe these changes would hamper what the student body would learn, not all agreed with him.

Becky Kores, first year commercial art teacher disliked what was happening. In her cluster five hours were lost per week. "It isn't working," she said, "we have many great students this year who have shown a lot of talent, but there just isn't enough time."

"It's wrong for them to do this to us, for we as struggling and starving

artists should have time to complete quality work," said first year student Deon Ramlal.

Advanced electronics teacher Robert Dale harbored many of the same beliefs. "With the H.B. 72 requirements for grades, it is difficult for the students to take a three hour cluster for three years. We had to cut it or lose half our students to other classes," he said.

Many of Dale's students agreed. Junior Larry Robinson, expressing feelings of relief, said, "It's great, in a sense, that the cluster was cut an hour. There are a couple of other classes I needed to take for graduation and to go along with my career choice. In another sense, it isn't so great because we sometimes run out of time, but in the end it works out okay." Fellow student Aaron Fuentes agreed with Robinson, but added, "One reason I really hate the

cutting of our time is because of field trips. We are unable to take really good field trips such as going to Rockwell, where we can sightsee as well as learn."

Teacher Charles Richardson was chopped from the manufacturing cluster program, leaving remaining teacher Glenn Easley with a split day. His morning class was sheet metal, and his afternoon, manufacturing. "My load is double this year, but it really doesn't affect me since I'm certified in both fields," he said.

His students don't all think the same way. Two of them, junior Joel Sexton and senior Robert Vavrik, both believe the cluster's organization is hurt. "I am now unable to get on the work program since my cluster is only taught in the morning," said Sexton. "Yeah, we both are ineligible since it would be impossible to go

Bring out the best

cont. from pg. 220-221

and work on a job for three hours, then get back to school in time for fourth period," added Vavrik.

The automotive and building trades clusters came up with the shortest ends of the stick of all the clusters. Building Trades lost David Leerson, teacher of the electrical trades portion, and Val Freeman who taught the bricklaying section. This left teacher R.A. Wigman with a load unlike most others. He juggled electrical trades, bricklaying and plumbing within one three hour cluster.

The body and paint section of the Automotive cluster which dealt with engines and automatic transmissions also lost teacher Donald Boardman. Boardman's class, transmissions, is being taught along with engines by remaining teacher Everett Gentry. Gentry had reservations about the move, "It's slightly harder because it greatly increased my student load. There really isn't enough time to help everybody with the actual hands on experience, so consequently we end up in the classroom

more often."

Junior Keith McDonald added, "Due to the cut we haven't really learned as much as we should. I think because of this and the fact that we sometimes don't have enough time to complete work, we should have two teachers instead of one."

Although a few clusters lost an hour or so, or a teacher or two, some weren't that lucky. For instance, iron working was completely cut because of lack of interest. Those who were in the cluster went to other building trades or were absorbed into welding, which is similar to ironworking.

Senior Jerry Burrell was one of those few who switched to welding. "I think the loss of ironworking only put a bigger stress on other clusters. It also made the welding cluster a little too crowded. Mr. (H.D.) Crawley, our teacher, can't help all of us with the welding activities nor keep watch over us," he said.

Bricklaying was also one of the unlucky ones exterminated. Unlike welding, the students had short notice, in fact it wasn't until the sec-

ond week of school that they were rescheduled into other trades, such as plumbing or carpentry.

Electrical trades also was closed due to low enrollment. Not only would the students be effected but the school as well. During Skyline's fairly frequent blackouts, the offices were often wired with generators to provide light. No longer would that or the many other services they provided to the school be available.

Fortunately one cluster was saved in time from such a fate. Alton Dean, teacher of a pre-interior design drafting class and pre-construction. He expressed an interest in cabinet making and was allowed to teach the class. His volunteering kept the cluster from going under.

Dean offered this remedy for the clusters, "If all cluster teachers made a consolidated effort to advertise our programs the student/teacher ratio will be stronger. A lot of students aren't really aware of what we offer here, therefore clusters are being cut due to lack of students."

-Tanisa Jeffers

Cover up

W.D. Brewer, teacher of the paint and body section of the automotive cluster teaches students Armando Bertran, Jacob Topia, Anthony Duarte and Billy Belenger how to operate a spray gun effectively so that they may use it to properly paint the body of a car.

In the making

Sophomore Robert Vavrik and senior Vincent Durham intensely try and finish making parts on the computerized numerical control milling machine. The parts were assembled into height gages which were required to measure the height of various machinery parts. Photo by D. Green.

Put it together

The milling machine was a necessary instrument in the making of drill fixtures, as sophomore Eric Shuffer can attest. Drill fixtures were essential components in drilling holes for plastic parts. First year machine shop students made and used these in projects they researched and completed. Photo by D. Green.

Doing right

First year machine shop student David McMillian uses the engine lathe to create additional parts for measuring equipment his cluster made. This device made the components of the equipment round and also cut them to a specific size in diameter. Photo by D. Green

Kid's play

First year Child Care student Dande Polk plays with four-year old Christine Middleton during her play period. Child Care was one of many clusters which lost an hour, but fortunately, unlike many, the lost did not affect the cluster's organization. Photo by K. Garcia

Off the wall

Due to the exterminating of the bricklaying cluster because of lack of student interest, those bricks previously used by the cluster were the only remainders of the class. Students who were interested in bricklaying were rescheduled into other clusters. Photo by K. Walker.

The Finishing Touch

Even though one may not have realized, there were clusters which required one to be himself and express his own mood.

Tom Cox, first year architecture teacher, believed this was true. "If you look around this room I think you can find the same ideas expressed in one million different ways. This room is probably the most different from any other classroom here," he said.

Sophomore Steve DeLeon added, "I like the architectural cluster for the sole reason that I am allowed to do my own thing. It isn't really hard to have an idea of a structure within your head, but when you begin to communicate that idea on paper is when the work becomes slightly difficult."

Teacher of advanced plastics Don Kinney thought the students and those who worked in the plastics industry were definitely creative. "Nearly everything that is done in this room stemmed from the student himself. We teach the original design but the student is allowed to do with it what he pleases.

"We design our own product to use and sell to the student body. Whatever it is that we do create becomes a pattern. Once it reaches this point, no one else is allowed to copy it. This idea is similar to the idea of copyrighting of books, where an author protects the central idea of his

story so that it won't be stolen or used again," senior Elliott Kennedy said.

Although there was a vast degree of creativity in the plastics cluster, second year student Robert Guy had these thoughts, "We do a lot of designing and other things like that, but here, as anywhere else, there are those things that are copied year after year such as key chains and the name tags."

Students in advanced commercial art believed that the work done in their cluster reflected creativity more than any other. "I don't like the idea of being a copy cat or a clone. I'm only a student and therefore I see things the way many other typical student would. These ideas I try and express here in commercial art. Maybe those who see my work can relate to it," explained junior Leo Landin.

Senior Amy Bennett remarked, "I don't care to study the ideas of great people or doing a bunch of paperwork all day, that's why I decided to try commercial art, a cluster that allows me to challenge my artistic abilities and express the way, I feel."

Interior Design students harbored feelings of admiration for the freedom given to them when producing a quality assignment. "I like what I'm doing. Here I am able to design a room and know upon completion that it can be followed through three-dimensionally. I get a good

feeling when I know someone can actually use and benefit from something I've made," said junior Karla Cady.

Although other clusters depend almost entirely on students for new ideas and products, the horticulture cluster was slightly different. "We are allowed to be creative by the majority of the projects done in here originate from arrangements ordered. These come in from interested customers. They tell us what they would like, then we develop their original idea the way we wish," said senior Vicki Peters.

Senior Kelly Mosley added, "Even though the customer tells us what it is he would like, many ideas can come of it. Therefore we are allowed to voice an individual opinion to what we think would look best to those who will see and admire it as well as to the customer himself.

Advanced commercial art teacher Gayla Burgess summed creative cluster departments up this way, "This is the place to be for the student who wishes to create and design his own path, rather than follow a traveled one."

-Tanisa Jeffers

Getting it on...

Senior Elliott Kennedy uses an engraver to engrave a name on a name badge. These badges sold from \$1 to \$1.50 a piece depending on how many lines requested. Nametags were just a few of the items made and sold to the student body in hopes of supporting the plastics cluster's budget for materials. Photo by R. Jernigan.

Construction

Teachers: Val Freeman, Travis Davis, Roger Bowling, R.A. Wigman, Rex Jones, Alton Dean

No. of students: 92

Location: C and T Buildings

Areas of study: Carpentry, building trades, plumbing

Activities: build houses, small projects including tool boxes and tie racks

Goals: to learn vocational skills

"We teach the student how to crawl, walk and in the end, run."

-Dutch Wigman, instructor

Building the perfect beast

First year architecture students Tim Barber, J. Frank Hernandez and Randy Duffy put the finishing touches on a model of a French Chateau they themselves built. They chose this building style when their cluster studied the architectural styles of the chateau, mediterranean villa, English countryhouse and American contemporary house. These creative students received an "A" on the project while having only a week to complete it. Photo by D. Green.

Luv ya, Mum!

Mums made wonderful souvenirs of Homecoming night. First year students Constance Carhee and Demetria Anderson knew this as they quickly tried to finish constructing the back of one for a lacking customer. Second and third year students in the P.M. class actually designed the mums, but A.M. was called on to recopy the originals for sale to the student body. Mums could be purchased in sizes small, medium and large. They sold for \$12, \$15 and \$20 respectively. Photo by R. Jernigan

A.M. Building Trades: Front: Wesley Tuley, Allen Houston, Johnny Robinson 2nd row: teacher R.A. Wigman, Edward Mosley, Terrence Culbertson, Dan Brown, John Monroe Back: Randy Young, Chris Shaw, Alfonso Torres, Austin Destercher, Steve Molina, Reginald Miles, Thomas Elliott

More than just bird feed

"Does anyone want to buy a Snicker?"

This was one of the most common questions heard in the hallways. The 50 cents students collected from the sale of Snickers and M&M's was often put to good use by the clusters. But candy was not the only things that the clusters sold as a means of fundraising.

The commercial art cluster sold Christmas cards in the student center at a price of \$1.50 for a bundle of five. Students designed and silk-screened the front of each card. "I think the cards were made very well and they were a bargain. Plus I think it was convenient to sell them at school," said junior Lisa McGlothlin.

Horticulture often sold carnations in the student center. Flowers were \$1, \$1.25 with a bow. This cluster also sold specially ordered mums for Homecoming and Christmas wreaths. The money they made was put back into the cluster to buy more supplies. "I think that it is very convenient to be able to purchase carnations in the student center. I have purchased carnations previously for friends," said senior Steve Autry.

Students walking with plastic

canes this year weren't indicative of bad knees. The plastics cluster made and sold the canes as well as name badges, key chains, picture frames, lamps, bird cages and several other things. The profit from selling items in their cluster was put into the student's own account. This money could be used by the student for any approved school-related activity.

Thanks to the graphics cluster Skyline could have its pink referral slips printed at Skyline. Counselor passes were also printed. Graphics also ran all the type for the Origin and Tribune. The money received from these items were recycled into furnishing more materials for the cluster.

D.E. wasn't the only store on campus. The Skyline Exclusive Boutique opened last year, sponsored and operated by the apparel merchandise cluster. The store sold jewelry, dresses, purses, shirts, belts and other items. Some of the items were name brand, such as Jerry Ellis, Genera and Anne Klein. Other items were made in the assembly portion of the fashion cluster. The price of the merchandise was considerably lower than regular retail prices. The

name brand items sold within Skyline Exclusive were donated to the cluster by the Apparel Mart. The money that was made through the boutique was put into an account to purchase new clothes next year.

Working in the boutique allowed the students to get work experience, such as using a cash register, which could be used as a reference when applying for a job.

The clusters offered students a chance to purchase items ranging from a box of candy to a present for a friend. Not only was this a convenience for the students but it also provided money to keep the clusters operating.

-Tanya Moore

Watch the birdy

Senior Elliot Kennedy designed and made the cage himself. The plastic cluster students could sell the items which they made. The profits that they received could be placed into their own separate account. Photo by D. George

Your money or your life

Second year commercial art student, junior Barry Jenkins, sells a bundle of five Christmas cards to senior Kevin Paul. The commercial art students were required to design a card. The designs ranged from a Christmas bell to a stocking containing drumsticks and a rock guitar. The price was \$1.50 for a bundle of five cards. Photo by D. George

Sold out

Senior Maryann Eichenberger takes a break from a school day monotony in order to buy a box of M&M's from interior design teacher Susan Thornton. The sign was one of the ways in which the cluster advertised for the fundraiser. Photo by D. Burris

Getting on

Sandra Coverson, a junior within the horticulture cluster, prepares a mum which was to be sold in the student center. The mums were ordered by the students previous to the Homecoming. The prices ranged between \$12.50 and \$20. Photo by R. Jernigan

Air Conditioning/Heating

Teacher: Royce Crow
No. of students: 17
Location: G Building

Areas of study: learning to repair air conditioners, heaters, refrigerators and soft drink machines

Goals: possible careers as an air conditioning technician, refrigerator technician, engineer estimator or engineer

"To do well in this cluster, you have to know about engineering."

-Ren Newhouse, 11th

Is this me?

Junior Lidia Tovar looks over the items sold with the Skyline Exclusive Boutique. The boutique offered several designer purses and clothes among other items such as placemats, earrings and bracelets. The apparel mart cluster students operated the boutique. Photo by E. Aviles

Flippin' and Floppin'

Junior Maria Ramos prepares a ribbon which was to be used in decorating a mum. The horticulture cluster also sold carnations, wreaths and flower arrangements during the year. The money was recycled into the cluster to buy supplies. Photo by R. Jernigan

Sticky situation

Teacher helps Leon Landin, Advanced Commercial Arts student, reviews his work on a paste up of the supplement for the *Dallas Morning News* to be printed in the March 2 issue. His class was one of the classes working on the supplement. Graphics typesetted everything and photography took the pictures. Photo by E. Aviles

Shall I try it?

Elena Salizar, advanced plastics student, admires her work. Salizar just finished silk screening the words on to the lid she is holding. She was in charge of making the small Texas shaped boxes. The boxes were filled with jelly beans and sold in the student center. Silk screening was one of the last steps in the production of the boxes. Photo by L. Strothers

House

A group of students from the A.M. Construction cluster review the work done by the P.M. cluster on the replica of an 18th century house front. The house front was part of a show held at the Dallas Convention Center during March 6-9. Photo by E. Aviles

Smoothing it over

Junior Robert Guy inspects Texas-shaped for chips and deformed parts. This had to be done after the plastic was cut into the right shape. Guy was helping Elena Salizar make these boxes to celebrate the Texas Sesquicentennial. Photo by E. Aviles

Horticulture: Front: Therese Malbrough, Stephanie Bell, Beth Bucks, Christina Galenty Back: Jesse Sanaseros, Tim, Jim Bartdzin, teacher Joe Johnson, Billy Woods, John Metters, Ruben Cardoza

Topping off the celebration

Ses • qui • cen • ten • ni • al - a virtually unpronounceable word signifying a 150th anniversary. For most Texans, it meant a year of dedications, celebrations and charity events. For seven clusters, it also meant an opportunity to participate in one such charity event and receive some free exposure at the same time.

The event was the annual antique show hosted by Tri Delta, a Dallas-based sorority. Barbara Underwood, chairman for the sorority, decided to present an exhibit on the Texas decorative arts in honor of the sesquicentennial.

After deciding to use Skyline's talents, Underwood met with Principal Gene Golden, who brought together those clusters he thought could contribute to the presentation." After being invited by her (Underwood) in the presence of Golden, we thought it might be advantageous to participate," said photography teacher John Spann.

Photography cluster, along with graphics and commercial art, worked on a newspaper insert to be printed in the March 2nd edition of "Dallas Morning News." The second and third year students took a field trip to Old City Park, where they shot pictures of the antique furniture for use in the Sunday supplement. Commercial art did the artwork, graphic page design and paste-ups for the eight-page insert. They also did the artwork for a children's program book. "It's

something that teachers can use as a teaching aid on field trips," explained Gayla Burgess, commercial art teacher. Graphics, under James Adams, typeset the copy for the more than 600,000 copies that were distributed.

Displays were created by the construction, interior design and horticulture clusters. Construction built a replica of an 1836 house front which was taken apart and reassembled for exhibition at the Dallas Convention Center, where the show was held, Mar. 6-9. In an effort to create realism, interior design fabricated a stenciled border for the house typical of the architectural style of 150 years ago. "This is a precision craft that is being revived through these shows," commented instructor Susan Thornton, a former Tri Delta member. "This project gives everybody a chance to get involved in something different." Horticulture assisted in the landscaping of the show's gardens.

The only cluster to receive financial benefits from their activity was plastics, which molded Texas-shaped candy boxes for sale at the show. The boxes sold for 80 cents or \$2 filled with candy. "Most of those profits go toward paying bills and VICA expenses," said Don Kinney, plastics teacher. All of the clusters, however, agreed that the publicity alone was worth the time spent working.

Typesetting a story was one of Tivi Carter's jobs. Carter, a graphics student, was working on one of the stories to go into the Dallas Morning News supplement that many clusters were working together on. The supplement was on sesquicentennial activities that went on in Dallas. Over 600,000 copies were distributed. Photo by D. George

Hands On

Tickets

Making raffle tickets was one of the things that had to be done perfectly in the graphics cluster. Chris Johnson, a junior, made raffle tickets as a part of his six weeks grade. Other assignments ranged from making pink slips to printing things for Principal Gene Golden. Photo by D. George

P

erfection right down the line

"What you see is what you get."

While Flip Wilson's Geraldine made that statement famous a few years ago, it was more than true for unusual clusters like graphics, television arts and cinematography. And

ting portion, accuracy, spacing and lengths had to be just right. The other part of the cluster is printing. In printing, students printed for Principal Gene Golden. These printings had to be perfect. If they were not, they would have to be redone.

"It takes a lot of hard work to make my work perfect, but I like it," said second year cinematography student Lori Freeman

because what they saw was put before others for broadcast or publication, perfection was the goal they had to shoot for.

In the graphics cluster, students were graded on both amount and quality of work done. In the typeset-

"One of the biggest mistakes we made this year was when we printed the not clear lists. We combined all of the classes—freshmen, sophomores, juniors and seniors—and had to do them all over again," said junior Chris Johnson.

Upstairs in the television studio,

students had to work the lights, cameras and direct their own commercials. Since commercials were a video presentation, the students had to make them perfect. "It is difficult to keep everything going, but we have to do it to get a good grade," said sophomore Chelsea Crisford, a first year television arts student. Pre-production of the commercials and other assignments helped to make their final products perfect.

"Our films had to be perfect, everything had to be just right. The editing, recording and sound mixing had to be faultless," said second year cinematography student, junior Lori Freeman. The cinematography's production had to be so well done that they used a professional sound studio at Los Colinas to mix the sound for their productions.

Ready, set, type

Typesetting a job, sophomores Anissa Randle, Stacy Mitchell and Rhonda Johnson try to see who can finish first. These graphics cluster students typed jobs such as school programs, special lists and yearbook pages. Photo by D. George

Prepare for pictures

Setting up a view camera to shoot pictures of the murals at Fair Park for the Antique show was a special task for the photography arts cluster this year. Second year students Ricky Musgrave and Anthony Newhouse and third year student Heidi Deuel took pictures of the antiques in late January. Photo by W. Woodruff

With perfection in mind, typing a story, mixing sound or selling a product became a goal for each of these clusters. They wanted to be sure that "what you get" was just right.

Photography/Cinema

Teachers: John Spann, Frank Sloan

No. of students: 91

Location: G and F Buildings

Goals: to learn how to process film, photography people, make prints and make films

Activities: field trips, photograph professional models, help with yearbook cover, use various cameras

Special instruments: Yashica cameras, Omega enlargers, 35mm cameras, view cameras, video cameras

"This cluster is really a lot of fun. Photographing people and students is really a lot of fun."

-Anthony Ellis

Are you Herb?

Juniors Haywood Henry and Charles Webb practice an interview for the second year television arts cluster. Doing interviews was a part of their six weeks grade. Webb was portraying Herb, who was nationally known by Burger King. Photo by D. George

P lanting a future

"What do you want to be when you grow up?" was a question most students heard all their lives and more often as they began high school. Clusters helped students in their search for a future occupation.

Though all clusters prepared students for a job, not all students were prepared to take a job in that field.

"This (food service) is just something to fall back on," said second year food service student Kevyn Crook.

Even if a student was planning to take a job in that field they had many choices as to the specific work.

"Some of the jobs (for food service) are assistant chef, food preparer at a hotel or your own management," said second year student Tammy Tucker, "I am going to have my own restaurant, something different from other food places."

The secretarial skills that Cindy Alcala learned in hotel/motel also extend into other fields of business.

Though the clusters prepared students for a job as soon as they graduated from high school, there are some colleges and other places of learning they can attend for further training in that field—places like vocational schools like Lincoln Tech or the military service.

Hotel/motel student Kurtis Jones said that college courses will show them more of the money management and running of a hotel than the specialized learning they got from

the cluster.

Students who complete their cluster usually have no problem finding a job. Some clusters like radio-television repair could have placed every third year student on the job and still had calls. Other clusters built confidence, prepared for state licensing or gave the students high-demand skills.

"I am confident I can go out into the business world and make a lot of money," said cosmetology student Nicole Yeldell.

-Ioanna Garcia

Star stuck

Making pins by gluing pin backs to plastic stars was first year plastic student Carla Strickland's job as the cluster worked to finish the order for Hood Middle School. The stars were made to be worn by Hood's honor students. The cluster has also gotten an order from the school district for 1,000 desk trays. Photo by R. Jernigan

G

etting the job done

Whether a student was interested in accounting, advertising, child care, welding or "doing his own thing," he could find his niche in one type of class—the vocational programs.

work program because we concentrate on learning skills that are above entry level."

Stanley Baker, head of the DE program, which concentrates on the

Vocational programs provide students with an alternative to three hours of study halls or unnecessary classes. Students would leave school to work on jobs in a specialized field.

Vocational Office Education and Distributive Education covered business and management techniques. In VOE, students were trained in accounting, word processing, typing and other office skills. In addition, those enrolled in the course became members of the Office Education Association and participated in OEA-sponsored conferences and contests. Amy Mathew, in her first year teaching the program, commented on the difference between it and other courses. "I don't really consider this a iness, expressed a similar opinion by stressing the "leadership and civic consciousness that we hope to bring out in our students."

retail sales and marketing side of bus-

For those interested in a food service or fashion design career, Norma Carlson offered the Home Economics Cooperative Education program. Students received three credits for this class and were expected to work at least 15 hours per week. The major employers of young people from this course included such well-known businesses as Sears, Joskes and McDonalds. Carlson, who has been with HECE for five years, actively recruited students with an interest and desire to be trained in food service, fashion for even child care. "We stress more on job skills than curriculum," she said,

"but about half of our students go on to a junior college."

If a student preferred to enter an occupation immediately after completing high school, the Industrial Cooperative Training and Coordinayted Vocational Academic Education programs prepared him for just that. Eugene Henderson of the ICT program provided "one on one" instruction in the areas of welding, auto body work and painting. Part of the original school curriculum, this program worked best for those students who were "motivated for success," according to Henderson.

The CVAE program, run by Ray Presley, has also been with Skyline from the beginning. This course was designed to help those students not so motivated with school by placing them in suitable jobs. Its on-the-job training was geared to the needs of the individual student.

-Kevin Tucker

Mums the word

Third year horticulture student, senior Jodi Marino makes Christmas flower arrangements at McShann Florists. Marino specialized in arrangements of all kinds there. Photo by T. Vallier.

Experience is strength

As the bell rang, Bob hurried through the door into his afternoon cluster. "Just in Time!" he thought. Before he could begin working, however, the teacher's voice sounded from behind him. "Bob, would you come up here, please." Fearing the worst, he approached his instructor's desk, anxiously awaiting the expected reprimand. Instead, the teacher asked him a question. "How would you like to have a paying job?"

Although Bob was not an actual student, his situation was quite real. It was also often repeated as more and more cluster students opted to participate in the on-the-job training (OJT) program.

The OJT program has existed at Skyline since the school opened in

1970. Tony Johnston, the director of the program for the past two years, explained how it works. "The cluster teacher will usually recommend a student to me when they go for a job interview. Later, I serve as a link between the employer and the cluster."

Companies from around Dallas contact the clusters with opening for jobs. "We have employers from all over the city call and say they need help," said Photo Arts instructor John Spann. The teacher then chooses from two to five students to go for the interview. To be chosen, a student had to have a certain amount of work alone and had to "be capable" in the eyes of his teacher. "These students must be capable because they are representing their cluster and their

school," commented Dutch Wigman of the Construction cluster. Beginning next year, however, students will also be required to have spent at least two years in a cluster before they can become eligible for OJT.

Reaction to the OJT program has been consistently positive. An average of 100 students each year participate in the program and benefit from it greatly. "It is an excellent program. It is one thing to learn a subject, but another thing to know how to apply that knowledge in actual work," said senior Patrick Burnett. The teachers are equally excited. As Wigman put it, "This is a great way for students to further their education. . . . and get paid for it!"

Kevin Tucker

Just a

TYPE

Dividing up

Although 4,071 students crowded into a building built for 2,500, district cutbacks and enrollment in some clusters caused the faculty to decline. Crowded classes became the rule rather than the exception. Freshmen and sophomores faced new requirements with 22 credits while juniors and seniors had to have 21.

While the difference was only one credit, the requirements weren't. The bottom two grades had to have one extra credit of English, math and two years of a foreign language. They also had to have a semester reduction in government.

Juniors also had to take the Texas Educational Assessment of Minimum Skill (TEAMS) test which has to be passed by their senior year in order to receive their diplomas.

Privileges for seniors such as exemption from finals class time for traditional senior activities, and getting out two weeks before underclassmen were eliminated. "I had planned a trip the first week of June, but I can't go now because we get out the same time as everyone else," grumbled senior Donna Johnson.

Teachers faced a test March 10. The Texas Examination of Current Administrators and Teachers (TECAT) was offered to teachers twice before August. If not passed by that time, the teacher could be terminated.

Keeping up with all the changes, making the adjustments and working toward keeping a positive attitude was the job placed on students and faculty alike. While the degree to which each group and individual managed and in doing so proved that they were just our type.

Due to rain, the senior cookout was moved to the courtyard area next to the main building and lunchroom. Many seniors did not show up which left more hot dogs for the seniors present. Here, seniors Belinda Pena and Dolores Santoyo chow down. Photo by R. Kemp

More than a gesture: Senior officers see position as way to help make decisions, promote their class

"I would rather be a leader than a follower," was the reason many ran for offices and the senior class officers were no different.

Making decisions was involved in many duties such as choosing the senior invitation and helping to decide on a design for the senior t-shirt.

Being an officer of the senior class differed from that of any other class. One of these differences was dealing with the senior activities and

graduation.

"PTA organizes the activities but we as officers have to get the idea across to the class," said vice president Steve Autry.

But being an officer wasn't all fun and games, it also had its downfalls.

"I get tired of being asked things just because I'm an officer," said secretary-treasurer Bridget Sims. "I don't know anymore than they do (about the many senior activities)."

Being asked questions wasn't always such a bad thing.

"They (the senior class) elected me to be their representative, if they ask me something I don't know about, I'll

find out for them," said Autry.

Although being an officer demanded leadership and responsibility, it

proved to be satisfying and very rewarding.

"Although this is just my first year of being an officer, and

we have had a few problems, we've overcome them and have had a very successful and fun year," said Barnes.

-Traci DeVies

Listening in

Who's Who

Picking the top students in the senior class is a job teachers find difficult. Many students succeeded in a single area, few found success everywhere. Whether their achievements were singular or they showed multi-faceted talents, these 13 seniors were chosen from the best at Skyline. The nominees represented all areas from athletics to extra-curricular activities.

Teacher's recognize Gibson's maturity

Outstanding leadership ability and maturity were two characteristics of who's who honoree Scott Gibson.

"He is mature responsible and perceptive. He is always trying to improve himself. He is also a academically intelligent," said history teacher Diane Hranicky.

Gibson planned to attend The University of Houston

for two years and then work in the hotel industry or architecture.

"He doesn't just live for today. He has long range goals. He wants very much to be successful," said Hranicky.

-Sharon Rybarski

Getting job done strongest point

Who's who honoree Todd Vallier was noted for responsibility, dedication and leadership.

"Todd's strongest point is that he is so dedicated. If he sees something important isn't right, he will make sure it gets done," said Judy Babb.

Vallier served as an editor-in-chief of the yearbook his senior year. He was

responsible for the CDC and sports and helped the photo editors with their responsibilities.

Vallier planned to go to college, majoring in photo journalism, political science or agriculture.

"My big ambition is to organize the yearbook staff in order to make this year's Origin the best it can be," said Vallier.

-Sharon Rybarski

'Making the grade' gives Adams All-City

Varied interests helped Aretha Adams become a who's who honoree.

Adams participated in both volleyball and track and kept her grades up, also. She won the all-city all academic award for three years.

"My grades are important to me," said Adams. "I consider my greatest accomplishment to be making no lower than B's my junior year."

Adams plans to attend Texas Tech-University to major in computers.

"Aretha Adams is so deserving of who's who," said coach Mary Thomas. "She doesn't flaunt her talents. She just uses them. And, that's why she's going to be a success at whatever she does."

-Sharon Rybarski

Schroen credited with leadership

Hardwork and reliability were two reasons Anneke Schroen was elected a Who's Who honoree.

"She has proven herself to be strong leader and worker. She is a student I can always count on," said science teacher Gary Atwood.

Schroen applied to several colleges including Vanderbilt, Standford, SMU, UT and Northwestern. She planned to major in the sciences as an undergraduate, then go to medical school.

"My long term goals are to

become a doctor and travel a lot," Schroen said, "then, I'll see what else I can do."

-Sharon Rybarski

Making big money Tucker's future goal

Who's who honoree Kevin Tucker's life ambition is to make a lot of money doing

something he enjoys. Though many other's share this goal, Tucker had the means to achieve it.

Applying to Stanford, Cornell, George Washington University, RPI and California Tech, he plans on majoring in electronic engineering, and maybe going over into computer science.

"He is a very hard worker. He got into Journalism I and in a very short time he worked his way up as an editor on both staffs," said Judy Babb.

-Sharon Rybarski

Gender won't keep Prince from her goal

Who's who honoree Kim Prince began what she hoped would be her career in sports writing as a Senior. Prince served as sports editor on both the Tribune and the Origin.

"I enjoy watching and reporting on the sports teams. I like to show people that

women know sports too," Prince said.

Though she believed there is a double standard for women sports journalists, Prince intends to break the barrier. She is planning to major in journalism at either TCU or UT. She is eligible for the TA scholarship at UT which will help determine her decision.

Prince has noted for

hardwork and dedication during her four years at Skyline. She knows how far she has come and where she still has to go.

"I have my life planned I know where I want to go and what I want to do. I don't want to be side tracked," said Prince.

Jernigan 'draws' towards future plans

Ten years down the road, who's who honoree Jason Jernigan. Jason Jernigan plans to be working as a commercial artist. Though that seems a while away, Jernigan plans to work until he reaches his goals. These include his short-term goals, also.

"I want to complete high school and college. And maybe play some football for someone," said Jernigan.

Jernigan, who played football all four years, reflected on his greatest achievement during high school.

I think playing football well enough to make varsity would be my greatest achievement."

Though he spent a lot of time on the playing field, Jernigan also managed to impress teachers at Skyline.

"He is intelligent. He isn't just a jock," said commercial art teacher Rebecca Kores. "He is a great role model for the students of Skyline."

-Sharon Rybarski

Teachers respect 'All-American boy'

Who's who honoree Kevin Sampson was characterized by his teachers as honest and respectful.

"He's an all-American boy. He has a lot of respect for his teachers and all adults," said coach Sherman Hughes.

Sampson intended to go to Tyler Junior College, but isn't sure exactly what he wants to major in.

"He is a success at whatever he does. He is all good qualities, not one bad one. His future couldn't be brighter," said Hughes.

Career in physics one of Steele's goal

David Steele possessed many characteristics of a typical who's who honoree. He was dependable and an excellent student.

Steele was uncertain about his future for a long time, but finally has decided on a career in physics.

"I always wanted to pursue a career in the sciences. Physics is a good field because there are so many things I can get into," said Steele.

Steele will attend UT in Austin next fall, hoping to adapt easily to college.

Physics teacher Hugh Brown said, "David is serious. He takes an interest in his school work, the school

itself, and his fellow classmates. He is respectful and cooperative in every respect."

"It can be difficult to keep up a grade point average at times," said Steele. "Since I've managed to keep it up, I consider that my great achievement."

-Sharon Rybarski

Success comes with God, football

Though Who's who honoree Jeff Thomas isn't positive which college he is going to, he is sure of what he wants to accomplish there. He wants to major in business law and minor in Bible-philosophy.

"I don't just want to get through college. I am going to make good grades, too," said Thomas.

He considers his greatest high school achievement to have played football.

"Before I made the team I led a wild life. I have changed my outlook on life since then. I'm a player on and off the field. You have to be prepared for what you do. You have to maintain a good attitude," Thomas said, "Since I joined the team I've had a B average."

Thomas hopes his future will hold a business career. He wants, also, to follow in

his father's footsteps as a minister at his church.

"I hope that I will be able to take over my dad's duties as minister of my church when he is ready to leave," said Thomas.

And the one other thing Thomas wants from his future is to "live good."

Citizenship service gives Miller award

Who's who honoree Kerri Miller was recognized for her service and citizenship.

"I do things to please myself. If I want something, I'll go after it," said Miller.

Miller planned to go to NTSU, majoring in math. Then Miller wants to use that math degree to be an accountant.

"Kerri is outstanding in a lot of different areas. She is an excellent student—one of the top leaders in the school," said English teacher Margaret Hamlin.

-Sharon Rybarski

Huff's achievement is surviving school

Intelligence and dedication were two characteristics of Marilyn Huff.

Huff served as president of NHS, MAO and the Science Club her senior year.

"Marilyn is dedicated to her school work. She is responsible and reliable," said science teacher Gary Atwood.

Huff planned to attend Texas A&M to major in chemical engineering.

"In about 10 years, I would like to be working as a chemical engineer and making a great deal of money," said Huff.

She worked hard to achieve what she has in high school and believed her greatest high school achievement has been "surviving it."

-Sharon Rybarski

Two-sport athlete brings Bowen fame

Who's who honoree Camellia Bowen proved her athletic ability throughout her high school years, playing basketball for four years and volleyball for three. She hopes that she can continue in athletics.

"Though I plan to major in

hoping to get a scholarship through basketball or volleyball," Bowen said.

"She is fine young lady, as well as an athlete," said computer math teacher Brenda Johnson.

"She excels in every area. She has a determined personality."

Hitting the books

Mike Gumpert is hard at work in his homemaking class. After recovering from his coma he does most everything he used to, including school work.

Totaled

After hitting a cement wall, Mike Gumpert's car was wrecked beyond repair. While reaching down to pick up a cassette tape the wheels of his car turned causing him to hit the wall.

Will to Live: The lifesaving power of determination

The Mike Gumpert story reads like a miracle. March 8: While reaching down to pick up a cassette tape, a horrible car crash throws Gumpert from his car, knocking him unconscious for eight days.

Comatose at Methodist Hospital, Gumpert wasn't given much chance for speedy recovery. Three weeks at Methodist were sure to be followed by one to two years of rehabilitation, said doc-

Outside-In

The impact of the crash caused the interior of the car to cave in. The wreck put Gumpert in a coma for eight days at Methodist Hospital, but his recovery was unexpectedly rapid

tors. They didn't know Gumpert's will and couldn't predict his rapid improvement. Gumpert said, "I had a very strong will to make it all the way back. I worked hard in each therapy sessions I had."

Even though doctors doubted that Gumpert's recovery would be soon, rapid it was. Gumpert was out of Baylor Rehabilitation Hospital in a month after undergoing physical, occupational and speech therapy. Soon after returning home, Gumpert began preparing to reenter school.

He had an in-home

tutor who came to his house every morning at 8 a.m. She gave him daily assignments and issued his final exams. Gumpert said, "It was because of my sincere will and determination that I am back in school today. While I was in the hospital I saw many people that had given up, but I refused to give up on my life."

"If I had the chance to talk to someone in the same situation I was in, I would tell them not to give up. Any you'll get through it," said Gumpert.

YOU tell us

How do you feel about the new numerical grading system.?

Mario Finnell, 12

"I think it's good because a 69 on a report card looks better on a report card than an F"

Kim Norrell, 12

"I like it a lot better, because it helps those who make good high grades."

Steve Autry, 12

"Well, it's O.K., it works both ways. It shows how close you were to passing or how close you were to failing."

Paula Kindle, 12

"I think it's a good system because now your parents know exactly what you make, where as before it was all general."

compiled by Tiffany Davis

friendship more than hand jive

friends support
year after year

At age three while playing in your sandbox with your next door neighbor, you're not likely to be talking about dress and hair styles for your senior prom, but 14 years later your next door neighbor is your best friend and prom may be the main topic of conversation.

"When you go to

school with someone since first grade, there's a bond between you," said Donna McBride.

Staying friends for many years was not as easy for some.

"You grow apart because you get new interests which don't appeal to both of you," said Stephen Johnson.

Seeing friends at

school was a definite strength behind some friendships, but it sometimes created boredom.

"When you see people at school every day you tend to get sick of them," said Jennifer Gianguilio.

Maintaining friendships was one thing but maintaining close friendships

was another.

"We aren't as close as we used to be," continued McBride, "It depends on the past."

Although it was difficult for some, it wasn't for others.

"We still see each other at parties and jam sessions," said Joe Beebe.

Whether you

were best friends with someone you went to kindergarten with or with someone you've known for only a year, it didn't matter. It was the relationship itself that mattered.

"Once you get to know people, it's all the same," said Beebe.

Measuring up:

A dollar at a time,
seniors pay the price

"Attention seniors, cap and gown orders will be taken today..."

"Senior t-shirts will be on sale during all lunches..."

"Senior buttons will be on sale..."

Senior responses to all these cries for money varied, but everyone agreed that it added up fast and to a lot: senior t-shirts cost \$13, buttons \$4, caps and gowns \$11.75.

Then came invi-

tations, memory books, senior activities and dozens of other things.

"You're paying for memories. It's all to have a good time," said Michael Hinojosa. "It's all a part of being a senior."

Not everyone agreed with Hinojosa even if they had the money to burn. "If I had a choice, I wouldn't even buy a cap and gown. I'd just wear a

t-shirt and shorts to graduation," said Cris Asensio.

Lisa Ingraham carried it one step further. "Most of it you don't need. They just try to rip you off because you're a senior."

The ones that griped the most usually spent the most. Jason Jernigan pointed out that graduation attire was the only necessity.

"It's only as ex-

pensive as you make it. None of it except cap and gown is a necessity to buy," said Jernigan.

Peer pressure and the fact that being a senior was a once-in-a-lifetime experience had a great deal to do with purchases. "It's worth it at the time," said Doug Thompson, "but when you look back you wonder why you spent it all."

-Traci DeVies

Make it fit

After waiting in line, Jimmy Carroll gets his chance to measure up. Wilsie Cap and Gown Company took height, chest size and head size before assessing an \$11.75 charge for the blue satin gowns. Additional tassels sold for \$4.95 or \$7. Photo by E. Aviles

Talking it over: Getting ready for getting together again and thinking ahead

Help! We only have 10 years before the Big 10 year Reunion. We have to start showing some promise so we can prove to all those people who thought we would be on the methadone program by now that we were worth something.

What students envisioned as their ultimate futures var-

ied from the very general to the very specific. Belinda Nichols hopes to be a very successful commercial artist with a master's degree in art. She believes an advertising agency of her own will be in the wings.

While others give serious thought to career goals, Creshunda Moore

thought of family as a part of her future. "I hope to be working in the field of photography; And by then, I would like to be married with one or two children," said Moore.

Continuing an education after achieving a career are Clarissa Ballard's thoughts. "I hope to be doing very well in fashion marketing.

but I still would like to be working on a highest degree that can be achieved in this field," said Ballard.

Not planning that far in advance, Cindy Alcala has no idea what she hopes to be doing. Alcala said, "whatever I'm doing I hope I will be enjoying it."

Sonya Solano

Discussing future plans: Some seniors decide upon a military career instead of college

Why military and not college? "I wanted an opportunity to travel and see the world," said senior Keith Johnson.

Johnson has made a decision to join the Air Force in-

stead of attending college. A college education would not guarantee him a job when he graduated but the Air Force offers life-time experience, good benefits, and life time pension security.

Keith is

scheduled to leave for the Air Force on July 30 which he is most anxious for.

Senior Oscar Casas who has enlisted for the Marines is scheduled to leave June 2, six days before graduation. Casas said "I would

really lie to walk across stage with my friends but the way it works now, I might not." Getting the date changed until after graduation is something Oscar Casas is working hard on. The idea of traveling and seeing the world appealed to him.

That's what finally convinced him to join the Marines. "Besides that," said Casas, "To me the uniforms represent pride and honor." The military or college either way decisions of the future have to be made.

Funny business

Seniors take a break from the hard life with blow-off classes, as office aids

You've just finished three years of English and math, two years of science plus all the other required subjects. It's your senior year and you deserve a break, right?

"It's time to play!" said Amy Kraft, "I've worked for 12 years, I deserve a break."

Being burnt out on school wasn't the only reason for taking it easy; some had other reasons.

"If I took the harder classes I'd be taking a chance at ruining my average," said Anita McGruder, "those people (taking harder classes) are stupid."

Others agreed with Kraft and McGruder, but some didn't; they were planning on college.

"I can't afford to take a year off, if I did, I wouldn't be as prepared or college," said Rebecca

Schuhmacher whose schedule included AP English and Calculus.

By not blowing off their senior years, they were gaining an advantage over those who did.

"Those people (taking easier classes) are making a mistake which they will later regret," said Mike Hill.

Parents often had different opinions.

"My parents want me to take more

challenging courses and go on to college, but I'm doing what's best for me," said Melissa Arista, who spent four hours a day in the band hall.

Regardless of the decision each senior made, one thing never changed. The year marked the end of their high school career. The next step they took would tell them if their decisions were the right ones.

YOU tell us

How do you feel about getting out of school June 5, 1986?

Shannon Badgett, 12

"All of the other seniors in the past have gotten out early and I don't think it's fair to change that now."

Paul Peterson, 12

"I think the seniors just aren't accepting it but that's the policy and we have to follow it."

Lori Brown, 12

"I don't think it's fair because we don't have a lot of time for college preparation."

Miriam Dominquez, 12

"I think that as seniors we should have more privileges, because we have more responsibility and getting out early is one of those privileges we have earned."

Put me on your list: Choosing right school part of College Night

Coming out of the counselor's office carrying transcripts, ACT and SAT applications and financial aid applications, you begin to wonder if college is really

worth all of this trouble. You talk with your friends who are just as confused as you are. And you thought it would be easy, right?

Preparing for college was difficult for most seniors. Decisions that had to be made seemed overwhelming. Calendars filled with deadlines for applica-

tions, test dates and visitor days added to the confusion.

Students prepared for college by taking the PSAT as juniors. They also took classes that would help them in college.

"I've been taking AP classes that should help me in college," said An-

neke Schroen, "and I took the PSAT my sophomore and junior years so that I would do better on the SAT."

The SAT or the ACT test was required by most colleges. The decision to retake the test was one faced by hundreds.

"I'm going to take the SAT as many times as I can, that was the college will know my capabilities," said Shannon Badgett.

Going to college night was also a way to prepare for col-

Taking note

Senior Keenan Montgomery fill out a card for more information about Texas A&M. Most students filled out cards in order to receive financial aid information, college catalogues and applications.

Looking it over

Seniors Chris Cox and Mark Rakestraw look for the requirements in an information booklet about Oklahoma University. College Night was a time to find more information about colleges inside and outside the state.

All booked up:

Gathering pamphlets, registration forms prepares seniors for new beginning

lege. Seniors came to get information about colleges in order to narrow choices. Also, most seniors appreciated college night because they could talk to representatives from the colleges.

"You could ask them questions without having to write or call them," said Ron Bone.

Seniors, then, began to choose. The process included evaluating perspective colleges in

majors and departments offered, the reputation, tuition, location, scholarships and financial aid available.

While these things influenced decisions, students considered the location very important. Ninety-seven percent of the seniors going to college hoped to stay in Texas while the others favored leaving the state.

"I'd like to go somewhere in the

Northeast or maybe in California," said Schroen, who was representative of the 25 to 30 seniors who looked to out-of-state schools.

"Choosing to leave the state would cause me to grow up too fast," said Deidra Franklin, "so I am definitely staying in Texas."

Though decisions about college were tough, parents were usually supportive of their chil-

drens' choices.

"They told me to do what I think is best because it is my life," said Stephanie Williams, "they've been very supportive."

Once all of the Saturday morning tests were taken, the final decision was made and the letter of acceptance was received, seniors were able to relax and enjoy their senior year.

Sticking with it: Students wear buttons to express personality

Prince, Led Zepplin, Motley Crue, Michael Jackson, Sheila E., and Wham! were just a few familiar faces seen around school daily. Not in person exactly but these stars competed with favorite sayings in the button war waged on people's jackets.

Jackets laden with buttons bearing catchy phrases, expressed people's personalities.

"Buttons are means of communi-

cation," said senior Michelle Anderson. "I like to wear them (buttons) to decorate my jacket," said sophomore Kim Henson.

Something that looked good automatically caught the eye. Good looking jackets with buttons worked the same way. Therefore, buttons were also used as a means to attract attention. They were also used to cover empty spaces.

As in every-

thing, people had preferences as to the types of buttons they wore and why they wore them.

"I like Kermit (the frog) because it is different," said Henson.

"I like Raider Pride," commented sophomore Donetta Smith, "because I have pride in my school."

"Don't be humble, you're not that great," is my favorite," said senior Richard Gardner.

Some students didn't like buttons with entertainers. "They are too girlish," said junior Zane Braggs.

Still other buttons were too off-color to make it through the day—or if they did, it was only because they were surrounded by too many others to get scrutinized that closely.

"I wear dirty buttons but I do remove them when necessary," said Anderson.

Pin-up

Displaying his buttons on his jacket was sophomore Phillip Bagelys way of letting everyone know his favorite rock group. Buttons were a non-verbal way students could express themselves as an individual. Photo by M. Anderson

With 834 seniors, decisions about the future were bound to vary. Over 60 percent looked to some sort of college. Of those planning college, 35 percent planned to go to one of the Dallas County Community Colleges to start. This chart shows what colleges would become extensions of Skyline and where one could look to find alumni.

Horsing around:

Latimer spends time horseback riding, entering contests

The grey stretched limo pulled up in front of Skyline where it idled quietly while waiting for its rider. Curious students wandered by, peeking in, wondering who the car was waiting for.

This was the scene when senior Greg Latimer sauntered up to the grey

car. Latimer won the ride in the limo when he and three friends from Kimball beat seven other groups in one of the Crystal Chandalier Country, Wester Club Weekly Contests.

The Crystal Chandalier had Teen Night every Wednesday. As part of the evening's activities, Latimer and his

friends entered a contest in which they lip-synched Roll On by Alabama while pretending to play the instruments.

Their first reaction was "sheer excitement when their names were announced as the winners of the contest," said Latimer.

This is not the first contest Latimer

has won. he has entered horse shows before and come out a winner.

Since the Chandalier Room, none of the guys has entered anymore lip-sync contests but the memory of the limo ride and the shock of those who saw him getting in remain.

Seniors piling it on:

Seniors participate in planned activities to make their last year more enjoyable

It was a rainy, humid, and dismal day. The last thing on anybody's mind was the senior cookout. But everyone decided to give it a shot. As Seniors waited anxiously with hunger written on their faces; the buns were being unwrapped, the chili cooked, and the weiners steamed.

Mouths watered as the seniors waited to bite into one of those super

hot dogs.

Activities play an important part of the senior year. Among those activities are the senior cook out and lock-in. Many seniors attended the cookout in spite of the bad weather which made it a success. "Despite the conditions of the weather I feel that we were able to have a good time," said Elliott Kennedy. There were more people there than I expected," said Micha

Whitley.

Even though it was a rainy, bleak day, most students had a positive outlook about the cookout. "It was a good opportunity for the senior class to get together and have a good time early in the year," said Stephen Johnson.

The lock-in was another long awaited senior activity. The fun began at midnight, but the crowd began to form about

11:45. Anxious seniors filled the parking lot appearing as if they were ready to go on a camp-out. Warmups, radios, pillows, blankets and cabbage patch dolls accompanied many seniors in preparation for the long night ahead.

A single file line was made to enter Don Carters, but once one recovered from the long line and search, the fun began. "The lock-in

was great, it was like having a giant clubber party," said Kim Campbell.

After breakfast was served, the end to this "once-in-a-life-time affair" began to draw near. Carters was overtaken by yawns and sleepy eyes; it was then time to say good-bye to friends. But no one who attended the cookout or lock-in will ever be able to say good-bye to the memories.

Hot stuff

Many hungry seniors attended the cook-out. Among them were Gail Sherman and Mike Teal who seem to be overjoyed by the smell of hot food.

Boogie down

The senior lock-in was a night filled with plenty of fun. There was always somebody on the dance floor grooving to the beat, as shown here by Roni Jernigan and Don Burris.

Looking to years ahead: As end draws nearer, seniors forced to think

After 12 years of schooling, the last thing most seniors want to think about is four years of college.

The desire for a good job plus the added pressures of parents and friends was often the main reason why many decided to go to college.

"Besides the fact that it (college) is a necessity to succeed in life, family pressures have been a major motivation behind my decision to

go to college," said Scott Gibson who planned to go to the University of Texas after two years at the University of Houston.

Once the decision to go to college is made, the next step is deciding which college to go to. This decision often depends on what one wanted to do as a career.

"I want to be a music teacher," said Jennifer Gianguilio,

who was hoping to go to the Oberlin Conservatory in Ohio, a college noted for its fine music program.

While many chose college to help them obtain a job, some got jobs through other programs.

"I got enough training in my cluster (TV Arts) but I still plan on going to broadcasting school," said Joe Beebe, who hoped to become a musician

and producer.

But sometimes no further training was necessary.

"I was in the industrial electrical cluster for two years and I've already got a job set up doing custom electrical work," said Robert Clifford.

Whether the decision was to go to college or not, the decision had to be made and would determine the future of the graduating senior.

All wrapped up

Making a fruit baskets for elderly people at the Willowbend Nursing Home was a community service project that the senate scheduled for Thanksgiving. Freshman president Karin Murphy finishes wrapping plastic around a basket at an afterschool senate meeting. Senators were asked to bring fruit and stay after school to get the baskets finished. Photo by L. Oliver

Morning Monotony

Senators could not attend during school meeting unless they attended the pre-school meeting. Three misses of any meeting would cost them membership in the organization. Junior senators listen as the officers discuss price and design of class sweatshirts. Photo by F. Harris

GIVE ME A BREAK

Class officer. It's not just a name. It's a job—a job that had its share of responsibilities throughout the school year.

Class officers, as well as senators, had to meet the set standards. "The advisers and the officers are going to be more strict on grades attendance and cooperation," said sophomore vice president Margo Gomez.

"We really want the students to get involved," said sophomore secretary-treasurer Jenny Bonds. Students contributing their ideas helped the

senate to provide the activities they knew the student body wanted. Freshman vice-president Dori Mann said, "I asked people within our class for their ideas for class t-shirts. Their responses have been very positive."

To be successful, each senator had to be willing to work and capable of handling responsibilities asked of them. "I feel that the senators are becoming so much more involved. And there's more willingness from the senators to present a good outlook of the stu-

dent body," said sophomore president Chris Bone.

Reforms hindered the usual success of the senate. Student body president Paul Petersen said, "I think the senate has been hit hard by reforms. We only have one meeting a month instead of the usual two. We are not able to accomplish as much and this leaves a lot of the work left up to the executive board, such as planning projects and dances."

Participating in senate meetings was not something that came naturally. It was neces-

sary to learn parliamentary procedures used in senate meetings and activities. "Since we are new to this organization, we are trying to learn as much as possible so that we can start participating like the other classes," said Mann.

The freshman also suffered when running for office. Friendships between candidates could easily be hurt by the results. Freshman president Karin Murphy said, "It was hard because we each knew one of us was going to get the position."

The senate sponsored

It's like this

All say aye to forming a committee to decide whether senate should keep the traditional sweatshirt or create a new design. Sophomore president Chris Bone discusses the option before calling for vote. Photo by B. Davis

a collection to replace the Goddess of Liberty, the figure on top of the state capitol building. They donated \$100 to the project. "We didn't receive as much money as expected but we're satisfied with what we did receive" said Gomez.

The class officers deserved more credit that they received for the jobs they accomplished through the year. Petersen said, "I think the freshman and sophomore classes are pretty strong. I can see leadership in those classes that is really developing."

YOU tell us

What were your New Year's resolutions?

Joel Police, 11th

"I made a resolution to come to school and to pass all my classes. I also want to study ahead for all my tests and try not to be absent."

Robin Oestreicher, 9th

"My new Years resolution was to try to do my very best in school."

Anita Hernandez, 9th

"I made a New Years resolution to make better grades in school, not to settle for B's, but to hold on to an A average."

Leah Alexander, 9th

"My New Years resolution was to become more organized in school, and to get a good tan too."

compiled by Cathy Huntsberry

THE KISS OF DEATH

The eerie quiet was broken by hushed giggles and the pad of tennis shoes on the concrete. The children hurried up the front steps, pushed the bell and waited. The door swung open and the occupant was greeted with the much expected, "Trick or treat." Looking over his porch full of hopeful faces his eyes came to the tall one in the back, "My, are you a big one," he said.

Big or not, Halloween was one of those difficult things to give up. "Some of my friends are embarrassed to go out on Halloween; but with a mask on and in the dark, who will know

it's you. Oh, and when you get free candy, go for it," said freshman Craig Crenshaw.

But sometimes students took the negative approach by staying home and refusing to go out. Some students think it's a risk to go out on Halloween. Every year people hear of kids getting raped, killed and poisoned, so some students thought it was safer to stay home and watch television specials, like *Bugs Bunny* or *Fat Albert*. Freshman Tim McKelvey said, "When I got beat upon Halloween once, I knew Halloween wasn't for me."

Students who went

out looking for something different to do instead of trick or treating decided to go to haunted houses, like the March of Dimes, or the haunted house at Skyline. The one at school was organized by both band members and officers. Junior Todd Lewis said, "This should give the students some fun and a way to raise money for their accounts."

But other students weren't out doing nice things. They were hiding in the bushes, patiently for some nice innocent child to pass so they could mug some of his goodies and Halloween toys. Even though

it wasn't nice, students thought that they were exhibiting the Halloween spirit in their own way.

Freshman Miguel Alanis said, "It's really great when you see little kid's moms looking out for thieves in the streets when we're hiding in the bushes in front of a house."

After Halloween students realized that going trick or treating wasn't all child's play. It was a good time to go out, collect goodies, go to parties and do the bad things only Halloween could allow you to do and not get in trouble for.

Loading up

With all the supplies need in his briefcase for the night's homework, Freshman Robert Murphy boards the Sunset bus for a long ride home. Photo by D. Green

ROAD TO GOOD TIMES

It's 5:30 a.m. You hear a loud buzz. Are you dreaming or is it the alarm clock?

As you hit the snooze button on the alarm clock to get an extra 10 minutes, you contemplate whether or not to get out of bed, get dressed and head out the door still half asleep to begin another day. It would be wonderful if you were going out to the comfort of your own car; but you're not. It's off to the bus stop to wait for the yellow school bus.

Riding the bus was the way students got to

school. But of all the ways to get to school, riding the bus was most definitely the least favorite. The long bus ride had many unwanted aspects to go along with it. Students were usually informed of what time to be at their particular bus stop. Most bus drivers took pride in their jobs and were on time. But there are always exceptions to the rule.

"I hate riding the bus. You have to wake up extra early to be at the bus stop on time to wait for a late bus. And you have to sit three to a

seat sometimes which is very uncomfortable," commented junior Paula Baines.

Rowdy behavior on the buses also made riding the bus uncomfortable. Many people did not mind the screaming and shouting on buses, usually because they were the ones making the bus loud in the first place. Others just sat back and accepted the noise, hoping that before long they would have their own car.

"I don't mind riding the bus since that is my only way to school. If people start acting up

and throwing things at each other like they do on other buses I would find me a new way to school," said junior Tera Edwards.

Buses will probably remain unpopular with a lot of students, but some could not care less if they rode the bus or not. Although the bus did have its disadvantages, students depended on the bus. Most were forced to grin and bear the disadvantages and continue to wait on the yellow banana.

-Tracie Thomas

Off we go

Getting off the bus from Sunset, freshman Penny Pierce walks toward the school prepared for another day of work. Photo by D. Green

KEEPING A GOOD LOOKOUT

No one is watching. Should you or shouldn't you? Go ahead, everyone does it! After all, you are only trying to make a better grade!

Cheating became something students believed they had to do in order to pass. Freshman Melissa Herzog said her reason for cheating was that she hadn't studied. A common belief among students was that, when there's no time to study, the only alternative was to cheat.

Cheating came in many forms. The more common ways included looking on someone else's paper, using cheat sheets and writing on accessible areas. More extreme ways included: looking up answers in a book, sticking answers in a see through pen and stealing tests. Junior Collin Busseu said, "I cheat any way possible, looking on papers, stealing tests, begging for answers and writing on

desks. You name it, I do it!"

Junior Steven Monte said, "I use a cover sheet that my notes have been pressed on to." Freshman Blake Autry had his own technique, "I write my notes very small and put them in my pen. The answers are magnified by the clear cylinder."

Junior Stefan Gardner believed that getting good grades was important to him and that cheating was often a last alternative. "I feel guilty afterwards, but at least I'm going to get a good grade," said Gardner.

Reasons for cheating varied. "I cheat when I don't study and need a good grade. I also enjoy watching the teacher sweat," said Bussell.

The fear of getting caught also became a problem. Punishment from the teacher would come first and then fac-

ing parents would be next. Herzog said that she didn't want to find out what her parents would do to her. Autry's parents would yell and

Bussell said, "They (parents) would laugh at first, ground me for life and physically damage my body."

-Joanna Torres

YOU tell us

How do you feel about having to pass the Teams test in order to graduate?

Gerardo Gomez, 11

"This test is really dumb because You should not have to pass a test to get your diploma. If you pass all your classes that should be enough."

Kim Harris, 10

"I think if you pass to your next grade then that should be all that is needed for graduation."

Tuan Tran, 11

"I think It's okay because it's not hard and most students who study will not have any trouble."

Shirlett DePillars, 11

"I did not feel that it was necessary considering how easy the test was, and how fast I finished."

THE REST OF TIMES

The walls of the cafeteria encased them. Others were in the library or in study halls. The 800 juniors, each armed with No. 2 pencils, were ready to put their diplomas on the line—the first class to have to do so—as they took the six hour TEAMS test.

For two days, Oct. 1 and 2, juniors statewide took the test that decided whether or not they would receive a diploma. With mathematics and English sections, the test produced various reactions.

"I found the geometry section of the TEAMS test to be a little difficult but I think I still managed to do well," said junior Thomas Yancy.

Regardless, almost

everyone questioned took the Biblical approach—"Do it unto others."

"It's unfortunate that after going to school for 12 years, you could get cheated out of your diploma. I wish they could begin this with the class of 1988 instead of the class of 1987. I think that it is only fair, since the senior class of 1986 is exempt. We deserve it as much as they do," said junior Herman Palacios.

Each student had four chances to pass the exam. If they didn't pass by the fourth try, students had three opportunities after their class graduated. If students never passed the test, they would receive a certificate of attendance rather than a diploma.

While not everyone liked having to take the test, they could see how it would make their diploma more meaningful.

"I like having to take this test in order to get my diploma. Your diploma will mean more than just going to school for 12 years and colleges will look highly on this," said freshman Sonya Cruz.

Principal Gene Golden agreed. "A lot of students think it's harder than they give it credit for being. But those who study will find out that it is worth it—if not now, later in life," said Golden. And still others believed the test was overdue. "it's reasonable to expect students to be literate when they finish high school," commented

counselor Small.

Gatty-ing Together

Want a plain and simple way to have fun? Eat pizza with friends. A favorite of some of the students was to meet and eat Italian food at Mr. Gatti's Pizza Place. Maria Giangiullo and Bruce Hilbur enjoy themselves while there.

IT'S HOT

Teenage Hangouts
Friday and weekend; two things that students anticipated. Still, a common question was: "Where was there to go?" Teens had places they could be with friends having fun or simply "hanging out."

Students looked forward to escaping hard work and meeting new people. "Redbird Cinema is a good place to hang out. I always see a lot of my friends and I get to meet new guys," said junior Kayla Moore.

Students who were involved with school related activities were obligated to be at games on Friday nights. They too wanted something to do afterwards. "Usually I try to go to school

activity, otherwise I go to a party," Junior Trey Pugh said.

Dallas may not have had the very posh hot-spots for teens as compared to the ones in California or New York, but the teenagers believed that there were some ideal places to go on Friday and Saturday nights. Junior Tracey Lochhead said "Snuffers on Greenville is a nice place to go. They've got the best hamburgers in Dallas and they have great margaritas."

Spending money didn't have to be a part of it. Freshman Karen Saddler commented, "I usually hang out over other people's houses because anything is better than staying at home."

Talking It Over

Students look forward to after-game activities. They found that having a place to meet and talk was a lot of fun, and a good way to find out the latest gossip. Rhonda Southard, Randy Senik and Robert Vavrick sit and talk in the McDonald's parking lot after the homecoming game. Photo by Joe Lopez

Sports Night

Seniors Dawn Patterson and Victor Allen watch attentively at the Homecoming Game. Football games were a common place for students to meet and be together on Friday and Saturday nights.

Paisley is it

Paisley proved to be one of the popular designs of the year. Senior Davette Martin and junior Rushunda Adams wear their paisleys from top to bottom. Clothing with the paisley design ranged from shirts to pants. Photo by R. Jernigan

Trend setters

Senior Donald Beavers and junior Tracy Packer enjoy freetime during B lunch to talk. Beavers and Packer show their new trend-setting fashions. Photo by R. Jernigan

Talking it over

Junior Andrea Adams and Missy Belt discuss new hair styles during class. Hair styles played an important role in the student's overall fashion outlook. Photo by L. Strother

THE FASHION SCENE

While opening the doors on a new school year, students also opened the doors to a new trend that consisted of wearing items from grandmother's jewelry box.

"Costume jewelry was important in making clothes come alive," said senior Cre Shunda Moore, who accented her paisley printed blouse with a broach and matching earrings.

A new sense of pattern and print, both

matched and unmatched, related or not, brought together an uncommon mix of paisley, plaids, checks and prints.

"Punk-rock was placed in the back of our closet and we pulled out the new stirrup pants with large shirts and sweaters to form a great outfit," said junior Temica Finch.

"Large shirts and stirrup pants can add up to be expensive and

have to be treated as an investment," said junior Lisa Smith. "I purchase clothes which offer wardrobe flexibility, yet are trendy."

"Paisley print and costume jewelry plan to leave their mark on the 1985-86 school year," said junior John Metters. "The way you dress expresses your attitude, I try and keep up, though it sometimes gets wild."

-Tracie Thomas

Knauf learns art of karate in spare time

Unlike most, Jon Knauf, at age 8, was spending his spare time learning the art of karate.

At age 15 Jon was an assistant instructor at the Southeast YMCA, holding a black belt, the highest ranked belt possible to achieve. Jon competed in many competitions in various cities and states, and collected numerous trophies to add to his collection.

Jon is also a member of the Skyline Raider Band. His interest in karate sometimes conflicts with band performances.

"I knew that band performances and karate competitions would clash, so I talked with my band director and got things straightened out at the beginning of the year. That way my grade was not affected when I missed a game," said Knauf.

-Tracie Thomas

Kicking it up

WRAPPED WITH GRIEF

It was 10:15 a.m. Students crowded the halls as the bell for 3rd period rang. One young boy slowed down as he thought of his next class—study hall.

Most students don't look forward to study hall. "I don't like going to study hall, there's never anything to do," said junior Kecia Davis.

On the plus side, study halls were equipped with all the equipment one needs to study and accommodated students with such things as coke and candy

machines. Because of this, students usually ended up using study hall as a place of pleasure instead of a place to study. Junior Yolanda Jones said, "I like to go in study hall so I can get a cold drink. Besides, there's never much work to be done."

Year after year, counselors scheduled students into study halls. "I really didn't want a study hall, but there was no other class to take," said freshman Jolene Atherton.

The study hall

teachers hated that students were forced into the class as they belatedly ended for quiet. "If they really don't need one (study hall), then they shouldn't be put in one, it would save us (teachers) a lot of trouble," explained James Lee.

Still some students wanted and needed a study hall. Junior Lyle George said, "I like study halls, it takes a lot of pressure off me when I get home.

Good, bad or boring, few students es-

caped high school without enduring at least one study hall. Few things could save them from it's daily drudgery. A pass to go to the library or mandatory tutoring were two of them. And things looked worse for years to come, the school board was considering making a study hall mandatory for everyone.

-Cathy Huntsberry

UP CLOSE AND PERSONAL

A boom in the record business has resulted from a continued interest in returning performers as well as an incredible response to up-and-coming bands. With every new album out, one thing was almost certain: a concert was soon to follow. Different bands travelled to Dallas for a show, and students flocked to see their favorites.

On the average,

regular concert-goers saw one or two shows a month, shelling out about \$12.50 per ticket. Most of these people soon realized that after paying that much money, they weren't content with the lower balcony. They wanted to get closer to the action any way they could.

"At one concert, we had a bunch of firecrackers.

So we thought we'd create a distraction, then run down to the stage," said senior Johnier Logan. Her attempt to reach the stage failed, as did that of freshman Jennifer Polard who "racked" three security guards at the Power Station concerts.

Other methods haven't been tried yet. Senior Fernando Ponce would be willing to jump a barricade line to

get to the stage, and sophomore Desmond Luster would "knock people over."

Dan Lewis, of D&L Entertainment Services (which provides Reunion Arena security), thought otherwise. "Yeah, we've had people assaulted by fans and cut by bottles thrown out. But the number of people aren't as rowdy as you might

assume. Heavy metal shows usually draw the more active, more enthusiastic crowd, simply because of the music's volume and the number of people."

Although few Skyline students have gone backstage, most have tried. "Yeah," said Lewis, "Everyone's related to someone in the band."

SEE ME NOW

She walked down the long empty corridor after the last bell of the day had rung. She waited alone as different clusters of students yelled loudly to each other. "I want to be a part," she mumbled to herself. as she edged out the door, she saw a poster—"French club members needed, join now." "That's it," she cried out. "I'll join a club."

Getting involved was one way new students faced the problem of getting noticed. Underclassmen for band, drill, cheerleader, flag corps or became a publications member. But, for some this was not enough. Underclassmen went out to be noticed for their own individual style. These

students did things like bleach their hair or cut it off, went bald, or wore the oddest group of clothes they could find.

"It gives me self-satisfaction to be noticed. I'm usually different, but to be really different I went way out and bleached my hair," said junior Stephanie Boatley.

"I feel that being noticed is very important to one's personality, ego and reputation," said sophomore Princess Edmond, "I wouldn't do anything vulgar to be noticed, but since it's my biggest hobby, I just be myself."

However, underclassmen realized that to be different is one thing, but to go out to be noticed it another.

-Cathy Huntsberry

Going all out

TALKING OUT PROBLEMS

Despite what many newspapers reported on teenagers, they are concerned with more than dating, watching Miami Vice and sleeping.

They are concerned with world matters that may affect their lives, that of their parents or future children and grandchildren. A poll taken of 50 students proved that theory. 90 percent were concerned with world matters more than teenage problems.

"World peace and friendship in this society concern me most," said freshman Martin Gutierrez.

Principals and teachers were concerned about the world as well even though students may never hear them voice opinions.

Chemistry teacher Tom Jordan says his greatest world concern is the Middle East and the US's relationship with Russia.

"The Libyan situation is my greatest world concern. And I think we all should realize that this is an important matter. A strong retaliation on Libya could start WW III," said tenth grade principal Herman Salinas.

Besides the very common world concerns such as world peace, different concerns surface.

"China is what concerns me most for

the reason that there are still POWs held captive in that country and I wish they could return home," said junior Angie Nunn.

A number of teenagers also expressed concern with moral issues. For junior Tamika Singleton, the situation in South Africa most concerns her. "I wish that those individuals had the same freedom that I do."

-Keith Johnson

Keeping in touch

Junior Angela Lewis reads a Newsweek magazine in the library during her third period study hall. Newsweek was her favorite source of information on world affairs.

Peace talk

Senior Laura Malone talks with Junior Benjamin Bonnel before the third period bell rang for Journalism. She is speaking with him about the statement he's making with his world slogan button.

YOU tell us

What world concerns most affect or bother you? Why?

Joe Rivas, 9

"World peace is what mainly concerns me. I just wish everyone in the world could be friends."

Casey Jones, 9

"Arms control—we need to reach an agreement on arms limitations so that I can sleep peacefully knowing my children will some day have a chance at life."

Gina Medina, 11

"World hunger seems to be my greatest concern these days. I enjoy a good meal every day and I want my peers all over the globe to have that some opportunity."

Kari McDonald, 11

"Nuclear war. There has to be a better answer than that. It would wipe out civilization."

BEING A PART OF IT

Seeing clearly that H.B. 72 was going to make this a year of many academic changes, many students still confronted the challenge of an on-going extra curricular activity audition. Each year, a multitude of students find themselves auditioning for different positions within the school, including choir, drill, publications, tour guides, cheerleader, senate, and work programs.

Although this was a tedious task, students found it brought about spirit and helped to ease the stress of homework. "It's fun trying out, but, half the fun is when you make the team," said

junior Camille Russell.

In order to try out for the activities, students had to go through a series of auditions. Auditions could be anything from singing to dancing to jumping up and down. The nature of the audition depended on what activity a student chose to participate in.

Some activities, such as cheerleader, have preliminary try-outs in order to narrow down the massive number of people auditioning. Then, maybe a week later, students would go back and compete for position on the final squad for next year's performances. This method had many ad-

vantages. Senior Camilia Williams said, "This year we are having preliminaries, and I think it will really help in picking the best people possible for the job."

Other activities, such as tour guides, required one to fill out an application. Then, according to one's status within the school, the sponsor picked the cream of the crop for next year. The majority of the organizations picked people by this method.

All in all, students who were able to survive auditions did so. This was just another way in which students found things to fit their type.

Cathy Huntsberry

Overhead

Members of the flag corps raise their flags while keeping in time with the band at the Denton game. People trying out for corps had to memorize a routine and perform it in front of the judges.

Ready? Okay.

JV cheerleader Chari Gregg shows off her winning Raider pride during the BA pep assembly while performing a cheer. Performing was a very important aspect to trying out.

All lined up

In trying out, football players had to undergo many rough practice sessions to prove their ability. Here, they perfect their plays in hopes of defeating the opposing teams.

TOPPING IT OFF

For the most part, Skyline is a well-organized school. Things run pretty smoothly with few complications. Then why is the salad bar such a chaotic, confusing mess?

Salad was originally sold for 15 cents an ounce, which was a pretty good idea. But someone, somewhere decided there needed to be more.

So now, when a person gets into the salad line, he first gets three ounces of protein foods for 95 cents. This includes cheese, sliced

luncheon meat, strips of ham, cottage cheese and tuna salad. These are supposed to be put into clear, little plastic pans and weighed to eliminate any cheating. But, hold on a minute. If there also happens to be tacos or baked potatoes on the line, the plot thickens. With either tacos or potatoes, one scoop of chili and either one cup of taco sauce or sour cream is allowed. But now, the cheese supply is unlimited. If tacos or potatoes are chosen as the protein foods, then it costs an additional 15 cents per ounce if you want tuna salad or cottage cheese. Regardless of the confusion, the addition of tacos and potatoes was popular. "I'm glad they had the potatoes."

said junior Ben Bonnell. "It adds an extra choice."

After the protein foods, the rest of the vegetables on the salad bar are free, regardless of how much it weighs.

Since the protein foods are the most expensive salad bar items, some people have devised clever ways to disguise their protein under the rest of their salad. One person in line actually buried an entire taco with lettuce and croutons. One can hide cheese and lunch meat under salad, too. In this case, the plastic pans are used to get more than what was actually paid for.

Pauline Blazek, the

salad bar cashier claims that she knows this goes on. "If I actually saw anybody (steal anything), I would stop them."

Stuffed!

Waiting in line, sophomores Mary Sweatt and Sharyl Burnett prepare to pay for their stuffed baked potatoes and salad. The salad bar gave students a chance to eat items other than the regular hamburger and French fries. Photo by W. Woodruff

Weighing in

Cheese, ham, cottage cheese and tuna salad were various items weighed on the scale. Salad bar cashiers used scales to figure up the price for salad bar items. Photo by W. Woodruff

ALL FOR CASH

"I need money," was a phrase that prompted many students to step out on the ledge of life and plunge into the pool of the world of work.

Students walked into places of business, nervously shaking, seeking employment. However, feelings other than nervousness often intervened.

"I feel nervous and forgetful," said sophomore Amelia Bryant. Junior Krista White agreed, adding that she felt insecure while sophomore Piete Sepulveda thought tension was her biggest

worry.

Students found that nervousness, above all, was the hardest to conquer while searching for a job. The fear of not knowing what to expect added a load of nervousness. They found that confidence and high self esteem helped to get over the obstacle of nervousness during interviews.

Students found that having a nice wardrobe, a car and other extras, depended upon funds. Some liked the responsibilities involved.

"Working lets me know what to expect

when I get out on my own," said freshman Shondria Covington.

Others enjoyed the independence of being able to purchase things without having to ask for money or explaining what or why it was needed. Jobs kept students out of their parents' pockets.

Job hunting was not one of the most exciting things to do. But, "once the job was nailed, it was a cinch," said sophomore Chris

GET A JOB

(cont. from pg. 335)

Redd.

Students sometimes found it very complicated to go to an interview. They had to build up their confidence only to be told "we'll get back with you." They anxiously waited by the phone, wondering if they did or said the right things.

The lucky ones got the calls that said, "you've got the job. . . When can you start?" The unlucky ones just waited. . . wondering

what they did or should not have done.

There are certain do's and don'ts for conquering the world of work and interviews. The most important do to remember is to have confidence. The most important don't is to not be rude. Above all, going in with an "I want the job" attitude often helped. By following the do's and avoiding the don'ts one was able to conquer the world of work with confidence.

-Cheryl Blair

10 rules for applying for a job

1. Dress nicely.
2. Be courteous.
3. Be clean.
4. Have a positive attitude.
5. Keep eye contact.
6. Show interest.
7. Have confidence.
8. Be honest.
9. Understand the job.
10. Be prompt.

“Working lets me know what to expect when I get out on my own.”

MAKING A CLEAN SWEEP OF IT

"Bobby Joe, have you taken out the trash yet?"

"Just a minute, mom."

Ten minutes pass. "Bobby Joe, have you taken out the trash?"

"In a sec, mom."

Five minutes later. "BOBBY JOE, THE TRASH!"

You've probably used this line before when your parents told you to do something. As most students attest, responsibility doesn't end at 4 p.m.

Usual chores included taking out the trash, washing dishes, mowing the lawn and

cleaning their rooms. In contrast to the habitual procrastinator, many students claim that they do their chores immediately upon getting home from school. "My parents always tell me to do my chores so I do them as soon as I get home from school so they will have nothing to say to me," said freshman Kevin Mackey.

Getting out of chores required a little more work. Given the right encouragement, little brothers or sisters could be called on in a pinch. "When I want to go someplace but I have

chores, I usually call on my little brother to do it," said senior Linda Villarreal. "For a few bucks, he'll do anything."

Some parents ask their kids to do some pretty off-the-wall things. "Once my mom made me watch the mechanic fix our car. She said maybe the next time this happens, you'll be able to fix it," freshman Raul Trevino said.

Students said that most jobs their parents gave them were either stupid or boring. "I think parents give us these jobs just to get us

out of their hair; but when my mom gives me a boring job, I just listen to the radio to make it more interesting," said freshman Meg Holy.

Chores—a means for parents to get back at kids or a way to help out around the house? Students saw it both ways. "I think chores are needed because I live here also and sometimes make the mess," said sophomore Russell Jones.

Some students took another approach to chores—money. Charging their parents for their services was

another one of those controversial things. "I think it's unfair to charge my mom for these services because she's always giving me money for things I want anyway," explained freshman Phillip Polk.

Whether money-makers or free, freely done or only under duress, chores were a constant in most students' lives. And because of them, you may hear this:

"Bobby Joe, this is your last WARNING, take out that darn trash."

-Alex Villarreal

All washed up

After dinner, freshman Raul Ruiz washes dishes as one of his daily chores. He does this chore every other day in order to help out his mom. Other of his chores were vacuuming, cleaning his room and taking out the trash. Photo by L. Villarreal

PUT TO THE TEST

Students were once again put to the test. The DISD administered another test Jan. 8-10 to make sure the right material was being taught and learned in the classroom. In 1987, the test will count 10 percent of a student's semester grade.

The "pilot test" was given in language arts, math, science, social studies and health classes. The test was only given in those courses because they have "essential elements" which must be taught each semester.

"The test is sort of spot-checking," said counselor and test coordinator Sylvia Valle, "to see if teachers follow and students learn the essential ele-

ments."

Bob Grobe, executive evaluator in test development for the district, called the survey test "a measure of accountability. It is to ensure that all students are taught the same materials," he said.

Grobe also said the test came about because of two problems: different grading standards among schools and among teachers. "We hope the test will provide some kind of solution."

"Eventually it would become part of the final exam or a standardized final," said Grobe.

With the TEAMS test in October, the survey test in January and May and the TAPS tests

in April, students were spending more time than ever on standardized tests.

"I think the test will give students a chance to improve their grades," said English department chairperson Barbara Larabee who worked on the test last year.

"But with pressure from the national, state and district level for higher educational standards," said Grobe, "testings have become 'the name of the game now.'"

-Tracie Thomas

Putting it in order

ROTC instructor Julian Simon places the testing material for the Learner Standards test in alphabetical order by teachers' names. The test was administered during the week of Jan. 8-10. Science, history, English and social studies were the areas that students were tested in. Photo by A. Williams

PICKING UP WHERE OTHERS LEFT OFF

Sacrifice. Why would a person devote time and energy to a project and get nothing in return. The people who participated in volunteer work, though, believed that they did get something out of it. The satisfaction of helping others less fortunate was reward enough.

"I think that it is nice to do things for other people. It's nice to feel that you have brightened up someone's day," said senior Anita McGruder. McGruder belongs to the service organization

Top Teens of America. This is a group of 13 to 17 year old women that do different kinds of volunteer work. Among the group's activities was taking food to a needy family, visiting nursing homes, going door-to-door collecting for the United Negro College Fund and also answering phones for the Lou Rawls telethon.

Senior Gail Warrior also belonged to Top Teens of America and was a member of the Youth Guidance Group. With this organization, she took gifts to retarded and disabled

children. "It's fun helping other people," she said. "It's rewarding to see smiles on their faces."

While volunteer work has few material rewards, junior Rodney Goss had one that gave physical as well as mental rewards. Goss belonged to the Big Brothers organization. "I got involved in Big Brothers because my mom wanted me too, but now I'm glad I stayed. The little kid kinda grows on you. I also get things from his parents." Goss got a stereo from the family

for Christmas. He also got a job offer and was invited to go on a skiing trip this summer. "I really feel like a part of the family," he said.

Junior Angie Bohne made quilts and cookies to take to Manor Nursing Home every Saturday. She also played volleyball to raise money for Jerry's Kids.

Junior Dawn Hubbard was a member of Phi Delta Kappa, Inc. where she collected clothes for kids and answered phones at the Lou Rawls Telethon. She was also a Y-Teen

member, a club within the YWCA. Last Christmas, the group went to Scottish Rite Hospital where they dressed up like clowns and entertained the children.

While most people did volunteer work to help themselves and others, Crisdye Dawson worked to help the community. She helps clean up South Dallas every year. "I do this to help better the community. I like to show my spirit and show that I care about my community."

-Kristina Murphy

Back breaker

Communities are only as attractive as the neighbors make them. Crisdye Dawson lends her aid to a neighborhood project to clean up South Dallas. A group in the community does this every year.

Strummin' along

Playing guitar with leader Joe Lopez at Monday night Young Life meetings was junior Timmy Sim's way of getting more involved with the club. Leaders encouraged kids with talent like Sim's to get involved as much as possible. Helping out at club meetings was not the only way students built closer relationships with leaders, but there were always opportunities for student to do things with leaders such as going shopping, to a movie, sport events, or just talking on the phone. Photo by D. Locke

Air bandits

During the annual ski trip, area schools competed for spirit points in various contests. Sophomore John Bowdich, freshmen Clay Chapman, David Bonds, seniors Denise Golden and Laura Gentry represent Skyline Young Lifers in

the air band contest, performing to *Jailhouse Rock*. Skyline students showed their craziness by kidnapping Bryan Adams' leader and holding him ransom for 500 spirit points. Also, students wore long thermal underwear and jams to group meals to show they were unique and had school spirit. Photo by E. Fox

THE SOUND OF MUSIC

"Walking backwards down the cliff and looking down to the ground below made me feel like I was on top of the world," said junior Kacy Caviness about her rappelling adventure at Young Life summer camp.

Young Life offered a summer camp and a winter ski trip every year, as well as regular Monday night meetings, Bible studies, Saturday football games and other activities.

On all 4's

Skiing has its ups and downs as sophomore Lara Cowen found out after falling and being sprayed with snow by freshman Jason Knight. Knight, freshmen David Bonds, Clay Chapman and leader Brad Kraft watch her attempt to regain her stance. Young Life members had the opportunity to ski four days at Silver Creek and Winter Park, Colorado over winter vacation. Photo by D. Dawson

Summer camp and ski camp were both in Colorado. Along with the chance of getting away for a week, these camps offered students challenging activities, new friends, and opportunities to learn more about God. Caviness said, "It (summer camp) helped me to strengthen my relationship with the Lord."

"Ski trip added something new to my winter vacation and gave me the chance to be with different people and hear their views about their relationship with Christ," said junior Cathleen Bert.

Students enjoyed the relaxed and open atmosphere of the

Monday night meetings. "It's not like church where you have to sit still and be quiet. It's a way to have fun while learning about God," said freshman Shelly Diffie. Regular meetings usually consisted of songs, comical skits and a closing inspirational talk. The talks used biblical incidents and related them to everyday life. This technique made the talk easy for the students to relate to. Junior Tracey Day said, "I hope that everyone could get something out of it and use it in life."

Students who were active in Young Life were eager to get new students to attend.

"What I like the most is seeing non-Christians going and getting involved," said Bert. Students found out about the club in various ways. Diffie said, "My brother Darrin encouraged me to attend."

"Since Young Life has been catching on over the past couple of years at Skyline, we want more kids involved, so that it's the kids leading the club and not so much the leaders," said Young Life leader Steve Elkins.

Since Young Life was held on a school night, students had to budget their time in order to fit the meetings into their afterschool schedule. Day said, "I

make Young Life a priority which inspires me to get everything done so that I can go." Although it was an afterschool activity, approximately 75 kids attended each week. "It (Young Life) gives me something to look forward to after a 'Monday' at school," said Bert. Junior Amy Holy said, "Young Life gives me something to think about and gets me motivated for my week."

Holy comments, "Young Life gives me time to be with my friends while learning about life and God," reflected many students feelings on the purpose of the club.

Dunkin'

Center Larry Johnson practices a dunk shot in the girls gym before a game. By practicing daily, Johnson was able to achieve a shooting average of 23.5 points per game. The Dallas Morning news named Johnson as player of the week in January. Photo by B. Davis

Jump shot

In district play against Spruce, center Larry Johnson shoots to score 2 of his 29 points against the Apaches. Entering the season with a 17-2 record, the Raiders won their first district competition against Spruce 75 to 69 with Johnson at the helm. Photo by E. Aviles

Larry Johnson

ON TOP OF IT ALL

Ever since Larry Johnson showed up on the basketball scene as a freshman, he's been in the media limelight. Making the varsity as a freshman was his first accomplishment but he's made many since then.

While others referred to Johnson as a star, he didn't see himself that way. "I'm not the star of the team. There are eight more people on the team doing the same things that I do," said Johnson.

Johnson saw the sport a little differently than some. "I feel that basketball shouldn't be played as a job. When basketball is played as a job, it puts too much st-

rain on you. It should be played for the fun."

Whether Johnson saw it as fun or not, others have recognized his obvious talent. He's received over 100 letters from colleges expressing interest in him. While he was too young to be contacted in person by the scouts, that didn't keep him from thinking about his future.

"I'd like to go to a college where the games are televised," said Johnson. He also wanted to go someplace where he would be able to play as a freshman. Georgetown was his first choice.

Johnson looked up to a number of people.

He credited his seventh grade coach, Edward Wesley, with helping him and seniors on the team for much encouragement.

Still, the pros was where Johnson looked for his idols. Michael Jordan and Patrick Ewing were the first names to come to his mind. "I would like to be like Michael Jordan because he's the best," said Johnson.

After college and a career in the pros, Johnson doesn't plan to rest on his laurels. He plans to become a business man and his own recreation center or a small gymnasium.

-Angela Vicks

YOU tell us

How do you feel about freshman having to have more credits to graduate than upperclassmen?

Anthony Turner, 9

"It's unfair because the upperclassmen are getting the easier end of the deal."

Karin Murphy, 9

"I don't think it matters because when we get to be seniors we usually have more than enough credits anyway."

Dan Garza, 9

"It's not fair. It should be equal. It's not fair making it harder on us."

Julie Furlow, 9

"It's not fair. It should be equal because we all have to take the same amount of courses anyway."

Bored to death

Twiddling thumbs can be a source of entertainment when you are sitting in in-house with nothing to do, believes freshman Shannon Ostrander. There was always a way to avoid studying.

Reading it over

Reading ahead was a great way to get ahead in classes missed for serving time in in-house. Senior Ronnie Hedge reads in hopes of passing time and passing his class. Photo by L. Strother

NO ONE TO TALK TO BUT YOURSELF

Ahhh. Peace and quiet. The only problem is that's ALL you get when confined to C-19—also known as in-house.

Sometimes students thought the reasons they were placed in in-house were stupid. But there was nothing they could do but serve their time and learn after being in in-house for a few days that stopping to chat with a friend was not worth going to in-house.

"You sometimes have to learn things the

hard way. Once I was placed in in-house for being tardy, I was never tardy again," said junior Marvinia Henry.

Students did everything from homework to reading magazines to keep themselves occupied. Talking and sleeping were not permitted. But it sometimes got so boring the students tried to take a nap or whisper a word or two to the person next to them. Getting caught would cost another day.

Most students who were placed in in-house

did not like it, but there were always a few whose opinions differed from the majority.

"In-house proved a break in the normal school week. It gives you the opportunity to miss some of the classes you really hate. I don't feel that in-house is all that bad," said one student.

Students thought that lunch would give them a chance to mingle with their friends to catch up on the day's happenings. Then it was brought to their at-

tention that the students in in-house would eat at 10:45 a.m. They would have the lunchroom all to themselves. Lunch turned out to be another part of the boredom that came along with being in in-house.

Even with the boredom, not everyone thought in-house did what it was meant to do.

"I think in-house suspension is a bad idea. People would think twice about skipping or being tardy if they knew they would

be suspended with unexcused days. As it stands now all they have to do is go to in-house for a couple of days and catch up on behind homework," said senior Gail Sherman.

Class disruption, tardies and class cutting were reasons students faced the choice of a paddling or in-house. Most students picked in-house with open arms—at least the first time.

All Smiles

Junior Jackie Branun and junior Laura Newman acquaint themselves after Newman had moved away and returned. Discussing the fashion scene was just one of the many things that came up in their conversation. Photo by D. Green

Spaced Out

Senior Heath Campbell is left in wonderment at a question posed to him by junior Gena Caldwell during C lunch. The two relax and wait for the bell to ring. Photo by D. Green

NOT JUST FOR LAUGHS

"For good times, for bad times. That's what friends are for," according to Dionne Warwick in her song *Friendship*.

Campus friends played a very special part in the development of a student. Most students depended on a friend for support and understanding that sometimes a teacher or parent could not give.

Having a ball

Goofing off and telling jokes were just some of the things that could be done in the student center. Senior Richard Gardner tells a joke to his friend Windell Williams. The two have been friends since their freshman year. Photo by D. Green

"Friendship to me is having a person who you can truly trust no matter what the conditions are and have mutual feelings for," said junior Thomas Yancy.

Although many friends argued over petty matters, they still managed to become friends again. According to a 25 student poll, 75 percent agreed that having a friend to argue with relieves anxiety students have from time to time.

For sophomore Jose Ruiz, friendship was

having the comfort of knowing that if one friendship did not work out the way he wanted, there were still other people out in the world that he could turn to.

Although many friendships existed between teenagers and adults. There was still a high number of students that said that their best friends was a peer. Why is this? Most agreed that they feel a peer would understand them better. And they could trust a peer more than an adult.

A growing number of students looked for a friend for advice on serious and not-so-serious matters. Many students needed a friend to be there for them. When important matters came up.

"It's wonderful having a friend that I can talk with after a date. I can let her know everything that happened and feel secure in knowing that what I say to her will not surface again," said freshman Traci Adams.

YOU tell us

What do you think of the new mandatory tutoring for those who fail?

Amy Beckham, 9

"I think it is good and will help those that really need to study."

Chris Chakmakjian, 11

"For those people who are failing, they should definitely be happy to attend."

Tonia McClelland, 9

"I think that tutoring is good. They had to enroll me in tutoring and it really does help."

Jonathan Parker, 10

"I feel that it is a good idea. If it will make you learn something, then you should go for it."

compiled by Cathy Huntsberry

THE ART OF CLASS CUTTING

"Should I or shouldn't I?" A question that went through the minds of some students during the course of the school year was whether or not to skip a certain class.

Students sometimes became bored with routine schedules and decided to skip an unfavored class. Getting out of the class was a sticky situation, as was trying to get back

in.

To get out of class, junior Sonya Jones said "I tell the teacher that I have to see the principal." To get back into class, Junior Sonya Lee said "I tell the teacher that I have a very urgent feminine problem."

Some teachers felt that if a student wanted to skip their class, then it was their prerogative. "The ones who skip, miss out on the learn-

ing, and then they want to know why they didn't make that A that they wanted," said Algebra teacher Jim Crenshaw.

The attendance office was kept busy due to students who chose to skip class. "We catch students lying about why they skipped class, all the time," said Attendance clerk Billie Roe. When the office finds out that a student

is absent from a class, their name is put on the cut sheet and then their parents are notified; after that, the principal takes care of the rest.

Assistant principal Jerry Holley says that the procedure for all of the principals is the same. "The first time a student skips, they are sent to in-house, after that more days are added or they get the paddle," Holley said

"The ones who skip are losing valuable educational time that they'll never retrieve."

While skipping class was not on the school guidelines, some individuals took part in it. What did one do if caught? Sophomore Michelle Monte replies, "Cry and say your pass is lost." Sophomore Rori Gomez said, "RUN!"

SHOCK HEARD ROUND THE WORLD

The news trickled out slowly. TV Arts students were the first to hear, followed by Man and His Environment. The Space Shuttle, the mission that was to carry the first teacher into space, had exploded approximately two minutes after take-off.

TV Arts students watched as it happened, making a video tape of one of the many replays of the newscast. Students expressed shock and dismay over the explosion. "I couldn't believe it really hap-

pened, I had to watch the video four or five times to believe it," said senior Joe Beebe.

TV Arts teacher, Ben Waldrip, patched the video through on cable to TV's throughout the school. "I thought they should see it. It was national news," said Waldrip.

The reaction to the patching through the video was generally favorable. "Most of the teachers were glad we did it," said senior Charles Webb.

Other students saw the report in English classes when *Life on the Mississippi* was interrupted. "I was shocked when I heard it in English. I'm saddened that

it may set the Space program back. I also wonder what other nations with successful space programs will think about us," said junior Mary Fitzpatrick.

Not all students were touched by the disaster, however. "It was a bad thing to have happened, but it wasn't worth getting worked up over," said senior Mike Gumpert.

Most everyone, students and teachers alike were touched by the shuttle explosion. "It hurt me a great deal," said Carolyn Creel, sociology teacher.

"I guess you'd say the odds caught up with them," said Waldrip.

The Golden rule: Nod goes to students

"I can't be him, and I'm not trying to be," said new principal Gene Golden of his good friend and predecessor, Frank Guzick.

Despite these words, similarities between the old and new administrations are already apparent. Golden starts his day early, around 6 a.m., and spends the next 8 to 10 hours meeting with parents, students and faculty, much like Guzick did. Golden, however, has already established a reputation for spending more time with the students than the faculty. Nevertheless, most school operations have remained consistent.

For the last nine years, Golden has been the high school administrator for this region. Prior to that, he served as assistant principal and principal at W.T. White. Although some might consider his change in position to be a step down, Golden is quick to say he chose to come to Skyline because he saw it as "one of the most important posts in the dis-

In regard to DISD rules, Golden is known for strict adherence to district policy. With House Bills 72 and 246, the new principal's plan is to "implement them quickly" and to "put learning first," regardless of his support for extracurricular activities. On the other hand, he hopes that "some of our trauma is over" in adapting to the new rules.

trict." Already, he has been impressed by the amount of pride shown by the student body and pleased to find that comments on the neatness of Skyline have been true.

Golden has also made good contact with the staff. His first day here included a meeting with the Faculty Advisory Committee which was described as a "brilliant move" by Margaret Hamlin, a committee member. The meeting must have gone well, for Golden commented that the staff worked hard and was dedicated and that he has confidence in their ability to handle the responsibilities he delegates.

In the future, there probably will be changes made by our new principal, specifically in staff assignments and support personnel. For now, however, Golden is content "dealing with the constant stream of people" and allowing the school to operate as usual. This, more than anything else, has made his transition a smooth one for all.

-Kevin Tucker

On stage

The new principal greets new students at the freshman orientation. He caught their enthusiasm by welcoming them to "one of the finest schools in the world." Previously, Golden had been the principal of W.T. White and the administrator for all high schools in this area. He considers his post at Skyline as "one of the most important in the district."

The only remaining teacher from Skyline's original English department, Sandra Lucaa got her Bachelor of Science Degree and Masters of Education at Texas Women's University. She taught elementary self-contained classes, math, special ed, remedial English and Texas history at Comstock Middle School. At Skyline, she taught honors 10th and 11th grade English for three years. In 1972, she became the speech and debate instructor and sponsored Skyline's chapter of the National Forensic League.

Among her other activities, she sponsored the Service Club, an organization which preceded the Tour Guides. She was the pep squad and cheerleader sponsor. Lucaa also wrote the "Fight Song".

PROFILE

speech and
debate

The first year Skyline opened, classes were held at the Buckner Orphanage.

"I liked Buckner. I could conduct my classes outside under the trees. The only trouble was, there was a duck pond there. My students started chasing the ducks. I was chasing after my students, and I got called in for chasing the ducks!"

"When we first moved into this building, there were only four teachers on the third floor. All the junior high tours would come by and (the guides) would open our door and say, 'This is a classroom!' It was like living in a fishbowl."

"...Every year is different and every year is exciting. I keep seeing changes for the better, and there are always more to come. I think the no-pass, no-play rule is one of the biggest right now. It could ruin some programs."

Searching

Library clerk Marilyn Little looks for a back issue of a maga-
 zine. The library was also affected by the tighter budget. One
 resigned and was not replaced, leaving more organizational
 for the librarians.

Type it up

Office 104 clerk Kitty Maxwell types the student directory. Her other duties included greeting all visitors to the building, answering phones, sending students to the right principals and acting as secretary for assistant principal Jerry Holley.

Please hold: Clerks weighted down

Clerks are busy people. Typing papers, answering phones, keeping files — they must perform all of the odd tasks which keep a school the size of Skyline running. Their jobs were made busier by budget cuts which decreased their ranks and increased demands on their time. They also had 10 days fewer before the start of school to handle the rush of paperwork.

Most department clerks and aides had to do double-duty, working half the day in one office and the other half in another. Cletus Cleaver had English in the morning and science in the afternoon.

"A problem is that the English department is so large," said Cleaver, who used to work there full time. "I never get caught up. I can't do near the work per teacher."

Gwen Patrick did not know until the first day of school that she would be both the social studies and math department clerk. Previously, she had been an aide for the child care cluster.

Dora Walker, the journalism clerk, did not have her hours cut, much to the

relief of newspaper and yearbook sponsor Judy Babb. "I couldn't survive without her," said Babb. Walker keeps up with all yearbook payments and portraits as well as advertising for the yearbook and newspaper. "She runs a \$100,000 business," said Babb.

Rooms always bustling with activity are office 104 and the counselors' office, yet both were also affected by budget cuts. Among her many duties, Kitty Maxwell received all visitors to the building and sent students to assistant principals in the office. "We have a lot of traffic," she said. With one less clerk, she is trying to train office helpers to answer phones, mark mail and run the copy machine.

Cecilia Bailey had the job as receptionist for the counselors' office, as well as handling all schedule changes for half of the juniors. Last year, there were five clerks in the office, but this year there were only four.

"We feel like whoever is making these changes does not realize the amount of work that goes into a school this size to keep it running smoothly," said Bailey.

But her main hope was still "to try and please everybody." With such ambitions, it is small wonder that clerks are always busy.

-Julia Barton

Always busy

Counseling clerk Evelyn Baker makes student schedule changes. Each clerk was responsible for a grade level. With one less clerk, and 10 less days before the start of school, paperwork in the counselor's office multiplied this year.

Zelda Rains has been a study hall teacher for 16 years. She went to Hardin-Simmons University and then went on the El Centro College. She taught first at North Dallas but came to Skyline because of its "new concept in learning."

Rains remembered rough beginning the school had and how Frank Guzick pulled things together.

"Guzick came in and in two months it was a different school. He really got it in order."

"He made school conducive to learning. He was firm but fair."

Although she was sad to see Guzick go, she feels that Gene Golden will be a very worthy successor.

PROFILE

Zelda Rains,
Study hall

One of the 10 remaining members of the original faculty, Eva Carter obtained enough work experience to become an expert at secretarial jobs. Carter ended her education at the old Pleasant Grove High School in 1942. After high school, she got a secretarial job at Neiman-Marcus and seven years later she began working at Sears where she worked for 21 years. She also worked in a defense plant during the war. Other jobs included H.L. Green, Volk Brothers, Mercantile Bank, Rory Ribelin Paint Materials and Graham Shoe Co. where she was an executive secretary.

PROFILE

Eva Carter,
Language
office

Eva Carter's loss to a company who refused to give her time off to celebrate her 25th anniversary was Skyline's gain.

"I left my last job because they wouldn't give me a two weeks off so I could celebrate my 25th anniversary. I was an executive secretary there for 10 years," said Carter.

Remembering Skyline's opening at Buckners, Carter liked all the sunshine.

"I worked in the library my first couple of years here and when we had to process and reprocess all the books," said Carter.

Carter remembered how primitive Skyline's beginnings were. "Even when the school had opened, we (the library) had to work in trailers."

New sponsor for drill: Giving a helping hand

From looking at the smiling painted faces, one would never guess that those faces had been tear-streaked and mascara-tracked. But they had.

Silhouettes reacted as could be expected when they were told that their sponsor of two years, Diane Hranicky, was leaving them and being replaced by new sponsor Debbie White.

"I didn't know how we were going to manage because no one could do the job she had done," said Wendy Daugherty.

The change was inevitable. Hranicky's teenage son would play on Lake Highland High School's varsity football team and Hranicky couldn't be at both games. She had to choose.

She chose a good year—one that 38 girls would provide the transition between old and new.

It was just as hard for Hranicky to sit in the stands and watch as it was for the girls to give her up. "I feel as if I'm a part but apart, as if I'm watching from afar," commented Hranicky.

She wasn't the only one who had taken a back seat. Her family, who for two years had been surrounded by young energetic girls missed the action. "My husband misses all the hugs and kisses," she joked.

Because Hranicky was still at Skyline, the Silhouettes still saw her regularly. "I love to have Mrs. Hranicky around. She is our biggest fan, but when we are wrong she lets us know it. She is not only our ex-sponsor, but our best friend," said Krista White.

White stepped in and filled the gap. After teaching at Skyline for years, she was a familiar face for the girls.

Drill camp and practice brought the girls and their new sponsor together. She's also admired for the responsibility she took on.

"We respect Mrs. White a lot because she took on a lot of responsibility when she came in last spring and we have accepted her like she was part of the line," said Lisa Ingraham.

It would have been difficult for anyone to become a mother to 60 very different individuals. But because of her uniqueness and her initiative, she has become a do-it-all mom.

-Tracy Jordan

Comic relief

Drill sponsor Debbie White and capt. Sherr Newman take a break during morning preparation in the weight room and joke about no. 68 Claude Jefferson's, who plays defensive line, attire prior to the senior pep assembly. This is White's first year as sponsor and she also teaches typing and shorthand. Senior Sherr Newman a 3rd year member wears no. 55 an old jersey which is the traditional attire of the girls during senior assemblies. Coaches didn't want the girls to wear the current football jersey's because the boy's had to wear them that night against Samuell. Photo by D. Mann

Night School: The best second job

Night school, which was offered after regular school hours, Monday through Thursday, has been a blessing for teachers and students alike.

Many teachers had just started teaching this year but others had been teaching it for years.

This offered a great choice for all involved. The teachers seemed to especially love the idea of teaching night school. It made their lives better in so many ways.

Mr. Atwood was on his fifth year of teaching the night classes and used the extra income to pay for his children's college tuition. "All for the love of my children" he said.

Keith Babb from the computer cluster, a more recent night school teacher, said the pay was wonderful, "Much better than any part time job" he said.

He also loved the students he dealt with. His basic computer class has many adults in it that thoroughly enjoy to learn.

"It's refreshing to teach people who are coming to class on their own free will, because they really want to learn" Babb said of his night school students.

Night school offered a variety of academic courses, from health to computers to English III.

It also had vocational classes that anyone can attend, not just Skyline students.

This program gives students a chance to catch up or get ahead in their course load and gives adults of the area a change to learn new things. It also gives the teachers perfect second jobs, doing what they do best, teaching.

-Lauren Johnson

Special Time

Mr. Gruier gives night school students some special attention. Teaching both sociology and psychology during the day and night school here at Skyline gives Gruier an especially heavy load.

Working Hard

Mr. Lockheart gives a lecture to his night school students one Tuesday night. Lockheart teaches American Government at Skyline during regular school hours and night school is just one more of his responsibilities.

Busy at work

Jane Howell is busy discussing with her night school class. She teaches English II during the day but also enjoys her night school classes. Photo by E. Aviles

Math and JV coach Sherman Hughes educational background ended when he took 6-hours of Math from the Educational Institution, where he was paid to attend school. He spend eight hours at

the University of Houston. He attended Stephen F. Austin in Nacadoches and obtained his masters of Education at East Texas State University.

PROFILE

Sherman Hughes
Book Room, Coach

He was not sure, but acoverded for the lack of respect because they seem not to have any parental demand. Not listening is another major problem of students "But for everyone sakes," Hughes hopes "this is just a phase in young adults. school. Hughes has noted many changes throughout Skyline's years but the most

troublesome to him is the the lack of respect students seem to have now.

Hughes taught at West Columbia in Texas and Celina, before coming to Skyline. He was glad to be here but rather overwhelmed at the size of Skyline.

Feeding the young: Jobs go hand-in-hand

"Oh man does she has it made" or "Oh God, do I feel sorry for her." One or the other is the normal reaction of students when they find out there's a student who has a parent who teaches.

Stereotypes that go along with being a teacher and a parent cause teachers to take on a whole new attitude. Beatrice Barnes Occupational Exploration teacher, has a daughter who is in her fourth year of being at the same school. "When at school, I treat her as if she is another student, she'll come by and visit me, but she knows I won't write her a pass or anything," said Barnes.

Having a parent around has its advantages. "I really don't have a problem with my mom around, because she is there if I need something, and it's helpful when things like report cards come around. I can get things over with fast," said senior Angela Barnes.

Regardless of whether teachers had children at Skyline, many teachers

were parents. From tiny babies to long-since graduated, teachers discovered their teaching and parenting caused few conflicts. In fact, relating to students all day long made some teachers believe they were better parents for it.

The home life of a teacher is pretty much like that of many parents who go home and discuss the day's events. "My mom comes home and tells me what happened at school, what-so-and-so did. It's funny because students come back and tell me what happened in class," said the younger Barnes.

Teaching is a job but also a worthwhile experience for parents, many teaching abilities rub off on parenting and visa-versas. "I'm a stern teacher and parent because I see the importance of discipline in everyone's life," said English teacher Nadine Faulk.

-Tracy Jordan

Hot seat

English teacher Nadine Faulk and her newly adopted Korean granddaughter, Michelle Moore, sit on a canon site in Ft. Paluska, GA. Fault was on vacation visiting her daughter, who is a major in the U.S. Army stationed in Ft. Stewart, GA. Twenty month old Michelle was adopted into the family last year.

Dashing through a gift

Health and theater arts instructor Susan Leary spends Christmas morning with her two sons Ryan and Michael. It was her youngest son Ryan's first real Christmas. Ryan had just turned one Dec. 21. Leary shows Ryan a Christmas card as Michael rips into a gift.

Barbara Taylor has been a member of the Skyline faculty prior to its opening. Like many of the other permanent faculty she was hired before the school's official opening. Taylor's

educational background ended with a bachelor degree from Library Science from the University of Texas in Austin.

PROFILE

Before becoming a librarian Taylor taught three years of English and history. She was also an airline stewardess for American Airlines for five years.

"I was hired a year before the school opened to process some 4 thousand books, now we have over 28 thousand books and we have more books than shelving space."

"The library looked big at first glance because we did not have any furniture or books or carpet and we had to divide the books up and put them in a mobile and the rest at the Buckner school."

"My first impression of Skyline was that it was very huge and when Mr. Stance gave us a tour of the building the library did not have any carpet and it had some supporting walls."

PROFILE

Audris
Zidermanis,

Biology
health teacher

Audris Zidermanis was born in Riga, Latvia, fled to Germany as a small child, spent seven years in refugee camps before coming to America. He attended school, learning English as he went. He has attended a number of universities and has numerous degrees in biology, chemistry, zoology and physics. He is currently working on his doctorate and hopes some day to teach on the college level or go back into research.

Teaching high school is not Audris Zidermanis' first love, research is. Zidermanis came to Skyline to teach biology after federal funding for his research on female reproductive organs ran out. He came to Skyline when he heard the school was looking for people in technical fields.

Not as positive about Skyline as many teachers, Zidermanis believes the school was a good concept that never quite came off. The Skyline concept wasn't the only problem he saw.

"The breakdown of home life is the main reason for student apathy . . . The parents are not around at the child's early years to hand down their own values.

"Students, more than ever, want things given to them. And there's little emphasis on quality," Zidermanis said.

Bones

Audris Zidermanis explains corpal bones to his biology class. Biology was just one of his science interests. Photo by D. Green

Soaking up rays

Ramon Arguelles is surrounded by his pupils. He taught swimming to young children during the summer and here, he is with his students enjoying the afternoon sun. He teaches Spanish during the school year and enjoys both jobs very much. His summer job was both fun and profitable. His love for teaching ranges from young to high school levels. Photo by Arguelles family

Second Jobs: A Double Load

Teachers had more to do than most students realized. Second jobs away from high school provided extra hours of work and enjoyment and were a means of making extra money. These had hobbies and made them into profitable occupations.

One man who used his spare time to its best advantage was Bob Winn. He has been a librarian at Skyline for three years. At his second job, he used his musical talent as organist and associate music director for Northpark Presbyterian Church. On Wednesday evenings and Sunday mornings and on Tuesday evenings and Saturday afternoon, Winn was at church practicing filing music.

Math teacher Camille Malone taught at Eastfield Saturday mornings. After four years of part time teaching, Malone was still enthusiastic. "And believe it or not, I love teaching early on Saturday mornings. It's very quiet and peaceful."

Teachers were also creative in their second jobs. It was a way to express their interest in other things besides a teaching career. Math teacher and coach, Sherman Hughes was a teacher who was skillful in carpentry. His other job was really a special hobby to him. He worked as a carpenter, rebuilding a house which

was originally built in 1860.

Second jobs vary to the extremes, just like the differences in the teachers themselves. Some teachers had a job only during the summer. Other teachers made more money by teaching at more than one place. Night school teachers earned extra money and remained in their first profession. Some teachers also taught outside of DISD in such places as the Dallas Community Colleges.

Buidling trades teacher R.A. Wigman owned and operated a ceramic shop. "I started the sideline ceramic shop due to my many hobbies I have learned over the years in service." Wigman had a career in the Navy. Wigman also said, "I do not plan on getting rich from the operation, but something to help over the years after retirement from DISD and from the U.S. Navy."

He had a day time manager that handled the shop which he was at Skyline teaching.

Because of the increased cost of living, many teachers saw then need for a second job. Although these second jobs were an added responsibility, teachers made the best of them because they were a better part of their careers.

-Carole Herndon

Hitting the right note

Librarian Bob Winn plays the piano for his Northpark church. He practices during the week and performs on Sundays for the congregation. Winn, like other teachers, has a second job. Jobs other than at Skyline provide extra money for them and also are entertaining. Winn utilizes his hobby of playing the piano as a way of earning money and having fun at once. Photo by E. Aviles.

Beating the crowd

Mrs. Wilson is at the head of the pack as she walks from the stairs to one of her Algebra classes. She usually carries a satchel or briefcase where ever she goes since she has no permanent classroom.

Floating teachers: No place to call home

These teachers, however, do believe they have some advantages. The change of scenery that comes with moving from room to room was one.

Making it from one room to another with all their supplies in a seemingly miniscule six minutes was part of the daily routine of the 23 floating teachers here at Skyline.

A floating teacher, a teacher with no room to call his own, encountered a variety of problems. He had to play beat the clock. He had to hope the home teacher allowed him space to write on the board. He had to carry a wad of keys that could anchor the Titanic.

Fortunately, most floating teachers managed to survive, put on a happy face and make the best of it.

Getting one's stuff transported was one of the biggest hassles for these teachers. Tony Tovar packed his in a briefcase. Others relied on rolling carts and bulldozed their way from class to class. Others like Anna Hodges, said, "You just have to carry your materials on your back."

Charles Cole, a Biology teacher who has been a floater for three years says that he always seems to forget something no matter how hard he tries to plan ahead.

Some of these teachers have unusual troubles that people would not ordinarily think about. Tovar once for-

got what room he was going to and had to go to the office to look it up. Anna Hodges, who has been a floater for three years, ended up in the wrong room at the wrong time.

These teachers, however, do believe they have some advantages. The change of scenery that comes with moving from room to room was one.

Cole also said that "there is a greater exchange of information than is normally possible between teachers this way." He also said that teachers are very helpful to him during his time in their classrooms.

Hodges and Tovar both said they liked being able to see their old students in the hall and meet new ones as they go from class to class.

Some, however, didn't feel as strongly. Jon Papp said, "I just don't see any advantages."

Regardless of the difficulties, these floating teachers do have unique situations and as Cole said, "I think it would be very helpful to floating teachers if all students, teachers and administrators understand the special handicaps and difficulties we face each day."

Faculty cars: They show they care

Cars. To some, they were just a means of transportation. To others, they were their pride and joy. Teachers were no exception.

Audris Zidermanis was especially fond of his 1963 Scout International. While not new or especially pretty he had rebuilt it following a fire.

Others believed that their cars were a symbol. History teacher Diane Hranicky has a 1985 BMW and that was just part of her Yuppie attitude. "I'm a Yuppie and proud of it," she stated.

The great variety of cars in the faculty parking lot was to be expected. School days brought pick-ups, Peugeots, station wagons and even a Rolls Royce to rest next to each other while their owners worked.

A few teachers were car rich. Zelma Washington had three cars as did Leonard Davis and John Spann. Virginia Blair had five cars ranging from 1973 to 1984 and from Datson to Jeep.

Being rich in number did not mean that all functioned up to par. While owning three, Spann jokingly said that he just prayed one would run.

Another point of interest was the age of the cars. Most teachers owned newer models, but some that did own older cars went for the classics. Davis had a completely restored 1951 Chevy.

Teachers also plastered their cars with bumper stickers professing political preferences, radio station favorites and personal statements.

KVIL was the most popular with K104 coming in second. But the personal statements showed the most variety. "I love bulldogs," Proud to be union," "We love kids" and "Jesus is Lord" were but a few.

Teachers had some of the same problems students did with cars breaking down, getting bumps and bruises and wearing out. Like Dan Peavy, who announced his latest disaster, Dec. 18. Peavy's Jaguar caught fire and burned "to the ground" when his wife attempted to start that morning.

What an excuse to be late to class.

-Carole Herndon

Virginia Salter, 10th grade computer teacher, gives a introduction to basic computer software and an introduction to computer programming.

She received her BA at Mamouth College where she majored in sociology. She later went on to get her masters at UTD. Before coming to Skyline she was a data processor for DISD.

PROFILE

Virginia Salter,
computer cluster

As one of the original teachers at Skyline, Virginia Salter had a lot to worry about. Not only was she a new teacher but she had also walked into a school to teach without equipment.

"I became very excited and inspired about Skyline, but I was scared to death the first day," said Salter.

Having come straight from the

industry, Salter found her new schedule alien. "I had never taught before and I had two three hour classes each day. There was no equipment or desks or tables anywhere, just chairs and one overhead projector."

"It all ended up fine though. I'm glad I came," said Salter.

Summer Trips: China calls teachers

Summer travel brings visions of trips to the coast or maybe to a theme park or to see relatives in another state, few go halfway around the world. During the past summer, however, faculty member Hsin-hui Wang and Robert Batson did just that, and ended up experiencing China.

Wang, an oriental language teacher and sponsor of the Asian Club, returned to her homeland of China for academic and personal reasons. While there, Wang saw parts of the country she hadn't had the opportunity to see. She was also excited at the chance to see friends that she hadn't visited with for 30 or 40 years and a relative she hadn't seen in more than 50 years.

Wang lectured at four Chinese universities about American history and contemporary American life. "The Chinese young people asked me about American high schools, college life, and what kids think and do in America," she said.

Further travels took Wang northwest into the Gobi Desert where she saw sections of the Great Wall. She also did some mountain climbing, provoking the comment—that she "never before had respect for a big mountain."

Architecture cluster teacher Batson also made it to China during the summer. He travelled with a group of nine, led by Massachusetts architect Paul Sun, for a newsletter entitled *Earthwatch*. Batson took the opportunity to study oriental architecture and the Chinese approach to rural construction. For three weeks, the expedition observed building styles while visiting six different cities. "The notable difference was the lack of technology," Batson said. "Everything was done by hand and was crude."

—Carole Herndon

The local people

Studying Primitive lifestyles and Chinese architecture were some of the things Robert Batson did on his travels with *Earthwatch*. Photo by R. Batson

Coke's still the same

Hsin-hui Wang enjoys a soft drink at the Canton City Museum. She enjoys the ocean view from atop the mountain. While there, she visited with friends and family and saw parts of China she had never seen before.

The end of the road

Mrs. Wang walks at the last part of the Great Wall on a rainy day in Northwest China. It was the first time that she ever saw this section of the Great Wall.

TECAT trouble: teachers debate test

"And the answer is 'b' Why is that?" asked the instructor.

"Because you always put a mark of punctuation inside quotation marks," volunteered one pupil

The scene might be a typical classroom one, except there are no students, only teachers. Once a week in February, interested faculty members got together to review grammar skills they now needed to keep their jobs.

The Texas Examination of Current Administrators and Teachers (TECAT) was given Mar. 10. According to the legislature, anyone who failed to pass the test with a 75 would lose his teaching certificate. The so-called "teachers' competency test" was required under the reforms of House Bill 72, and it has been a source of controversy since. The Texas State Teachers' Association challenged the test in court, calling it an **ex post facto** requirement. Nevertheless, TSTA held preparation workshops for its members.

Most teachers said they were not worried about their ability to pass the test, only wary about its content. The test consisted of 85 multiple choice questions and an essay.

"I'm not nervous, I'm frustrated," said practical law instructor Gene Schock. "So much is on the line. Practice gets rid of fear of the unknown."

AP English teacher Margaret Hamlin sponsored review workshops in the fall. "People would tell me, 'I haven't had an English class in 20 years.' My answer

was 'It hasn't changed much.'"

Some argued the test effectiveness to weed out poor teachers.

"It's not a 'competency' test," said Shock. "It's a literacy test. You could pass this test and still be a bad teacher." World history teacher Richard Soddard agreed, adding, "I think teachers should be tested in their own areas."

But some saw good reasoning behind the test. "It improves standards," said geometry teacher Diana Zoth. "If students hear correct English, they will speak it."

English teacher Evelyn Kattes saw another positive aspect of the test. "I've become much more aware of what students go through for testing," she said.

-Julia Barton

Put on your thinking caps

Electronics teachers Robert Dale and Roger Warren and practical law instructor Gene Schock review their knowledge of punctuation. "(TECAT) is not a 'competency' test," said Shock. "It's a literacy test." Photo by K. Garcia

Mary Erwin has taught math courses from FOM to trigonometry during her years at Skyline. She got her bachelors degree from Prairie View University with a double major in math and biology. She is working on a masters of psychology at North Texas State University.

Reflecting diversity of interests, Erwin has sponsored bowling club, martial arts club and ice skating club. She is now occupied with raising her five-year-old girl.

PROFILE

Mary Erwin,
Algebra II

Erwin said the educational atmosphere was more "relaxed" in the past. "There wasn't as much pressure on students or teachers. We did our work; we did it well. But nobody was uptight."

In the future, she thinks education will make a full circle, returning to quality rather than quantity.

"There was a time when workers took pride in making cars. Now they're just turned out and don't last two years. People are beginning to see the importance of doing work right.

"Right now, everything is run on a time schedule. There is pressure to do it fast; get it over with."

However, she predicts education will return to the "good old days, when teaching was enjoyable and student days were ones to be remembered and savored."

Double duty: Teachers also tutors

Teacher: One who's occupation is to instruct.

Tutor: a person charged with the instruction and guidance of another.

By their definitions, "teaching" and "tutoring" aren't very different. But with the state's mandatory tutoring rule, faculty members found tutoring to be a new duty.

Under the rule, a student making a grade below 70 in language arts, math, science or social studies had to be tutored during his or her study hall two days a week. All teachers of above subjects had to spend one of their conference periods tutoring, although tutoring duty rotated every six weeks.

"In essence, what they're being asked to do is teach another class, but it's within the limits of state policy," said Principal Gene Golden.

According to procedure, the teacher of the failing student sends an assignment with him. The tutor helps the student with the work, but the assigning teacher grades it.

"We were told that we were to do no teaching at all—that tutoring is merely a supervisory job," said American Government teacher Leonard Davis.

English teacher Patsy Niedecken gave her failing students special work to do while in tutoring. But as a tutor herself, she had very little to do. "I haven't had anyone ask for help," she said. Out of 17 students she was to tutor, only four showed up regularly, and those were told to work on current as-

signments in class.

Room C17 was the only room designated for tutoring during first, second, third and fifth periods, but it was far from full. A problem seemed to be that study hall teachers received no list of students to be in tutoring. Instead, the students were to report directly to the tutoring room and fill out an attendance card. But many remained in study halls.

"A list would be most beneficial," said study hall teacher Zelda Rains. "I could urge them to go. They do need to revamp the system."

Although "the system" of mandatory tutoring was new, some voluntary tutoring programs went on as they had in the past. Rains oversaw a "peer tutoring" class third and sixth periods in which students worked with other students. Spanish teacher Ramon Arguelles came to school at 7 a.m. to "work with anyone who needs help in any Spanish class."

Arguelles explained the reason he took the extra time for tutoring. "I like to help and I want students to learn," he said. "That's why I'm a teacher."

Such an attitude may become necessary as teachers find tutoring a new part of their job.

-Julia Barton

Pen in hand

Chemistry teacher Gary Atwood tutors a student in his office. As science department chairperson, Atwood had to make tutoring assignments which rotated every six weeks.

Elsie Lee began working for the DISD in June, 1963, at South Oak Cliff high school. Before that, she worked at an auto investment company for 14 years. She quit her job there, she said, tired of training men for positions which she, as a woman, could not qualify for.

Lee is responsible for students' schedules, report cards, attendance records and working documents. She now has three secretaries, but originally she was the only one in data.

"For years, I took work home with me and worked until midnight," she said. "I had to have some more help."

Lee's job is going through a period of transition to more computerized technology. "Attendance

Lee went to Hockaday Junior College and North Texas State Teaching College (now NTSU), where she majored in math and minored in music. She plays flute, oboe and organ. Married for 40 years, she has two children and two grandchildren.

cards will be obsolete after this year," she said. "It will work directly through downtown."

But, she said, technology doesn't relieve her of her responsibilities. "Don't let anyone ever tell you the computer made a mistake. There's always the human element. We're not without fault here."

Lee remains enthusiastic about her job. "You'd think after 23 years doing basically the same thing, I'd get

-Tracy Jordan

Becky Lyons is another one of the few remaining members of the faculty who has been here since Skyline first opened its doors. Lyons, who is a counselor, was here even before Skyline opened. She was a part of the Buckner family. Lyons obtained a B.A.

from Baylor University, a Masters from East Tennessee State University and a doctorate from East Texas State University.

Lyons has filled her educational dream, which was to have as many people from all the DISD attend Skyline.

"During our stay at Buckner, we had to bring our own lunches and we didn't have any lockers."

"They had to ring the bell by hand and it was located in my office, so I knew not to have any seniors conference in my office."

"There were around 1,000 students at the school which was made

up of sophomores, juniors and seniors. There was at least one senior from every school in the DISD."

"My son Morgun, who is now a news editor for KRLD, attended Skyline. He decided to attend this school because of all the opportunity that it has to offer. He graduated in '75," said Lyons.

Done with a smile

Daily tasks are not always welcomed but Melvin Crowder tries to make the best of it as he empties a can with a smile. Emptying cans is only a small percentage of the work. Crowder was required to complete before the end of his shift. Photo by R. Kemp

Keep it clean

Just one out of 35 custodians assigned with the job of cleaning, sweeping and maintaining the various buildings clean, G.L. Russell empties just one of the three trash cans in Deborah Whites typing room. Russel was in charge of maintaining the cafeteria, first and part of the second floor. His work shift began as early as 2:30 p.m. and ended as late as 11:00. Photo by B. Davis

No 'crying over spilt milk': Janitors keep up grounds

Spilt milk on the cafeteria floor, obscene writings on the bathroom walls and candy wrappers on hall floors were just a small percentage of the little messes that students produced on a daily basis that had to be cleaned up by friendly neighborhood school custodians.

Some of the many chores of the custodians were sweeping the hall floors, loading and unloading freight, taking care of the outside grounds, the general maintenance plus the mediocre jobs that the students unnecessarily caused for them.

"A lot of the running around that we do for students is not necessary, they

forget their locker numbers and we have to go around and open them—they walk us to death," custodian supervisor George Moncrief said.

A large percentage of the work could be eliminated if students contributed a bit more effort toward keeping the building clean.

"The most disturbing hassle that we have is collecting all the misplaced items that students absent-mindedly leave around and all the paper they scatter onto the floors. If every student took the time to pick up a piece of paper everyday, our jobs would be much easier," Moncrief said.

Custodians also saw their staggered

shifts as a problem since there were not enough people to go around. There is 66,500 feet of floor that has to be cleaned and swept each day, 30 bathrooms with 180 toilets have to be cleaned and only two shifts from 5:30 a.m. to 3 p.m. and 2:30 p.m. to 11 p.m. that was divided between the 35 crew members.

One alternative used that helped keep the building cleaner was to allow students to work out their in-house time by doing janitorial duties.

"Having the students help us during the day is an advantage as long as the student are willing to work and not come down here to blow off," said Moncrief.

One more priceless collection added to the few remaining members of the faculty, who has been apart of Skyline since its first opening, is Jettie Sams. Sams is a coach and a physical education instructor. The intended Walen College in Plainview,

Texas where she majored in P.E. and obtained her B.A. She then furthered her education at Baylor University where she received her Masters degree also in P.E.

PROFILE

Jettie Sams
PE

Sams was chosen out of 30 applicants for her position.

When I first saw this school I thought it was beautiful, everything was so modern and new.

It was an honor to be chosen to teach here since we were all hand picked.

The Buckner experience was fun because the student body was small and you got to know everyone.

At Buckner we wrote the school song, formed the drill team, chose the raider as our mascot, and picked the school colors. And it just wasn't a small group, we all pitched in.

-Tracy Jordan

After the tardy bell rings at 8:30 am, Skyline looks deserted to onlookers from Forney Road.

"I really think I have a great family life. I mean I would rather go out with my sisters than some of my friends because my sisters are my best friends."
-Lori Holy

"I feel that a person with an open heart, open mind, faith and the willingness to work is the person who successfully completes four years at Skyline."
-Sabrina Crowder

"My ultimate goal is to be the world's greatest computer programmer."
-Robert Murphy

A sight usually not seen by the student body is the playground for preschoolers located by B-building. The only way to view the grounds is through an upstairs window in the science lab or through locked gates.

Just a SALE

Making ends meet

Skyline's great size and good reputation drew students from all over Dallas and because of this fact, businesses were anxious to advertise.

With 66 pages in ads and index section, 54 were business ads. Senior ads were located throughout the section. Senior ads were popular, selling out within a few weeks of their initial sale. Selling was what the ad section was all about.

No matter what company advertised in the yearbook, their placement in it meant one thing—competition. This competition proved to students that the patrons provided just their type of store and that they cared enough for them as customers to buy an ad.

The index, consisting of 12 pages, provided the location of every student, group shot, story and advertiser within the book. The ads and index section worked as an information guide to help people find others and to show students that city-wide businesses want to be their type.

Preparing mums for homecoming kept horticulture student Jenny Dickson busy. Mums were sold during the lunch hour and symbolized tradition and hopes for a happy homecoming. Photo by T. Vallier

Free yearbook

What started out as a way to get a free yearbook ended up as a way to meet new people and build good will.

In its first year, the Origin patrons earned 34 free yearbooks for Skyline students. The way the plan worked, each student found eight sponsors who gave them \$3 each. The \$24 bought the student a yearbook and gave the sponsor a listing in the 1986 Origin.

The students who participated were quite positive about the program. "It's a better way to get together with people. You can earn it while you meet people," Eric Allen said.

"Getting donations wasn't difficult either," Kevin McKinney said he contacted his mom and dad and neighbors that had children at Skyline. Bruce Brown found people at his dad's office were a good source

for a \$3 donation.

"I just asked them if they'd like their name printed in the yearbook," said McKinney.

Everyone contacted about the program said they planned to do it again for the 1987 yearbook. "It gets the cost off my back and people like to see their names in print," James Williams said.

Forms to earn a free yearbook will be available in room 223 or 224 the first day of school as well as through ninth grade homerooms. "I think this is a good way to show a student he can afford a yearbook every year," adviser Judy Babb said.

"It'll also give those kids with older brothers and sisters here a chance to get their own book. Yearbooks are a personal thing. If you can't get it signed and keep it forever, it's not really yours," Babb said.

"I like Levi's because they're the original Blues and they also fit my easygoing lifestyle," said senior Leslie Strother.

As well as being part of student lifestyles, jeans were considered a vital part of the wardrobe. "My wardrobe just wouldn't be complete without a pair of Guess jeans to wear," said sophomore Tracy Murphy.

Jeans are also considered dependable by some students. "When I wake up late in the morning I know I can always throw on a pair of jeans and not worry about looking bad," said freshman Dameon Williams.

Some students consider jeans to be trendy. "Jeans are in because they're comfortable and easy to wear," said senior Courtney Lucky.

Students wear jeans for different reasons, but all seem to agree that the jean is an important part of the wardrobe.

Cherrie!

On the day you were born I christened you as my million dollar gold piece. Well, I want you to know your value has increased. I'm very proud of you and I know I will now be dissappointed as long as you keep your goals and objectives for success. Remember this: "Some people strengthen society just by being the kind of people they are."

Love ya!
Dad

Cheryl Blair

*L*inda Villarreal

TO our daughter Linda VILLARREAL, whom we feel very proud of. To all the hard work you have done and everything you have accomplished. Thank you for the wonderful moments you have given us.

God Bless You
in your future,
LOVE Mom and Dad

Linda Villarreal

*T*odd Vallier

I would like to thank all the members of the yearbook staff and Mrs. Babb for making this year and this book the greatest of all. Thanks also go to my parents who have supported and encouraged me for the last 12 years.

Belle Collins

Belle,

I am very proud of your accomplishments and equally proud that you are my daughter. I know that you will continue to succeed "Babe."

I love you,
Mother

M.D. S. 2/13/87

James Lemmon

Life by the yard is hard. Life by the inch is a cinch.

"In everything you do, put God first and he will direct you and crown your efforts with success." Prov. 3:6.

We are proud of you son.

Love
Mother and Daddy

Pam Woodberry

Looks Mom and Dad!! I've finally made it! Thank you for putting up with me for the past 18 years and helping me through the turbulent flight of life.

Love always,
Pamela D. Woodberry

Cathy Huntsberry

Well guys,

What can I say, "I love u all!" All of u are really deserving of whatever becomes of u in life. Do your best for me and all the rest. I would also like to thank my greatest inspiration throughout my high school years: Mom, step-dad, Brenda, Wendell, Keith, and Tim. May God Bless u all.

Good luck
Cathy Huntsberry

Sr. '86

Keith Johnson

Keith, your father and I are so proud of you. Continue to stand for something or you'll fall for anything. Good luck, baby!! You deserve the best. We love you.

KNOW *in the*

To go to college or not to go to college: that is the question. You're graduating soon and decisions about your future need to be made.

"There are many career options one can pursue after high school such as computers and fashion, which are the most popular and others such as engineering and business which are more serious fields," said counselor Leo Naeger.

After considering options and collecting information, it is time to make a final decision. Naeger gives three steps for helping students reach a final decision. "First, know what your interests are. Second, know your capabilities and talents. Try to base your interests on your talents and capabilities. Third, find out how your choice fits into the job market."

Young Life

Kevin Tichenor holds a balloon in his mouth as Laura Gentry attempts to shave the balloon.

One of the many activities Young Life hosts is "Hat Night," used to encourage teenage involvement in the organization.

Jackie Branum, Kacy Caviness, Angie Bohne, Rod Murrell, Jana Dixon, Leigh Ann Fagin and Staci Baker

model their ski wear on their annual winter break trip in Keystone, Colorado.

Staci Baker, Lisa Anderson, Kacy Caviness socialize at a Young Life meeting.

Sergio and Guadalupe danced the night away at the Christmas party.

Fanny danced in the production of Sleeping Beauty in Bordeaux, France.

The Chinese Acrobats were a hit with these guys.

Roy played the autograph hound at the Arts District Theater.

Fabiola and Dr. Naeger discussed issues with Congressman Bartlett.

Lorena had a purr-fectly good time at the Halloween party.

Roy and Jose asked Santa for all their favorite things.

The Christmas Carole was a big hit with all in attendance.

Maria was heard to say, "Oh boy this Santa Claus is cute."

Roy gave us his rendition of "Santa Claus is coming to Town."

Ed made instant friends with the Chinese dragon.

Dilia reigned as the Halloween Queen.

Diana wondered "are we winning or losing?"

Spanish Club sponsors Mr. Arguelles and Mrs. Hodges and club president Gloria Limas present new logo ideas to members at a club meeting.

Club members Lane Shannon, Ann Tram and Jason Meazeel enjoy the delicious foods at the Spanish Club Halloween party.

Spanish Club member, senior Patti Bethyk painting the club design for the hall decorating contest during homecoming week.

Wafers, schoolboys, GQ and New Wave are all different styles of sunglasses, and all are part of the eyewear statement. "I wear my shades because they accentuate my wardrobe," said junior Sean Thomas.

As well as being an accessory to a fashionable wardrobe, sunglasses can also be an extension of someone's personality. "I wear sunglasses to relax, clear my mind and to exemplify my cool attitude toward life," said senior Angela King.

Still others used sunglasses as a way to shelter themselves from the rest of the world. "When I wear sunglasses I feel as though I'm looking at the rest of the world from my own window—untouched," said sophomore ShaGayla Franklin.

Whatever the reason may be for wearing sunglasses, students seem to enjoy sporting the fashionable eyewear.

High anxiety

He nervously drives to the front of her house with high expectations and a lot of anxiety. Meanwhile she frantically tries to find something just right to wear. He rings the doorbell, swallows hard, and hopes for the best. She rushes downstairs, checks the mirror, and opens the door. This is a typical scene of a first date, high anxiety and high hopes.

Junior Keith Jones explained where he takes a girl on the first date. "It depends on the girl. If I'm serious about her, I'll take her home to meet my parents," said Jones.

What to do on a first date is also a question. "It depends on the guy, but more than likely if we have a lot in common we'd pretty much have a nice evening," said junior Kathy Tate.

Almost everyone agreed on one thing. "Always be yourself," was how senior Russell McCall explained it.

-Kim Money

What's For Breakfast?

Nutrition is very important, and breakfast is one of the most important meals of the day—so students are being told by parents and advertisers.

But according to some students breakfast is a choice left up to the individual. "I don't eat breakfast because I don't have time in the morning," said senior Angela King.

Other students insist on a traditional breakfast, "I eat sausage and biscuit because it's microwaved, good and fast," said senior Matt Sanford.

Still others opt for something different, "I sometimes eat icecream because it tastes good and I don't like eggs and bacon," said junior Erin Ramey.

Some students insist on the extraordinary. "I eat an amaretto cake because I enjoy the experience," said junior Leo Landin.

Shoes, Shoes Shoes

Topsiders, tennis shoes, pumps, and combat boots were just a few of the different kinds of Shoes. Shoes, a necessity, become a major part of the fashion statement. "I choose to wear Gucci shoes because they exemplify my personality," said senior Robert Watkins.

Style also played a part in the choice of shoes. "I wear my snake and ostrich boots because they're fashionable," said senior Stephanie Cook.

But, according to senior David Martinez. "A lot of people wear shoes not for style but for comfort."

Buying a car

Vroom Vroom!

Vice President of Champion Ford, Jerry Reynolds suggests the following when purchasing a car, "I think the main thing would be to buy the car you like, make sure your car fits your budget and test drive it.

"Make sure you like the ride of the car, because a lot of people decide they don't want the car after the newness wears off. Also, anticipate having the car for at least three years," he suggested.

A Chrysler Turismo is the dream car of one Skyline student.

HARLOW WRITING CO.

(W.W. HARLOW)

Finding time

Tackling the ugly homework monster is difficult.

"It's easier to do the hardest of my homework first and the studying last," said senior Anita McGruder.

"I clean up, sleep and then I do my homework, I think this is the ideal way because I rejuvenate myself before I start on my homework," said junior Clyde Stokes.

Your best bet, according to studies made, is to rest briefly, maybe eat a snack before beginning your homework so you're rested and ready to start.

Joe Lopez studies history at a well lighted desk with his favorite drink.

Students model three of the popular swatch styles.

Time of the Times

Swatch, Guess, and Awatch are the names and telling the time is the game.

"It's a name brand and I love the exciting colors," said sophomore Erika Graham who was wearing two Guess watches on her wrist. The brightly colored plastic wrist watches with rubber guards of different colors had faces made of everything from paisley to glowing numbers.

"I bought one because I liked the swatch when I first saw it. They're also very popular," said junior Anthony Newhouse. Prices varied from \$17.99 for Awatch to \$30 to \$40 for Swatches.

Just Notes

Pressman Cesar Segura prepares the AB Dick 360 to run notepads for cluster teacher James Adams. Segura attached the plate he made on the Itek, a direct photo platemaker, and printed the name on four places on the paper. From there, the paper went to a student in the bindery who cut it into quarters and bound it. The pads sold for \$12 for 20 pads of 100 sheets. Photo by T. Vallier

In living color

Broken radios and televisions get a new life at the hands of cluster students. Second year student Kenard Bowen uses a soldering iron to remove a resistor from a Magnovox. While Gerald Johnson supervises and makes suggestions. The bad resistor caused the television to have a vertical hold problem. Johnson explained that the televisions the students work on are brought in by customers who pay for parts. Other people give the sets to the cluster which, in turn, repair them and either sells them for \$10 to \$100 or continues to gain experience on them. The experience pays off. Teacher Mick Stanley said that he could find jobs for all his third year students if they had transportation. Photo by T. Vallier.

By himself

Sitting underneath the stairs, junior Chuong Vu prefers to study for a test instead of attending a pep assembly. Attendance to pep rallies decreased since they were held before school. Photo by L. Kahanek

Just your type

Closing

A part of the big picture

Seniors face activity cutback

cont. from pg. 5

"I like it because if you have an F on your report card, it is much easier to show your parents how high or low it really is," said junior Nicol Nichols.

Due to all the changes, students had to make some adjustments. Among them seniors discovered that some of the activities they had looked forward

to as freshmen were now being cut out or replaced. The elimination of senior field day and requiring seniors to remain in school until June 5 were the two seniors griped about most.

"I hate it. Everyone else who graduated had a chance to do these activities so why can't we. I feel that we are being judged for the doings of the

Ending it all.

Following tradition, students gather together and join hands to sing the alma mater. Every pep assembly ended with the school song, giving the audience a chance to show togetherness. Photo by L. Kahanek.

What's up

Learning to use a microscope was just one of the many things taught in science cluster. Senior Linzey Abraham uses this skill to peer in a microscope while working on a science project. There are 25 clusters to choose from and science was one of the many geared toward the college-bound. Photo by T. Vallier

Just your

T Y P E

Shave it

Plastics cluster Jesse Torres puts the finishing touches on a piece of plastic that will be used in making a plaque. Plaques as well as many other things such as keychains, name badges, clocks, frames and poker chips are all sold to students. This interaction between producer and consumer gave cluster students a better knowledge of how to deal with the public, the cost of materials and the effort it takes to make good merchandise. All these things enabled students to go out into the "real" world with some sense of direction and leadership instead of leaving high school with no inclination as to what to do or even where to do it. Photo by T. Vallier

Paisley

Displaying the latest fashion and style of paisley, seniors Denise Martin and Valarie Gray exchange phone numbers with junior Reo White. The student Center was a common gathering spot for people to socialize in during the lunch hour since stricter guidelines have been set about where to go and not go during the lunch periods. Photo by J. Babb

Up high

Putting up spirit banners and selling spirit chain links were just some of the ways the varsity cheerleaders motivated spirit. Senior Trisha Brantley and Junior Terri Mitchell (opposite page) pin up a poster in the student center during first period the week of the Longview game. Brantley later injured her leg while practicing a pyramid, but still participated and showed her true Raider spirit. Photo by J. Bonds

Just your type

Closing

You're all wet!

Waiting for the rain to stop at the Spruce football game, band members chat with freshman Skylite Peggy Clevinger. Band members stayed in the buses until the rain died down while the Skylites and cheerleaders cheered in the rain. The drill stayed clear of the rain also and only performed the traditional kick routine to *Hey Look Me Over* at half-time, postponing the feature routine to *Loverboy* until the next game. Photo by T. Vallier

Look there

The industrial arts classes are one of an exact science. Johnathan Barker and drafting teacher Richard Pennington discuss the location of a wall in comparison with a textbook rendering. Studying an industrial art such as drafting is necessary for students who have careers chosen in such fields as architecture, engineering and drafting. Photo by T. Vallier

Taking new shape

The choice: Just your type

cont. from pg. 463

seniors in the past," commented senior Connally Erwin.

But seniors weren't the only ones facing changes. Juniors were now required to take the TEAMS test to help determine if they had acquired the basic skills needed for graduation.

With the emphasis placed on educational improvements, students had to put forth more effort at studying. Those who didn't were required to take tutoring to help learn what they missed in the classes they failed. A proposed mandatory study hall sent fear through the hearts of many who believed they would be forced to drop elec-

tives.

"I think we should be given a choice. It depends how close you were to passing," said senior Charles Hudgins.

Despite all these apparent negatives, Skyline was still one of the best places to be. A greater choice of classes—from AP Calculus and World History to Japanese and Hebrew to career classes—and a greater choice of extra-curricular activities—from drill team to chess club—allowed all types of people to be satisfied. Those that chose Skyline over neighborhood schools had no doubts about Skyline being just their type.

Jim you was

Colophon

The 1986 Origin was printed by Taylor Publishing Company, Dallas, TX. 2,500 copies were ordered with 2,300 pre-sold at prices increasing from \$17 in September to \$20 in October, \$22 in November and \$30 thereafter. That price included plastic protective cover and name embossed on the cover.

The Origin is a 9 by 12 format of 464 pages. Paper is matte surface. The 16 page mini-mag section, Gimme a Break, is Strathmore Pastelle, tan antique, text basis 80, sewn in.

The yearbook cover is durolith material, screened navy with matte silver and embossed with silver foil with four color portraits, candids and cartoons reflecting the Just Your Type theme.

Body type throughout the book is melior in 10 and 14 point. Captions are 6 point melior bold. Overlines are 12 or 14 point melior bold, helvetica bold or souvenir bold, depending on headline style used in that section.

Each section of the book has its own design concept. Student life uses four 11 pica columns, fawn background and band and spot colors of midnight blue, maroon, sepia brown, deep green, brilliant red, super blue, buckskin tan and mediterranean blue. The enlarged initial letter is 96 point windsor. The rest of the headline is 48 point helvetica bold with a 18 point helvetica light secondary headline. Enlarged copy letters are 24 point helvetica bold. Mini-mag uses three 15 pica columns and 60 point helvetica bold screened to 60 percent with 24 point helvetica medium overburned. Spot color is brilliant red.

Organizations uses a column format of two columns of 17 and five columns of 11 pica. The enlarged headline letter is 72 point brush script with the rest of the headline in 24 point helvetica bold. Spot colors are russett brown and marine blue. Screens include a 20 percent four pica band behind the dominant picture and a 20

percent triangle over the copy. The triangle behind group shots is 40 percent.

Sports uses five 9 pica columns with a 40 percent screen for statistical information and a 60 percent shadow around player profiles. Headline is 42 point souvenir bold with a 14 point souvenir italic secondary headline. Division page spot color is avocado.

Academics uses six columns of 14 pica and a 6 pica plus column on each spread. Headline is 96 point futura extra bold initial letter and 24 point helvetica bold. Screens are 40 percent. Spot colors are sunrise red and brilliant purple.

The People section uses 8 pica columns for seniors, 9 pica columns for underclassmen and 15 pica columns for faculty. Screens are 40 percent black.

Seniors uses a handwritten initial letter screened to 60 percent and a 24 point melior bold and a 12 point secondary headline of 12 point melior. Underclassmen uses 48 and 14 point melior bold, all capitals. Faculty headlines are comprised of 96 point pioneer outline and 36 point helvetica.

Ad sections use 15 pica blocks, headlines in 14 point melior with special sections logos in shaded relief and brush script. Ad blocks sold for \$25, \$45, \$67.50, \$90, \$135 and \$202.50 for black and white. Four color spreads sold for \$650. Patron pages were sold by subscribers who earned free yearbooks by signing up eight patrons at \$3 each.

The 1985 Origin, Balancing the Books, won Silver Crown from Columbia Scholastic Press Association and All American from National Scholastic Press Association. State awards include Award of Distinguished Merit from Interscholastic Press Association and All Texas with Special Honorable Mention from Texas High School Press Association.
